Dear exporter,

A world exhibition is a place where different countries and different nations present their best in a concentrated form, and where we can fully realise the specific features of each country, the richness of its nature, culture, technological progress and success in the various areas of human endeavours. A world exhibition also creates a vari-coloured mosaic of the countries involved, an opportunity for comparing but also admiring the diversity of the world. It is understandable that all participants want to present the best they have, show off and, simply, prepare for an impressive exhibition that characterise them best. Slovakia is no exception. The Expo World Exhibition, which is held in the Spanish City of Zaragoza in 2008 and whose main topic is water and ecology, is an excellent opportunity to draw the world's attention to our country in the heart of Europe, show to the world the richness of our waters, mineral and thermal springs, the professional level of our water management, and the sports and recreation possibilities offered by our water areas and flows. The slogan "Slovakia – the spring of Europe", under which our homeland is presented in Zaragoza, eloquently characterises the abundant reserves of waters springing in our territory high in the mountains, flowing through lush green forests and fruitful lowlands, providing the country with remarkable beauty and diversity. This slogan also points out our strategic position in this field on a worldwide basis. The Slovak exposition must therefore be not only about water utilization, but also about respect for the nature, about how we appreciate the richness of our countless springs, and what care we take of this precious treasure we are lucky to own. We have deep-rooted traditions in water utilisation and water cleanness and ecosystems protection, but we are also aware of our drawbacks. That means that we take full responsibility for our flows, water areas and springs which, at the end, do not belong just to us, but form a part of the global natural assets.

I consider the Expo 2008 exhibition particularly as an honour to water in its different forms, appreciating the essential and invaluable meaning of this precious fluid to life in our planet. We are indeed one of the lucky countries in field area, and Expo 2008 is an excellent opportunity for us to present our homeland as an attractive and hospitable country full of thermal and mineral waters, many natural and artificial water areas, highland torrents and the European large stream with a unique water-work. The Slovaks are known for willing to share what they have, and for being able to take care of their guests. I believe that this national feature of ours will also be present in Zaragoza, and that it will convince many visitors to come to Slovakia, no matter whether they choose any of our better- or less-known spas, recreation and sports possibilities on lakes and wild-waters, fishing or a stay in the beautiful Slovak mountains which owe their unique character to water in the form of torrents, springs and crystal-clear mountain lakes.

I believe that the Expo 2008 World Exhibition will be a success for all the countries involved. The Slovak Republic endorses the exhibition's message to draw the public's attention to the wealth of water, to the precious properties of this fluid of vital importance and to its rational use to the benefit of the mankind. Moreover, progress and a sustainable development in this field is one of our key priorities. We are proud of our natural assets and our traditions in water source utilisation, we are proud of our ancestors and the experts of today who have been able to tame the water and use its properties. Thanks to them we have benefit from water and a high-quality environment. This is what the Slovak exposition at the world exhibition is about. I wish it success and a well-deserved interest by the visitors. I am convinced that Expo 2008 will bring positive results to us and that it will present us as a highly-developed country that respects the wealth of water and is able to use it and protect it.

**OFFICE OF THE PRESIDENT OF

Ivan GAŠPAROVIČ
President of the Slovak Republic

Dear readers,

It gives me true pleasure to again address the readers and users of the directory of businesses operating in Slovakia. I am particularly pleased because I can take this opportunity to look back and evaluate yet another successful year of Slovak foreign policy on global and regional scale.

In the area of foreign policy, Slovakia was active as a member of the UN, EU, NATO and V4, and continued to intensify cooperation with its neighbours, as well as other countries, notably those of Eastern Europe and the Western Balkans. In the course of 2007, especially in its capacity as chair of the Council of Europe's committee of ministers, Slovakia placed specific emphasis on the respect for human and civil rights across the world and on participation in international development aid.

The United Nations constituted the most prominent forum for the realisation of Slovakia's responsibility as an active member of the international community, as well as its foreign policy objectives. In the past two years, as a member of the UN Security Council Slovakia has been in a unique position to directly influence security situation in various parts of the world. The core objective of Slovakia's foreign policy ambitions within the UN has been to strengthen both the effective multilateralism and the role of the UN in setting standards in the domain of international law. The climax of our UN activities came in February 2007 when Slovakia took up the presidency of the Security Council during which we focused particularly on two exceptionally important areas: the security sector reform and the non-proliferation of weapons of mass destruction. Slovakia has proven its skill as an efficient communicator who can clear a path forward and facilitate dialogue between different parties, a skill of true value in the world of fragmented interests. Our contribution has been appreciated not only by our partners on the UN Security Council, but also by the international community at large. Our ability to take on and bear a deal of responsibility for peace and security in the world has, amongst other things, elevated Slovakia's profile on the international scene.

Good neighbourly relations have always been a natural part of our foreign policy priorities. This priority is determined by its interests and objectives as an EU and NATO member, as well as by historic, economic and cultural links of the past, presence and future. On taking up the rotating chairmanship of the V4 in the course of 2007, Slovakia contributed towards fostering the credibility of this regional group-

ing within the EU, developing internal mechanisms designed to identify and coordinate joint positions in matters of common interest, and raising the general awareness of the V4.

Within the framework of the EU common agenda, our endeavours focused on the completion of preparations for the adoption of the Reform Treaty, a process where our constructive positions and approaches contributed towards attaining consensus. The more particular 'Slovak' interests found their reflection in consistent and successful endeavours aimed at breaking down the remaining barriers in the markets of labour and services of certain Member States, the inclusion of Slovakia into the Schengen area, compliance with the criteria for accession to the Eurozone, or activities geared towards gaining the right, for the first time in Slovak history, to host the seat of an EU institution – the European Nuclear Forum.

The close of the past year was truly celebratory: Slovakia, along with other countries, became a part of the Schengen area. The entry to Schengen, which consummates our full-fledged EU membership, has a tremendous practical and political meaning for Slovakia.

The ability of Slovakia to mobilise its potential for the sake of furthering its priority interests fills me with optimism also in connection with our prospects for accession to the Eurozone. I am confident that, during 2008, Slovakia will convince the competent EU institutions – with the help of Slovak diplomacy – of its preparedness to join the Eurozone and for the country to be able to convert to the common European currency on the 1st of January 2009.

Slovakia is placing particular emphasis on the economic aspect and effect of its foreign policy activities, fully in line with the priorities of the Slovak government and in accord with the prevailing international trends under which the economic dimension of multilateral and bilateral cooperation has taken on a much greater significance than ever before. The economic dimension of Slovak foreign policy and diplomatic service has found its reflection in the furthering of the country's economic interests through the support of pro-export activities of our businesses abroad, and the inflow of foreign investments to Slovakia.

During 2007, Slovakia also remained active in the provision of development aid to a group of selected countries. This aid took the form of financial support to various sectoral projects, the provision of experts in various fields, and

the sharing of experience in different walks of life, e.g. transition of society, political system and economy. Within the framework of bilateral aid, 129 development projects worth SKK 790 million were completed by the end of 2007. The aggregate amount of the Slovak funding towards official development aid in 2007 reached SKK 1.5 billion, which represents 0.09% of the country's GDP. Apart from serving its primary purpose, i.e. to support the intended beneficiaries abroad, development aid has also reinforced our links with partner countries and opened doors for the establishment of Slovak business overseas.

I would like to emphasise that the activities pursued by Slovakia in the broadest international context during 2007 were determined, above and beyond all, by the value system

which we avow and which links us to the community of states that uphold the same values, the EU and NATO in particular. Our activities within these two groupings have been characterised by a partner dialogue, by an effort to find solutions to issues of common interest, and by the predictability of positions which a standard member of these Euro-Atlantic structures is expected to display. No less visible has been our effort to take more assertive stances in defending our national interests and finding common grounds with the collective interest. I conclude with satisfaction that Slovakia has built upon and improved its image of a country offering favourable conditions for business and investment, a country of rich cultural potential, and a country open to the progressive global trends, i. a. in the fields of environmental protection and tourism.

Ján KUBIŠ

Dear readers,

The priority of the Slovak government is to continue to attain high and sustainable rates of economic growth, which is a basic requirement for the continued growth in living standards, and for reaching the level of the developed Member States of the EU. Our intention is to support a rapid, qualitative alignment, so that Slovakia can achieve full membership in the Eurozone on the first of January, 2009.

The main goal of Slovakia's economic strategy, in the fiscal policy area, is clear: to ensure the long term sustainability of public finance by the year 2010, and to continue to create conditions that support growth in employment, and enable citizens to obtain quality, and adequately remunerated work. The creation of new jobs obliges us to concentrate on the improvement of the business environment. But paying attention to the quality of the jobs thus created is equally important.

In its Manifesto, the Slovak government identified the improvement of the business environment as one of its development priorities. It is an environment within which the state supports and protects competition, creates clear and stable rules, effectively ensures compliance with those rules by all market participants and, at the same time, minimises the administrative obstacles and requirements facing business-people.

The increasing share of foreign direct investment is one indirect indicator of the improving business environment. The Slovak Republic continues to have a number of comparative economic advantages, compared to other countries. These include low labour costs, although there are some negative aspects associated with this. Other comparative advantages include the availability of highly qualified workers, and Slovakia's strategic location. The satisfaction of already established foreign investors is also important, as are Slovakia's integration into the global economy, EU membership, high rate of economic growth, low price level, stable rate of inflation, tax system, competitive system of investment incentives, and the growing number of industrial parks with good infrastructure.

Central government continues to be focused on legislative measures that should reduce administrative requirements for starting a business. Registration in the Commercial Register has been simplified, and we have been able to shorten the time taken to register as a payer of VAT and income tax. There have also been changes in the area of property registra-

tion. We are working intensively to improve conditions for stimulating investment, while respecting continuity as regards existing rules on provision of individual state aid. The emphasis will be on investment projects corresponding to the knowledge economy, and projects with a higher added value. This involves support for both foreign and domestic investment. The main target group should be already-established investors, according to their possibilities and probability of expansion, as well as their strategic subcontractors and new transnational corporations. These most often expand, or consider relocation of production offering higher added value (green field or brown field investments). However, we must never lose sight of the structure, the needs and the potential of Slovakia and its economy.

Under applicable laws, state aid may currently be awarded primarily in the form of tax relief, grants for newly-created jobs and training, subsidies for tangible and intangible assets acquisition. Also legitimate are subsidies to municipalities for the construction of industrial parks, and better conditions for importing state-of-the-art technology. Provision of state aid is subject to an approval process, which leads to a government decision on the provision of state aid.

The Ministry of Economy has prepared a new law on investment aid, with the goal of improving the effectiveness of incentives, and speeding up the administrative process. The basic goal of this law is to encourage the flow of investment to economically backward regions, and to projects with a higher value added. One important principle is to provide investment support to projects that would not otherwise be implemented. We want to ensure full continuity with the support to investment in the period until 2006, while applying the new conditions and criteria for provision of state aid set by the European Commission for the period 2007-2013.

It is in the interest of Slovakia, and of further economic growth, to support services with a high value added and establish IT development and software centres. Such projects could have a significant positive impact on the growth of high-tech sectors in which network effects occur, situations where the productivity of a given enterprise is enhanced by the proximity of other enterprises, universities, research institutes, etc. Conversely, the presence of the given enterprise also enhances the productivity of other companies. We will

therefore support sectors that have high technological and innovation potential, such as IT, nanotechnology and biotechnology, as well as centres for strategic or customer services or technical support, which will ensure improvements in existing products, processes and services.

Slovakia's long term prosperity depends on our engagement in international economic cooperation. Slovakia belongs to the group of strongly open economies, which are necessarily dependent on foreign trade and on the development of further economic cooperation. The Slovak government is well aware of this, and in its Manifesto it committed itself to a significant strengthening and greater effectiveness of the economic dimension of Slovak foreign policy, so as to take a greater place in world markets and to increase the competitiveness of the Slovak economy.

On joining the EU, the Slovak Republic committed itself to carrying out the common commercial policy, which is based on common principles, particularly regarding any measures that might be taken to alter customs tariffs or make customs or trade agreements, the simplification of liberalisation measures, export policies, and trade protection measures, such as anti-dumping measures or subsidies. While implementing the common EU commercial policy, the Slovak Republic promotes its own interests and priorities, in harmony with the needs of the business sector. At the international level, we can take advantage of the European Union's negotiating strength. The common commercial policy is therefore of central importance in promoting the foreign trade policy objectives of the Slovak

Republic, not just at the multilateral level, but also regarding bilateral commercial relations.

Export has a central, stabilising effect in the Slovak economy. It affects the growth in economic productivity. The deployment of new production capacity in the car-making, electrical and engineering sectors improves Slovakia's foreign trade results and reduces the trade deficit. In the first eleven months of 2007, according to preliminary estimates of the Slovak Statistical Office, total exports of goods rose by 15.3% compared to the same period in 2006, reaching SKK 1 307.1 billion (EUR 38.7 billion) while total imports rose by 10.1 % to SKK 1 318.4 billion (EUR 39.0 billion). The foreign trade balance was negative, with a deficit of SKK 11.4 billion, but this is SKK 52.9 billion less than in the same period of 2006. It was foreign trade that played such an important role in ensuring Slovak compliance with the Maastricht criteria for admission to the Eurozone.

Given the high degree of openness of the Slovak economy, foreign trade will continue to play a key role in future economic development. Support of export in all its dimensions, including commercial diplomacy, is therefore one of our highest priorities. Even in this era of expanding use of IT and electronic communications, personal contacts and business negotiations still play an important role in the development of trade. International trade fairs and exhibitions are one such opportunity for communication. Exhibitors and visitors can observe the latest technological developments, but above all they have the opportunity to present their productive capabilities, by all available means.

Lubomír Jahnátek
Minister of Economy of the Slovak Republic

MINISTRY OF ECONOMY

Mierová 19
827 15 Bratislava 212

fax: +421-2-4333 7827
<http://www.economy.gov.sk>

Dear exporter,

Export-Import bank of the Slovak Republic is a specialized financial institution merging banking and insurance activities with the objective to support Slovak export. Export-Import Bank of the Slovak Republic is a legal entity registered in the Commercial Register having its registered office in Bratislava and uses the abbreviated business name EXIMBANKA SR. EXIMBANKA SR is a specialized state institution established on 22 July 1997 under Act No. 80/1997 Coll. on Export-Import Bank of the Slovak Republic.

EXIMBANKA SR provides state support of export by financing and insuring export credits. Thereby it supplements the services that provided by commercial banks to the exporters. The financing of export and financial operations supporting the export require long-term maturity of financial resources. EXIMBANKA SR can provide exporters with long-term financial resources at interest rates allowing the exporters to be competitive on the international market. Thus enables them to compete with other exporters in conditions that are comparable to advanced market countries. There are just several countries not having similar financial institutions supporting the export by means of financial instruments.

In its activities, EXIMBANKA SR fully respects the recommendations of the Organization for Economic Co-operation and Development (OECD) and the World Trade Organization. EXIMBANKA SR accepts so-called Consensus - Arrangement on Guidelines for Officially Supported Export Credits. The Act on EXIMBANKA SR is in accordance with the European Union directives that govern the area of supported export.

EXIMBANKA SR supports Slovak exporters having their registered offices in or being resident in the Slovak Republic and producing and/

or exporting products and services of predominantly Slovak origin under contractually agreed conditions.

EXIMBANKA SR offers a wide portfolio of products in two main areas; in financing and in insurance of export loans.

The banking products offer an easier access to financing by the means of loans acquired from commercial banks. Banking products are designated for large corporations as well as for small and medium enterprises.

The insurance products of EXIMBANKA SR allow to eliminate the risks (commercial, political or combined) contingent upon the foreign debtor's failure to pay, where withholding a payment or insolvency on the side of a foreign buyer are the most frequent causes of outstanding debts. Insurance of an exporter's short-term export related credits originated in Slovak Republic against commercial risk is a new product in the insurance portfolio.

EXIMBANKA SR can also insure those risks which will not be insured by any other commercial insurance company. Even though it is not possible to reinsure these risks on the international reinsurance market and the accepted risk is not marketable on the commercial market we can help you secure that type of risk. In terms of Act No. 80/1997, Coll. on the Export-Import Bank of the Slovak Republic as later amended; EXIMBANKA SR can insure non-marketable risk because the State guarantees the obligations of EXIMBANKA SR incurred by insurance of export credits.

I have every confidence we can help you do your export business more successfully and safely EXIMBANKA SR will be your solid partner in your export activities.

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

Bratislava: European City of the Future

Slovakia's capital city Bratislava has always been slightly distinct from the rest of the country. This is probably also due in part to its asymmetric position in the south-west corner of the country. It is therefore only natural that following 1989, and with the entry of Slovakia to the European Union, Bratislava is now a city with the best prospects to fast become a modern European metropolis with a high quality of life.

Today Bratislava has a stable place on the map of global real estate players. While just a few years ago the mention of it would just raise the scrutinising eyebrow of experts, nowadays Bratislava is one of the most sought after investment localities in Europe. Commercial properties in the city on the Danube are now owned by big names like Heitman, Rodamco Europe, Hannover Leasing or Axa. In Bratislava, one can find world renowned developers like Ballymore Properties or ORCO which are accompanied also by strong Slovak players. Prestigious consulting companies also have branches here, like CB Richard Ellis, Colliers International and King Sturge.

Special importance in the urban concept of Bratislava is associated with the embankments on both sides of the River Danube, the historical city centre, together with other protected heritage sites. A specific position is held by the dockland area. The hub of the new plans is the area on the south bank of the Danube between The Old Bridge and The Harbour Bridge. Bratislava will also develop outwards to the southwest in the direction of the Austrian border, this having been prevented until 1989 by the iron curtain of the totalitarian regime.

The city centre also expects to trans-

form, as it becomes broader, more attractive and livelier. Probably most importantly, former factory sites will vanish from the centre, being replaced by modern architecture and adopting a multipurpose role. Emphasis will be put on the construction of mixed-use buildings with quality housing, premium office space, shops and leisure areas with parks, playgrounds and sports facilities. The city centre will start to spread out toward the river; several kilometres of modern attractive boulevard will run along both banks of the river Danube. The areas around the central bus and train stations will be transformed. By 2010 the north and south of the city on either bank of the River Danube will be linked up by a modern high-speed tramway. In the coming years the city plans to invest millions and millions of euro, primarily into the revitalisation of transport infrastructure.

The economic reforms of the Slovak government from the 2002-2006 period led to impressive economic growth, which last year came to over 8% on average. The construction sector reflects the excellent condition of the Slovak economy, and so the whole country is experiencing a further construction boom. The heart of construction work and real estate development is the capital Bratislava, which is undergoing unparalleled development.

What is among the city advantages? Above all, it is available space. Bratislava is probably the last major European city where there is still an abundance of potential construction sites available. Fantastic locations that until recently were not utilised, are about to transform into new city quarters, giving the Slovak capital a new look. The new Land Use Plan

of the city, which has been approved last May, identifies a total of 4,000 hectares of additional development land earmarked for the construction of flats, shops, offices and related infrastructure. This is the key competitive advantage of Bratislava in enticing foreign investors here, which only a few other European cities can offer.

Being an integral part of the projects such as CENTROPE (Central European Region) and TWIN CITY (with the City of Vienna), Bratislava has every chance of developing into a dynamic economic region in the heart of „New Europe“. The excellent geographic location combined with its positive demographic vitality make the Slovak capital a unique place for the development of economic activity of every kind. It is hardly by chance that in 2006 Bratislava found itself on the shortlist of European Property Awards for the first time in the coveted category of “European City of the Future”. ■ ■ ■

Bratislava is experiencing a long overdue boom in real estate development, with international developers and local financial groups announcing big plans to transform the city's appearance. More than one billion euros in investments are planned in one of the European cities of the future*.

Find out more about this new hot spot of Central Europe and one of the fast growing business regions.

BRATISLAVA

WELCOME TO BRATISLAVA REGION

Cross-regional Transport routes:

Bratislava Self-governing Region spreads at the edge of Small Carpathian Mountains and fertile lowlands (Podunajska and Zahorska lowlands). It is located on the historical "Amber Route" connecting the Baltic and Balkans and on the second largest European river, the Danube River.

Borders:

The region borders with the Trnava Self-governing Region on the North and East, with Hungary on the South and with Austria on the West. The border with Austria follows the Morava River and 37 km of this border is formed by the second largest European river, the Danube River. The Czech Republic border is in the vicinity of the Bratislava Self-governing Region border. The Capital of the Slovak Republic – Bratislava, is also the capital of the Bratislava Self-governing Region, pursuing its important political, economic and social functions.

Location:

Bratislava Self-governing Region is located in the West and Southwest part of the Slovak Republic, covering the area of 2 053 km². By its area, it is the smallest self-governing region of the Slovak Republic.

Residential structure:

The Capital of the Slovak Republic, the heart of region and its largest city – Bratislava (population 425 thousand people) is located 60 km from Vienna and 200 km from Budapest. The city is surrounded by a circle of regional centres with population ranging from 8 to 22 thousand people (the respective city of Malacky, Stupava, Svätý Jur, Pezinok, Modra, Senec). There are 66 villages within the territorial and residential structure of the Bratislava Self-governing Region, as well.

Tourism:

Due to its favourable geographic location, tourism is an important part of Bratislava Self-governing Region economy. A relatively small area with attractive landscape, diversity of nature and developed infrastructure offers a wide range of tourism possibilities. The city of Bratislava is one of the most important spots and locations for tourists coming to Bratislava Self-governing Region, being a natural and highly dominant regional centre of tourism with European importance, offering history, culture and traditions connected with gastronomy, shopping and congress tourism. The Danube area is rich on water bodies and offers ideal possibilities for summer tourism, water trips and fishing. Záhorie area offers natural beauties,

historic monuments as well as water and recreational sports. The Small Carpathian area is an important wine-growing and wine-making area in Slovakia, which offers cultural heritage and folkloristic traditions.

average salary amounts 24 860 SKK, being thus 132,5 % of the average salary in Slovakia.

Industry:

Industry in the Bratislava Self-governing Region covers all sectors based on the traditional industrial production of goods. The main industrial sectors include chemical industry, automotive industry, machinery, electro-technical and food industry. Lately, the region is growing to a European centre of automotive industry, generating 30% of Slovak exports. As a part of the ongoing regional structural changes in the economy, the importance of tertiary sector is growing, mainly the trade and services, banking and insurance. Bratislava region records the lowest unemployment rate, comparing to other regions of Slovakia. The average salary in Slovakia amounts 18 761 SKK, in Bratislava Self-governing Region the

Future Development

According to the plans, the population is expected to grow by 150 000 within the next 30 years. The end of Schengen border will bring free cross border development in housing, employment, economic and free-time activities within the CENTROPE region (Vienna, Brno, Bratislava, Gyor)

Bratislava region

The share of population involved in business activities (legal entities and individuals) per 1.000 people is high over the Slovak average. Restructuring of large companies and the released free workforce resulted in increasing share of self-employed people. The share of self-employed people per 1 000 people varies from 55 (in Malacky district) to

110 (in Bratislava I district). These trends are supported also by statistical parameter characterising the number of self-employed people on the total number of employees, where all districts of Bratislava Self-governing Region (excluding Bratislava I district) exceed the Slovak average.

The Prešov Region

Basic Information:

Area: 8,981 km²

Capital city: PREŠOV

Population of the region:
800 483 inhabitants

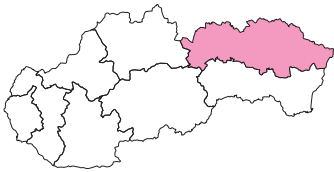

GDP per capita: 31.6% EU25
(2003)

Employment by sector:

Services: 59.0%

Industry: 35.8%

Agriculture: 5.2%

Description:

The Prešov Region is situated in the north-east of Slovakia and borders Poland and Ukraine. With almost 800,000 inhabitants the region is the most populous of all Slovak regions. Administratively, the region is divided into 13 districts and 666 municipalities including 23 towns. The city of Prešov is a regional

capital, the third largest city in Slovakia. The first written record of the city is from 1247, which became a free royal city in 1374. The city of Prešov encompasses a number of historically valuable monuments, theatres, galleries, museums, centres of Ruthenian and Ukraine culture, as well as the Prešov University, observatory, and planetarium.

A mountain and sub-mountain landscape is an essential attribute of the Prešov Region. The territory covers the High Tatras – the highest mountain range of Slovakia. The High Tatra Mountains (Vysoké Tatry) are the most northern and

the highest part of 1200 km long Carpathian bow with the highest peak Gerlachovský štít (2655 m). The High Tatra Mountains embrace long still valleys, emerald mountain lakes, roaring waterfalls, mountain torrents, high mountain flora and fauna. Hence, resorts below the Tatras are of sport, spa,

and recreational character. The region is also rich in mineral and thermal waters used in spa and health resorts like the AquaCity Poprad, the Bardejov Spa, and Vyšné Ružbachy. Furthermore, the following national parks belong to the region's highlights: the Tatra National Park, the Pieniny National Park, and Poloniny National Park.

The Prešov Region comprises historically formed regions of Šariš, Upper Zemplín, and Upper and

Central Spiš. Moreover, a number of region's historical and cultural landmarks are on the UNESCO World Heritage List. The most important sights include the city of Bardejov, the city of Levoča, the Kežmarok Castle, the Stará Ľubovňa Castle, Spišská Kapitula, and 27 ancient wooden churches. Interestingly, the city of Medzilaborce is becoming a place of pilgrimage

for Andy Warhol fans in search of the artist's Eastern European roots. Indeed, the Warhol Family Museum of Modern Art in Medzilaborce is dedicated to Warhol, his family, and his most famous works.

Diversified economy,

preserved natural, cultural, and historical heritage.

For this reason, the improvement of the region's accessibility is the highest priority. The Poprad-Tatry Airport is the only international airport in the Prešov Region, where

The region can be accessed via the Košice Airport too. Furthermore, the motorway between the cities of Prešov and Košice runs through the region. The extension of the D1 motorway from the west part is further developed toward the East and includes the new tunnel Branisko. The road system of the 1st and the 2nd class roads belong to the European roads network. Most notable is the E50 that runs from West to East and connects Poprad and Košice on the way to the Ukraine. The E68, another notable road, runs in a North-South direction from the border of Poland to the Hungarian border via Stará Ľubovňa, Prešov, and Košice. Railway network of the

Prešov Region consists of 345 km of tracks and 41 km of the Tatras electric tracks.

Progress of the region is also supported by cross-border cooperation with regions in Poland and Ukraine, and partnership with regions in the Czech Republic, Italy, France, Norway, and Russia.

Priorities 2007-13 – More competitive and attractive region

- Improvement of infrastructure and accessibility
- Support of education and adaptability to the labour market
- Development of tourism infrastructure and services
- Support for SMEs, innovation and research

the region achieved 25% ownership. The international routes cover London and Prague, which will be soon joined by further direct flights abroad. The Poprad-Tatry Airport is only 5 kilometres from the Poprad City and 2 kilometres from the E50 motorway.

industrial parks, qualified labour force, and average wage 12 535 SKK = 330 EUR gradually attract new investments into the Prešov Region. Indeed, an advantage of the region is its diversified industry. In fact, food and timber processing, textile and chemical manufacturing, machine and electrical engineering are prevailing industries. Importantly, tourism is a growing industry in the region benefiting from

- Development of renewable energy resources
- Enhancement of cross-border and interregional cooperation

TRENČÍN REGION

Trenčín Region is situated in the North-Western part of the Slovak Republic and borders with the Czech Republic.

Trenčín Region is located on the main development axis. Transport and technical infrastructure corridors of multi-regional importance are passing through region called Považie.

Regional Seat: Trenčín

President: Pavol Sedláček

Number of districts and their administrative centres: 9

Bánovce nad Bebravou, Ilava, Myjava, Nové Mesto nad Váhom, Partizánske, Považská Bystrica, Prievidza, Púchov, Trenčín

Population density: 133.2 inhabitants per km²

Population: 599,847 inhabitants

Total Area: 4,501 km²

Number of towns: 18

Number of villages: 276

Why should you invest in the Trenčín Region?

- Advantageous location in the centre of Europe
- Qualified and adaptable workforce
- Low labour cost
- Good quality business environment in Slovakia
- Pleasant living and working environment
- Possibility to invest in “green field” and “brown” industrial parks
- Level of education
- Connection between history and present in regional research centers
- Benefits from state and local investment support

Tourism

Plentiful thermal water in the **Trenčianske Teplice spa** has a beneficial effect especially for motion apparatus diseases and a treatment of neurotic problems. Sulphuric warm springs are used directly, with no modification for a balneotherapy. **Bojnice spa** is known for post-injury and post-surgery treatment and for neurotic problems. Modern therapeutical procedures are the novelty. A healing water from **Nimnica spa** is used for a drinking and inhalation procedures for air passages diseases treatment, metabolism treatment, digestive system diseases treatment as well as for some gynecological and cancer diseases treatment.

Spa industry has a wide representation in Trenčín Region. The mineral thermal water richness has caused a huge spa industry expansion over the years and it contributes to a further development and attractiveness of the Trenčín Region today.

In Trenčianske Teplice, there you can also visit a **Bridge of Fame** where plates with the names of famous actors who visit an international film festival **Art film** are added annually.

Reflection of a **unique historical and cultural heritage** are well-preserved majestic structures at the historical locations, old churches or mansions. Trenčín is called a pearl of Považie and it often gets a name of "the town of Váh and Tatras master" Matúš Čák Trenčiansky. The biggest pride of Trenčín is **Trenčín castle** connected with many legends. A famous **Latin inscription** in a castle rock from the year 179 AD about the II. Roman legion from Laugaritio victory is a significant attraction (the inscription in the rock can be seen from behind a glass wall inside the hotel Tatra).

The most frequently visited Slovak castle is **Bojnice castle**. About 240 thousands visitors pass the gates of this national historical landmark every year. Bojnice castle is a popular place for wedding ceremonies as well as tourist attractions. The most popular include an international festival of ghosts and spirits, St. Valentine's weekend, knights' days or the most beautiful Slovak fairy tales days.

Other interesting castles and chateaus are **Beckov castle, Čachtický castle, and Tematín castle**.

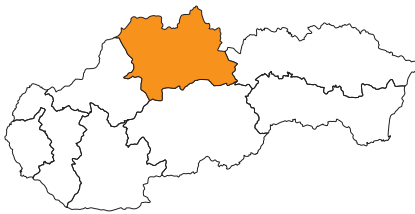

WELCOME TO ŽILINA SELF GOVERNING REGION

10 reasons why to invest in Žilina region

- Central European hub
- Political and economic stability
- 19% flat tax rate
- Availability of highly skilled workforce
- Low labour costs vs. high labour productivity
- Liberal Labour Code
- Large selection of industrial land and offices available for purchase/lease
- Strong engineering tradition
- The highest economic growth in the region
- Infrastructure growing steadily

The Žilina region is not about jaw-dropping sights and superlatives; it's

Area: 6788 sq km
Population: 694 129 inhabitants
President: Ing. Juraj Blanár

Location:

The Žilina region is one of the eight Slovak administrative regions. It is located in the northern part of Slovakia along the river Váh. It consists of 11 districts. The metropolis is the city of Žilina. The Žilina region involves 5 historical subregions: Horné Považie, Kysuce, Orava, Liptov and Turiec.

Economy:

The region is enjoying sustained economic growth. Many European and global companies have found Žilina region to be a home for highly profitable enterprises with a long-term prospect for continued growth. The economy is considered as one of the fastest growing market economies in Central Europe.

In the near future (by 2009) Slovakia plans to join the economic and monetary union and the Shengen area (by december 2007).

in Rajecká Lesná is 8,5 m long, 2,5 m wide and 3 m high

The Žilina region embraces you with much hospitality. We offer you tasty food, lovely scenery, rich cultural traditions and authentic folklore. The saying "Better

- The largest wooden church in Europe located in Svätý Kríž village
- The masterpiece wooden Bethlehem

about experiencing a place less touched by the glitz and glam of its more famous neighbours. The region woven by numerous stories and legends. Outside the cities you can still find traditional villages, folk traditions and tourist trails meandering through the hilly countryside.

one to see that a hundred times to hear" invites you to visit Žilina region – jewel of Slovakia.

Superlatives of Žilina region

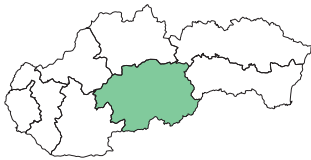

- Numerous thermal springs and mineral waters
- Best conditions for Spa & Wellness tourism and winter tourism
- More than 50% of the land covers forest. You can enjoy the natural settings in 4 national parks and 3 protected land areas
- The tinkers' tradition and tinkers' trade in the past.
- Unique historical forest steam train of the World importance
- UNESCO sight - village of Vlkolínec

WELCOME TO THE BANSKA BYSTRICA AUTONOMOUS REGION THE GREEN HEART OF SLOVAKIA WITH HISTORY AROUND YOU AT EVERY STEP

Total Area: 9 455 km²
Population: 658 386
Regional capital: Banská Bystrica

Banská Bystrica Region is one of the largest self-governing regions in Slovakia. It is located in the southern part of NUTS II - Central Slovakia. As regards the qualities of the regional and natural environment, it belongs to the most important regions in Slovakia, natural protected area is the largest in Slovakia.

of this region takes the form of over 1700 national cultural monuments, unique medieval history in central Europe dating back to 13th century, spas with thermal and healing springs

The national parks: Low Tatras, Slovenský Raj, Muránska Planina and Veľká Fatra,

The natural protected area: Stiavnické Vrchy, Cerová Vrchovina and Polana, our highest volcanic mountain ridge, since 1990, the territory has been declared biospheric reservation under the UNESCO-Program "Man and Biosphere").

Why is Banská Bystrica region an ideal location for business

Domestic and foreign entrepreneurs can appreciate skilled labour force, good availability of basic funds, abundance of free for construction of industrial park zones, rich sources of raw materials, high

forest percentage, industrial traditions, infrastructure growing steadily and tax rate is 19% flat

Privilege of the region of Banská Bystrica is its advantageous geographical position, directly in the heart of Slovakia, built up transport infrastructure, international road, an important junction connecting the west and east of Slovakia and north-south transit route from Poland to Hungary, railway net and international airport Sliač.

Road transport The total length of roads is 3 159 km.

The Košice Region

The **Košice Region** (<http://kosice.regionet.sk/kskweb/english>) is an administrative unit which includes four historical regions – Abov, Spiš,

Zemplín and Gemer. Each historical region is rich in traditions and customs which are further enhanced by the hospitality of the locals of each region. The Košice Region possesses some of the most fascinating sites in Slovakia that no visitor should miss.

Area: 6,752 square kilometers
Population: 769,969
Number of towns: 17
Number of municipalities: 440

Košice, the second largest city in Slovakia and a heart of Abov region (www.kosice.sk), is the most important banking, economic and educational center outside the Slovak capital of Bratislava. The close proximity to the Polish, Hungarian, and Ukrainian borders and the international airport in

Košice facilitate the international focus of the entire region. Due to its status as an eastern Slovakian metropolis of culture and arts, the city of Košice is also applying for the 2013 European Capital of Culture (www.kosice13.sk).

Two major protected areas are situated within the Kosice region. **National Park Slovenský raj** (Slovak Paradise: www.slovenskyraj.sk) covers the southern and south-eastern part of Spiš region. Visitors can admire a variety of deep canyons, waterfalls, and other geographical formations.

National Park **Slovenský kras** (Slovak Karst: <http://www.gemer.sk/ciele/skras/skras.html>) lies in the southern and south-eastern part of the Gemer region. Slovak Karst has been listed in the worldwide network of the **UNESCO** Biosphere Reserves. Several unique caves, such as

Domica, Ochtinska, Jasovska, are also open to tourists and provide extraordinary underground scenes and experiences (<http://whc.unesco.org>).

The cultural and historic monuments of Gemer and Spiš are scattered along the Gemer and Spiš branch of the **Gothic Route** (www.gothicroute.sk). This region is home to mountainside castles (Spišský hrad, Krásna Hôrka), well preserved historical town squares (Spišská Nová Ves, Rožňava), and several museums and cathedrals (Spišská Kapitula, Betliar). Other historical gems of the areas include village churches (Žehra, Štítnik), craftsman houses as well as romantic stone bridges (Gelnica, Spišské Vlaky, Markušovce, and Rožňava).

The historic Zemplín region (<http://krajzemplin.szm.sk/indexenglish.htm>), in the eastern part of the Košice area, is known for the excellent **Tokay wine** (<http://www.slovakia.travel/entitaview.aspx?idp=6890&l=2>). One of the most visited parts of Zemplín is the water reservoir of **Zemplínska Šírava** ([http://](http://www.michalovce.sk/english.htm)

www.michalovce.sk/english.htm).

Visitors should also take the opportunity to visit the two **wooden treasures**: The Tserkva of Archangel Michael in the village of Inovce and The Tserkva of St. Nicholas in the village of Ruska Bystrá

both built in the beginning of the 18th century (www.muzeum.sk).

The Zemplín region is also home to a unique **guitar museum**. There are only two such museums in the world – one in Nashville in the U.S. and the second in the small town of Sobrance with a collection of more than 200 guitars from 1947 to 1980 (<http://www.slovakspectator.sk/clanok-10662.html>).

WATERS IN THE TRNAVA SELF-GOVERNING REGION (TSGR)

The Self-Governing Region of Trnava is situated in the Western part of Slovakia. The region has borders with the Czech Republic, Hungary and Austria. As for its administra-

tive structure, the region is divided into seven districts: Dunajská Streda, Galanta, Hlohovec, Piešťany, Senica, Skalica and Trnava.

With its surface of 4,148 km² (8.5 per cent of Slovakia's territory) it is the second smallest region in the Slovak Republic. In 2006, the number of inhabitants in the Trnava Self-Governing Region reached 555,075 (10.3 per cent of the total number of Slovakia's inhabitants). The region is made up of 251 municipalities, 16 of which have the status of a town.

Most important watercourses at the territory of SGRT:

Danube, Morava, Váh, Small Danube, Čierna voda, Dudváh, Myjava and Teplica.

The Danube River and Morava are bordering watercourses.

The watercourses at the territory of the Self-Governing Region of Trnava are used for sailing, energy and recreation purposes and serve also as a water source for industry and agriculture.

Most important water dams and water reservoirs:

Gabčíkovo, Sĺňava, Kráľová

Most important drinking water sources:

Protected water management area Žitný ostrov
From the point of view of water management, Žitný ostrov is the largest high-quality drinking water reservoir in the Slovak Republic.

Natural healing spas:

Piešťany, Smrdáky, Šamorín-Čilistov, Lehnice

Geothermal springs:

Used mostly for recreation purposes – bathing pools in Dunajská Streda, Sládkovičovo-Vincov les, Veľký Meder, Horné Saliby, Gabčíkovo, Galanta and Piešťany.

City of Banská Bystrica

Basic information
geographical division
elevation

– 362 m above sea level
area of town – 103, 37 km²
the number of inhabitants
– aprox. 80 000
population density - 786

situated at the river Hron in the Zvolenská Lowland, close to the Kremnické Vrchy (Kremnické Mountains), Veľká Fatra (Big Fatra) and the Nízke Tatry (Low Tatras).

Knowing about history and the present of Banská Bystrica and its environs gives the visitors a lot of experience.

The favourable location of the town on the crossroads of the trade routes influenced its significance in the past, however also the present of the town has not reduced it.

History of Banská Bystrica and its environs has been branded primarily by mining copper and silver. Banská Bystrica was granted the comprehensive town privileges by Belo IV. In 1255.

In the 15th

(which belonged to the most popular business companies in Europe and was without a rival on the Hungarian territory) developed mining and metallurgical business to a large size. Copper from Banská Bystrica was in great demand and found even foreign markets (Germany, Poland, Italy and the Netherlands).

During the World War II Banská Bystrica and surrounding villages became a centre of antifascistic insurrection and on 29 August 1944 the Slovak National Uprising started here. Last year we celebrated 60th anniversary of this important point in the Slovak history.

Banská Bystrica has become cultural and administrative centre of Central Slovakia with a lot of educational, cultural, bank and other institutions.

It is the seat of District Office, Regional Office, Banská Bystrica Self-governing Region Office, Slovak Post, Patent Office, Building Office, Forests of the Slovak Republic, Central Tax Directorate, Presidential Office and so on. It is a seat of Matej Bel University and

are worth to be mentioned.

Textile, pharmaceutical, wood-processing, electro-technical industry have found their background in Banská Bystrica or its surroundings.

Due to extensive reconstruction of the historical heart of the town that is declared an urban conservation area the town is rightfully considered one of the most beautiful in Slovakia.

Surrounding villages and countryside offer occasions and possibilities for tourist industry development (for example ski, spa, hiking, tracking, cycling opportunities).

There are 80 000 inhabitants living in Banská Bystrica + cca 20 000 students and working people employed in Banská Bystrica coming from surrounding villages and small towns.

The Neogothic manor - house

TOWN HLOHOVEC

Hlohovec is economic, cultural and administrative centre of the region. It is

situated in Western Slovakia, is a part of Trnava Self-Governing Region. Its distance from the capital city of the Slovak Republic Bratislava is 60 km. With its 23,000 of inhabitants, it is 31st largest town in Slovakia.

The area of the town was already inhabited in the earlier Stone Age, more significantly in the Bronze Age, and there

Forgáchs and the last owners of the castle, the Erdődys, belonged to the most important families of Hlohovec.

The most significant architectural sights include a Renaissance-Baroque castle surrounded by a large castle park with French terraces, the Empire theatre built in 1802, the Church of St. Michael Archangel, the Chapel of St. Anna, the Church of St. Spirit from 14th century

FAURECIA s. r. o. producing automotive components, VETTER s. r. o. focused on packaging dried fruit, JMT SK s. r. o. that produces electro-technical components, and TRANSKAM-SLOVAKIA, spol. s r. o. have established themselves in a newly built industrial park.

Different cultural activities are developed in the town, the Museum of National History and Geography and the Observatory and Planetarium have a regional character. Beside pre-school

facilities and elementary schools, there are also three secondary schools and three apprentice schools.

The town develops peer activities with its twin Belgian town De Panne, the Czech town Hranice, and the Slovenian town Slovinské Konjice.

Slovak-Hungarian border with a population above 38 000.

History

The territory of the town has been inhabited since the Bronze Age. Because of its strategic importance, the area was settled by various tribes: Celts, Romans and Avars. According to the medieval chronicle Gesta Hungarorum a castle was built at the confluence of the Danube and Váh rivers. The first significant privileges were granted to the town by King Béla IV. in his charter in 1265. The town flourished especially during the reign of King Matthias Corvinus who had a renaissance palace built. During the Turkish invasion in the 16th century, under the reign of Ferdinand I, the medieval castle was rebuilt into a well-defensive fort called the Old Fortress. In the 17th century, during the reign of Leopold I., it was enlarged by the New Fortress. In 1745 Maria There-

During the Napoleonic wars the construction of the system of fortifications continued. Its building was interrupted by the Hungarian Revolution in 1848-49 when the town became the last bastion of the War of Independence. After finishing the huge system of fortification in the 1870s, which was able to house an army of 200 000 soldiers, the town became the strategic military base of the Austro-Hungarian Monarchy. At the end of the 19th and beginning

Košice: The second largest city in Slovakia

Košice belongs to the cities of rich and famous history. The first written reference about Košice dates back eight hundred years ago. Its rich history was to a great extent influenced by the fact that Košice in its past was an important crossroad of trade routes.

In 1290 the city gained various privileges and the

European cities throughout the medieval ages. In the 14th and 15th centuries Košice experienced a boom in craft and trade with metal, fur and other goods.

In 1657 the Košice University was founded which later in 1777 changed to a Royal Academy with a printing press center. In the 19th century several manufactures which

right to protect the city by fortified walls. In 1369, King Ludovicus the Great granted to Košice a coat of arms which is a modification of the royal symbol of the Anjou family. It is the oldest armorial warrant of the city in the whole Europe. In the mid 15th century the city obtained a privilege that raised its status to one of the leading cities in the Hungarian Empire.

With its economy and political influence the city belonged to the most significant

later turned to factories were established. In the second half of this century the city belonged to those that had most developed industry in Hungary. In the period between the wars the city changed to an industrial, garrison, and administrative center.

The powerful post-war development of the city was clearly activated in 1960's when a mammoth metallurgical complex of Eastern Slovakian Ironworks /nowadays US Steel Co./ was built.

It stimulated a massive migration to Košice from the whole of former Czechoslovakia.

As a result, the city expanded in the number of inhabitants as well as in its area.

Statistical information:

Population: 236 831

Average age: 36 years

Unemployment rate: 9,56 %

Districts: The city consists of 4 state districts and 22 municipalities /borougs/

The development projects:

A. Building the shopping – relax complex Aupark /Unibail Rodamco / HB Reavis Group/ - 32 000 m², 160 trade units, 1 200 parking places

B. Polyfunctional Centre Cassovar /Global Group/ - new lifestyle of modern companies connects the possibilities of work, housing and relax

C. Industrial Park IM-MORENT /Immorent Slovakia/ - the new industrial park with the area of 60 hectares – being prepared for investors in the field of logistics

D. Central Park /Letterstone Slovakia / Rabbit Engineering/ - the polyfunctional area for housing – 470 residential units with 34 000 m²

E. Railway place - /W – GO/ - reconstruction of railway station to the commercial centre

F. New City Centre – area for civic facilities - an idea of creating new city centre area approx. 140 000 m² with 50% city ownership of the property

The city will organize in 2011 the world championship in ice hockey and candidates for the title european capitol of culture in 2013.

the letters and literature are closely bound with this town and its surroundings. Nitra is now one of four Slovak cities, which fight for the title "European Capital of Culture 2013"

What to see:

Dominants in historical upper town:

Town of Nové Zámky

Location:
Nové Zámky is situated in Southwestern Slovakia. It

is located on the border of Danubian Lowlands in the height of 119 metres above the sea level. The town constitutes an important crossroad of South Slovakia.

One of the oldest buildings, from the 16th century, on the square is the Roman-Catholic parish church with its 70 meter high tower. Almost all centuries left their characteristic stylistic elements on this building – touches of Gothic, Renaissance, Baroque and late Baroque, and Classicistic styles are visible.

in winter, but the surface is open also during summer. The stadium is inviting not only the local visitors and sport teams, but also the international ones.

The local forest Berek and the nice waterfall Zúgov offer unforgettable experience for people of all age. Picturesque nooks can often be found in works of art of the native

painters of the town: Lajos Luzsicza, Ernest Zmeták, Alexander Bresták.

Nové Zámky is a multicultural town where have been living together in peaceful coexistence Slovaks, Hungarians and various nationalities for centuries. On the Main Square there are placed in neighbourhood statues of two significant figures of common history of Slovak and Hungarian inhabitants of Nové Zámky: statue of Anton Bernolák, the codifier of the first literary Slovak language and Hungarian archbishop György Széchényi.

General information:

Population: 42 262
Area: 72,56 km²
Density: 582 inhabitants/km²
Partnership towns:
Znojmo (Czech Republic),
Fonyód (Hungary)

Main industrial key sectors:

Machine industry, electrical engineering, agriculture, food industry, commercial and financial services.

Top tourist attractions:

For hundreds of years, Main Square has been „the heart“ of the town, since the most significant events of the past took place there.

Another significant architectural and cultural monument is the Franciscan church and monastery. They were established by Peter Pázmány in 1631. The church represents a simpler, more provincial Baroque style without any exaggerated decoration. The most beautiful parts are the door frames and the pulpit.

E. Tatárik's swimming pool is the pride of the

town. For the public there is an area with eight pools for all age groups. The swimming pool offers for visitors various conditions for leisure activities: volley-ball, tennis, giant chess, table tennis, minigolf and bowling.

The longer the more young people spend their free time ice skating in the Ice stadium. It is a modern equipment for universal using especially

REVÚCA

The town of the first Slovak grammar school

Revuca is a part of Gemer Region which has great conditions for expansion of tourism. Revuca district is situated in the area of historical Gemer and Malohont.

In this area you can find its famous roads called Gothic road, Iron road and Road of Maria Seci. The whole area is very rich in its historical monuments and cultural heritage.

The first written record about Revuca is dated back to year 1357. Iron industry was very important for this area for more than 500 years. In 19th century Revuca became the centre of Slovak national life and education. The first Slovak gymnasium was found here in 1862 and lasted until 1874. It was the first grammar school where Slovak language was used and taught. Many famous Slovak writers and teachers worked there, for example M. Kukucin, I. B. Zoch and many others.

Revuca region is also famous for its natural beauties such as National park of Muranska planina, Stolica mountain and Revuca s highlands. There are very good conditions for touring, tourism and for the stay in nature through the whole year. This town with its surroundings has many huts and tourist cabins in traditional and natural hillside settlements. This region has more than 250 km of marked tourist lanes and 62 km of marked lanes for skiing tourism.

National park of Muranska planina offers wonderful views and more than 400 caves and precipices. The flora of this national park has a wide variety of different kinds of flowers and plants. The most typical and special for this park is Lykovec Muransky. This plant can only be found in Muranska planina. It does not grow anywhere else. Typical for this region is also breeding the horses and sheep.

ACTIVITIES WHICH ARE POSSIBLE TO DEVELOP IN THIS REGION:

Recreational potential:

Visits in mountainous and forest environment, touring, cycling, and cognition of historical heritage

Investing potential:

Building of green and brown industrial parks, development of existing lumber industry, building of research and evolution centres and investment to tourism

Rimavská Sobota

Elevation above the sea:
208 m above sea level
Area: 7751 ha

History and present time

With the first record of this town dating back to 1270, the town Charter was granted to Rimavská Sobota on the 5th May 1334, and this day is celebrated as the Town day. Rimavská Sobota has through the whole history kept a spirit of merchant town know for traditional craft industry. It is

interesting that in the 19th century, there were as much as 27 guilds active in the town. As a reminder of this tradition we can visit every year a spectacular Gemer Trade Fair and an exposition EURO Rima EXPO that is held every year in September.

Position

The city of Rimavská Sobota and its district is situated in the mountains Slovenské Rudohorie, in the Rimava River valley surrounded by the protected landscape area Cerová Vrchovina and the Natural Park Muránska Planina. Rimavská Sobota is a district town.

Industry and services

The industrial base of the town especially consists of foodstuff plants, construction and machine companies and

others. Various plants providing required services have been continuously setting up and commercial establishments have been building up.

Culture

The Town Gallery that presents contemporary art in its exhibition and also in the square during summer. Very favourable position on Tomašová Street has the observatory, in Europe known via observations of stars' obscuration. In the town there are: the Women's choir, the singers' quartet, the brass band called Sobotienka, folk ensembles Rimavan, Háj, Új Gömör, children folk ensembles Lieskovček and Oriašok, the amateur theatrical groups Divosud, Badido, Pictus, DDS Buratinko.

Sport

You can find sports relations in the sports clubs and teams: football, hockey, tennis, volleyball, wrestling, judo and riding. Natives as well as visitors can refresh themselves in the Town garden and swimming pool.

Recreation

The recreation area Zelena voda offers the possibility for investing. The new complete

infrastructure of the territory and thermal water with curative effects are prepared for investors.

THE TOWN OF SPIŠSKÁ NOVÁ VES

Gateway to the Slovak Paradise

Slovak Republic, Europe
N 48° 56' 39,01"
E 20° 34' 0,32"

Spišská Nová Ves with its more than 740-year long history is an ideal starting point for the lovers of tourism along harsh but picturesque gorges of the Slovak Paradise National Park, for the admirers of monuments included in the World Heritage List of the UNESCO and for those interested in obscure but even more precious Gothic Route monuments.

The town features the

216 km of tourist paths and 65 km of bike tracks.

The combination of nature, history and active relaxation in the middle of Spiš are complemented by other available natural beauties, among which belong the High Tatras which are just 30 km away, thermal swimming pools in nearby Vrbov, the nearby Pieniny National Park, the caves of the Slovenský Kras or the quickly reachable metropolises of Prešov and Košice.

In the future a large ski resort will be built up close to the town, which will enable an even better utilisation of

Spišská Nová Ves as a place for year-long relaxation and entertainment.

An increasing interest in Spišská Nová Ves is reflected every year in the growing number of its visitors, services concentrated not only in its centre and also in increased business activity.

Spišská Nová Ves - this is the gateway to the Slovak Paradise.

Town of Zilina

The metropolis of Northern Slovakia

Basic information:

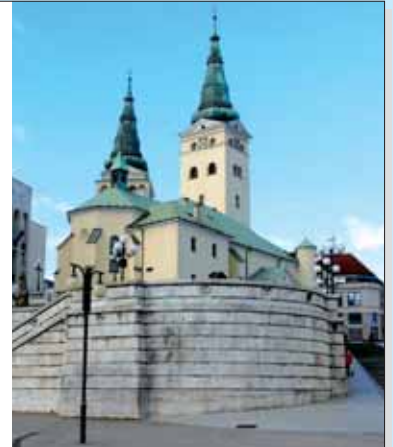

Zilina is situated near the Czech Republic and Poland and it is an important junction of roads that connects Northern Europe with

hotel businesses, IT technology, logistic. In the town resides a university specializing on transport and information technologies and also numerous scientific and research institutes. The airport in the nearby village Dolny Hricov has a status of an internati-

onal airport and since the year 2007 Zilina has been connected by a highway with Bratislava - the capital city of Slovakia.

Tourist spot:

The rich history of Zilina makes it an attractive spot for tourism. The first written reference about the town is from the year 1208. The most significant heritage sites are the middle age

church of Saint Stefan - the king, The Castle of Budatin with the unique exposition of tinker art, the renaissance Marianske Square with the baroque statue of Virgin Mary, The Church of the Holy Trinity built around the year 1400 and a neology synagogue projected by Peter Behrens.

In the wider surrounding areas, there are five castles, the famous spa town Rajcke Teplice, and one of the most remarkable places: the Small Fatra - Vratna valley where is also a popular ski resort. The historical monuments and the natural treasures create optimal conditions for tourism in the summer and winter.

Zilina is also the city of theatres, galleries, museums, parks, sport fields, comfortable restaurants and through its centre goes the longest and picturesque pedestrian zone in Slovakia.

East and West Europe. This strategic location makes Zilina an economical, industrial and cultural centre of the whole region. The town and its surrounding area is one of the fastest developing regions of Slovakia, thanks also to KIA Motors Slovakia's investment.

General information:

Population: 85 655

Area: 80,03 km²

Unemployment rate: 3,36 %

Economy:

Zilina is an important economical and industrial centre of Slovakia. The main industry sectors are engineering and auto industry, papermaking, electrical engineering, chemical and food industry, and energy industry. There are significant developments of

The Town of Hurbanovo

The town of Hurbanovo is located in the southern part of western Slovakia in the Danube lowlands, at the junction of the rivers Žitava and

Nitra. The earliest reference to this town as "possesio Gyalla" is from 1357.

Hurbanovo lies at 115 m above the sea-level, at the warmest point of the Danube lowlands, which together with the local climate and favourable soil conditions predetermine the agricultural character of this area.

The town has seven town districts with a total of 8,058 inhabitants: Hurbanovo, Bohatá, Zelený Háj, Nová Trstená, Konkoľ, Holanovo, Vék, located at the cadastral territories of Hurbanovo and Bohatá.

The town has various historic monuments, such as the catholic church of St. Ladislav, a church of the Reformed Church, a classicist curia, a hunter manor-house, the catholic church of St. Anna etc. The protected natural monuments include the historic park in the area of the observatory and planetarium, and two historic parks in Bohatá.

We have a lot to offer in the field of education. The town has three elementary schools, one elementary art school, second-

ary public engineering school, and a secondary agricultural school.

The Municipal Cultural Centre organises various events and projects movies. Children can spend their free time in the Free Time Centre where they can dedicate to their hobbies in different groups under supervision of professionals.

Hurbanovo offers opportunities for practicing sports in various clubs of school establishments, and in tennis and football clubs, as well. There is also a football stadium and an ice-hockey ground used for skating and playing hockey in the winter and as tennis courts in the summer.

The town is successfully represented by important institu-

tions, such as the Slovak Central Observatory and the Hydro-meteorological Institute, and

by the companies HEINEKEN Slovensko a. s., NURITECH Slovensko s.r.o., Namex s.r.o., Terbo s.r.o., Joalko, Jatka Hurbanovo s.r.o. and DS Smith Slovakia s.r.o..

Town of MEDZEV

Town Medzev was established by German colonists invited to the country in 1241, after the

Tartar attacks, by the Hungarian king Béla IV messengers. First settling has occurred at North-West from the current Medzev, in the area called Dorfel (small village). Original population speaks to these days to large extend German dialect „Mantak“ and call themselves „Mantaks“.

First written mention about the settlement of Medzev region is from 1272, describing abuse of forests by the inhabitants of the mining settlement. From 1366 is a

document permitting erection of three waterpowered forgeries.

Medzev has principally become famous by production of forged tools, primarily intended for hand farming work. Toward the end of 19th century over 100 water powered forgeries and over 200 iron furnaces operated on the banks of Bodva

river and nearby brooks.

Medzev forgery products – shovels, rakes, hacks, hoes and other forged tools were known throughout Slovakia and, due to their high quality also in many

other countries of the world. Nowadays this attractive and artistic work can be viewed in some of preserved forgeries. Major contribution to the preservation of Šugov valley historical forgery carries Medzev born, former Presi-

dent of the Slovak republik, Mr. Rudolf Schuster. During his Presidential term the water powered forgery served as representative site for numerous honored visits. Initial steps taken by private entrepreneurs to revive this technology are successful and do contribute also to preservation of Medzev forging traditions.

Medzev is seated in the valley of upper Bodva and counts 3.700 inhabitants. It is surrounded from three sides by picturesque mountains rich in wild

berries, flowers and fauna. Road between Jasov through Medzev toward Štós represents boundary of Slovak

Kras – tourism region rich in natural jewels and other cultural and historical monuments. From

this point of view Medzev offers ideal location for tourism. Picturesque Šugov valley and all Medzev region valleys are still oases of untouched nature. They represent valued natural resource with locations still to be uncovered.

The town of Nová Dubnica

Nová Dubnica lies in a picturesque area of Central Považie in the Ilava basin stretching from northeast to southeast. It is a modern and young town, built only in the 50's of the 20th century.

Its history is short and closely linked with its surroundings in the Ilava basin. The origin of Nová Dubnica is connected with the enhancement of the engineering factories in the town of Dubnica nad Váhom. As the production in the factories grew, so did the number of the workers. Accommodation capacities were not sufficient for the requirements of the workers and their families.

The building-up of Nová Dubnica was commenced following the project proposal made by the architect Jiří Kroha in 1951. First inhabit-

ants moved in winter 1953. The housing estate was managed by Dubnica's administration up to 1957. The housing estate became an independent village on 1st June 1957 under the name of "Nová Dubnica". There was built a network of shops and new sport and cultural clubs came to existence. Nová Dubnica acquired the town's status on 8th June 1960.

At present, Nová Dubnica is stretching on 1,127 ha together with the municipal part Kolačín and has approximately 12,000 inhabitants. The natural centre of the town is Mierové square where the shops and services are concentrated. Mierové square offers not only different services but also relax on benches which are situated all around the square. The large square space gives an opportunity to organize social or cultural events and public performances. For cultural events

is appropriate also cinema Panorex. It is used for the film projections and it is famous for being the first panoramic cinema in Slovakia.

There are some cultural groups in Nová Dubnica which represent the town in Slovakia as well as abroad. Nová Dubnica can be proud of famous and skilled Orchestra with majorettes, a mixed chorus, a folklor ensemble and craftsmen in the field of laces. There

are also sport organisations which are successful in tennis, ping - pong, football and hockey.

Town of Zvolen

The town of Zvolen is the centre of Pohronie, it has a rich history dating

back 760 years.

Once a royal town, today Zvolen is a district centre with

The walls of Deserted Castle (Pustý hrad)

a vibrant active life. Visitors are greeted by the **Zvolen Castle**, which dominates the town. It was built as the hunting lodge of King Louis I, the Great of Anjou. Presently, it houses a seat of the Slovak National Gallery.

Every year, in the castle grounds the international theatre and opera festival Zvolen Castle Plays takes place.

The heart of the town is the **SNP Square** and the pedestrian area, which is lined by old burgher houses and the church of St. Elisabeth. Of top value worth seeing is the historic and cultural monument

SNP Square

Zvolen Castle

Pustý hrad, since 1172 it has been an important centre of the royal comitatus. The castle ruin covers an area of 7.6 ha and belongs to the largest in Europe.

Close to the centre of the city is situated one of three

armoured trains built in the Zvolen railway works during the Slovak National Uprising as a symbol of the resistance of Slovak nation against fascism.

In town there is the J. G. Tajovský

Theatre, Museum of Forestry and Wood processing, and the Technical University which trains specialists of forestry and wood processing. The municipal swimming bath, the Neresnica swimming bath, and the **spas** of Kováčova and Sliach offer recreation opportunities in summer. In winter, the ice stadium and the ski and sports resort of Kráľová serve for recreation.

Town of Giraltovec

The town Giraltovec laying on the south of Nizke Beskydy and two rivers, namely Topľa and

Radomka, flow trough the town. At present giraltovec is one of the developing economic, administrative and cultural centres of Svidník district.

The first written record about Giraltovec, dates back to the year 1416. There are several interesting cultural monuments like: Renaissance evanjelic church a.v., late – renaissance manor – house from the 17 – th century, baroque greek – catholic temple „Matky ustavičnej pomoci“ from 1938 and monument for the first world war memory with plastic of „lieing lion.“

The town provides broad possibilities of development

economic, spiritual and cultural activities.

The pride of town is folklore ensemble Topľan (35 th anniversary). Recreational and rest zone offers beautiful nature with ponds and protected nature reserve with its unique fauna and flora.

The town of Giraltovec offers to its visitors numerous prospects of cultural pleasures and cultural events:

Folklore festival - Topľanské slávnosti, International guitar festival, Giraltovecký hudák – competition of singers, Days of jewish culture, horse - races and traditional markets of Giraltovec with interesting shows

Town of Michalovce

Michalovce is the economic, administrative and cultural centre of lower Zemplín. The strategic

position of the town led to the establishment of traditional and classical crafts, trade and, later, industries such as clothing, construction, ceramics, engineering, electronics and food production.

At present there is a wide range of institutions and specialized organizations in Michalovce. Cultural life is built around the regional and town cultural centers, the Zemplín Museum, the observatory, the library and the local branch of the Matica Slovenská organization. The new, reconstructed pedestrian area in the town centre with its singing fountain attraction has become the natural focal point of the town. Regular cultural and social events make a pleasant charge from routine.

Zemplínska Šírava is center of tourism and recreational

activities nearly Michalovce. It is the largest lake in Slovakia and its position gives it a unique climate. It is famous for having the largest annual number of sunny and tropical days. Michalovce and Zemplínska Šírava

are becoming more popular and attract foreign tourists from neighbouring countries.

City of Senica

Senica, the district town with over 20 000 inhabitants, is the biggest administrative,

economic and cultural centre of the northern part of the Záhorie. It has advantageous location nearby the borders with Czech Republic and Austria and its further development is connected with the cross border cooperation. Senica is the important business-industry centre of Záhorie.

The oldest piece of the 750 years built heritage is St. Anne's Chapel dating back to the 15th century. Nevertheless, Senica is the modern town with the average age of its inhabitants is 35 years. The near recreation area at Kunov Reservoir can be easily reached by cycle-way. In the town, there are also football and winter sports stadiums, a sports hall, indoor and outdoor swimming pools, sauna and fitness centre, handball, volleyball and tennis courts.

Small handicrafts and agriculture town was almost completely rebuilt in the 1960's. Senica has welcomed the third millennium with unprecedented development of the industrial,

residential and business zones, building-up of the relaxation and sport areas. The industrial zone is built up on the area of 200 ha and has already foreign investors there. The partnership towns of Senica are Trutnov and Velke Pavlovice from Czech Republic, Pultusk from Poland, Bac from Serbia and Herzogenbuchsee from Switzerland.

City of Trnava

2008 - the year of the city of Trnava 770th anniversary of granting the free royal town's privileges. We invite you

to the oldest royal town in Slovakia.

The city of Trnava is located in the middle of the Trnava hill country, 50 km far from the capital of Slovakia - Bratislava, and 110 km far from the capital of Austria - Vienna. Belo IV,

Hungarian King, had granted the privileges of a royal town to Trnava in 1238. The local cultural monuments provide an exhausted reflection of the history of Trnava. In favor of their preservation the city of Trnava has been declared a municipal monumental zone in

1987. The visitors may admire here the municipal fortification – a unique fortification system, Renaissance municipal tower, baroque complex of the Trnava university buildings, early-baroque jewel – the Cathedral of St. John the Baptist, many sacral objects from the Gothic to baroque ones. The offer is completed with interesting cultural events - Lumen international festival of gospel music, Dobrofest international musical festival /well-being, country and folk/, Trnavská Brána /the Trnava Gate/ international folklore festival, and the traditional market of Trnava with interesting shows of popular crafts. Come to relax to the city of Trnava, to a town rich in its history and culture, come to spend here some lovely moments in its pubs, cafés, restaurants, wine cellars or just come for shopping in its shopping centers.

More information of the city is available on: www.trnava.sk

The Municipal Office of Trnava arranges the visits throughout the historical center.

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

M.R.Štefánik airport Bratislava,
Airport Košice,
Airport Poprad-Tatry,
Airport Sliač,
Airport Piešťany
and **Airport Žilina.**

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

Ladies and Gentlemen,

The Slovak agricultural sector has considered the entry into the European Union to be inevitable although it brought also some negatives except positive sides which were above all subsidy stabilization and clear provisions under the Common Agricultural Policy. From the Slovak Agricultural and Food Chamber point of view one of the most unwilling disadvantages is price decrease in more of the main agrarian products which was caused mostly by the market opening. The low production quotas and change in the support system from continuous to "one payment" by the end of the year have had also unfavourable impacts to farmers.

The higher investments to the business to fulfill EU standards caused that entrepreneurs became burdened by the increased need of a credit. As press started publishing information of alleged sharp improvement of the farmer's situation since the CAP utilization also the land owners raised rapidly their rents. Consequently an economy of the primary producers was badly affected.

The Slovak food industry has approved that quality of its products is on a high level and can compete the most developed production in the world. But it has to face the constant reduction of the market prices due to the market chains pressure, especially in the conditions of the Slovak republic, which negatively affects the profitability of the food-industry. The delivery repayments from the retail side take a long time, in many cases 60, 90 or even more days. Also many special fees and fines claimed by retailers from suppliers hinder the business in producing and processing food-stuffs. The unequal position in "the suppliers – the market chains" relationship consequently complicates further development of the whole agri-food complex because this pressure is transferred in different ways on the agricultural production.

Slovak farmers as well as the food-processors after the two years period of the EU membership are convinced that there is no need to be afraid of the other producers from foreign

countries but the less sound conditions on the common European market. Surmounting this handicap has its limits in the economical patterns which must be respected anywhere, including Slovakia. All the more the Slovak agricultural self-administration must insist on equalizing the conditions for domestic as for all the other European entrepreneurs.

Despite the fact that economic experts had counted with a possibility of progressive decreasing of adverse balance in the Slovak international trade on agricultural and food goods at very beginning of a transformational period, these beneficial predictions weren't met. The gap between export and import has increased in bad marks for domestic producers during the period of 1994 – 2001 years. The adverse balance reached 20.2 mld. SKK in 2001 and it was believed that this trend would change. But it has reached its historical maximal record level of 21.4 mld. SKK in 2005 and the progress of 2006 didn't indicate any improvement of this trend.

Based on the experiences of more than two years period of applying the CAP in Slovakia we may conclude that there are three main tasks put on the Slovak agri-food sector. First of all it has to be more seen and heard within side and abroad. At once it has to react to the process of the market concentration by balanced supplier – customer relations, establishing the producers organizations or capital connections. Last but not least the Slovak agri-food sector has to persuade the executive as well as the legislative power of the necessity of the balanced support to the agriculture, food-processing industry and rural areas but also of the necessity to adjust the Slovak business environment to the level at least alike in the Visegrad four countries. Otherwise we could only watch the further decay in agrarian and consequently in food processing production which would cause extremely negative effect on the whole Slovak countryside.

The **BELAR a.s.** has been operating at the Slovak market for more than ten years. The requirements of enhanced business efficiency and growing competition resulted in substantial changes by which the new company **BELAR a.s.** was established as of 1 January 2005. From the legal point of view, it was a merger of three companies. The new company started focusing on national and international levels defining its specific position at the market. **BELAR a.s.** became a modern trading company concentrated on three major business scopes covered by our divisions. Those are the trade, manufacture of fodder mixtures, and protection and storage of plant commodities.

The priority of the Trade Division is to set up strong foreign trade linkages and export the surplus of cereals, oil-bearing plants and maize from Slovakia. At the same time, our company is ambitious to get established and succeed at the international agricultural commodity market.

The manufacture of fodder mixtures is a traditional part of business of the **BELAR a.s.** At present, due to its modernisation, it reaches the technological comfort comparable to our foreign competition. The focus on quality was confirmed by the HACCP Certificate granted to the company. The company is passing from the wide-spectrum manufacture to specialisation following a well-balanced ratio of poultry, pig and beef fodder.

The company made significant investment by setting up a new manufacturing plant of complementary fodder resulting in a unique offer of extruded products to be used by breeders and used as a part of our own fodder mixtures.

The company assets cover also the purchase warehouses located at 7 centres involving the total capacity of up to 250 thousand tons. The purchase warehouses support the Trade Division and the Production Division, providing services to our partners. We attempt to reach a high technological level, and our quality management is supported by the ISO and GMP+ Certificates. Our central laboratory provides services, too, being accredited and making professional analyses of agricultural commodities.

BELAR a.s. is one of the Slovak major independent companies in the field of the manufacture of fodder mixtures and trade of plant commodities. Our main objective is to continue enhancing our market position in the Slovak Republic, and moreover, to gradually get established providing our services and deliveries of fodder mixtures in our neighbouring countries, and trading in plant commodities in Europe or worldwide.

VÁŠ OBCHODNÝ PARTNER S MRAZENÝMI A CHLADENÝMI VÝROBKAMI
YOUR BUSINESS PARTNER WITH FROZEN AND CHILLED PRODUCTS
IHR GESCHÄFTSPARTNER MIT TIEFGEKÜHLTEN UND GEKÜHLTEN PRODUKTEN

Radoma, s.r.o., Vážska 32, SK-821 07 Bratislava, SLOVAKIA, tel.: +421-2-455 24 210, -11, -12, fax: +421-2-455 24 221, -14, -13, e-mail: juhosova@radoma.sk, www.radoma.sk

The company **RADOMA**, Ltd. takes an important place in the field of frozen, cooled and preserved products in the Slovak market since 1992. It concerns with import of raw-material and processing and distribution of fish products and seafood, frozen vegetable and their mixtures and potato products.

Besides the fish processing (different cooled fish salads, marinated fish etc.) the production of frozen ready-made products, that means different kinds of frozen flour specialties as for example dumplings filled with fruit, meat, cheese poppy etc., also frozen breaded products (breaded fish portions, breaded fish fillets, breaded cauliflower), frozen fish and frozen vegetable products and fish tins is our priority.

Close contacts with growers of vegetable are our advantage.

We are also producer of ice-cream with wide assortment and possibilities. Big choice of industrial ice-creams on sticks or in boxes and the new developed top quality ice-cream made Italian-way á la artigianale.

RADOMA SK, Inc. supplies the supermarket chains operating in Slovakia with our and foreign brand products as well as with their private labeled products.

We secure a reliable distribution net throughout Slovakia. Our subsidiary **Radoma CZ**, Ltd. operates in field of catering in Czech Republic.

We are open to any serious cooperation and are seeking for a partnership in foreign countries either to distribute our products there or we are able to provide our large production, store and distribution capacity for different possibilities. The cooperation with other producers will be welcome, too. We are also able to provide our repacking capacity.

Slovak Agricultural and Food Chamber (SPPK) represents non-governmental, autonomous and statutory undertaker which was established in line with the Law No.30/1992 Coll. as amended. The basic role of the Chamber is to push forward the justified common interests of its members, mainly in the process of the agricultural and social policy setting. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal persons providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005, according to the changes made to the Law. By September 30st 2005t, SPPK registers 2 108 member organisations, of which 1 803 members come from the agricultural primary production, 155 members come from the food processing industry, 111 of the members are providers of the services for agriculture and there are also 39 other organisations, mostly coming from the field of science, research, schools etc.

Internal organization

Central office in Bratislava with 15 employees and the net of 41 regional agricultural and food chambers (RPPK) operating in Slovakia. The "regional" chamber can be established also on the other than just territorial basis. This change in the wording as well as the principle of the voluntary membership was set out in the Law No.546/2004 Coll. which amended the original Law No.30/1992 Coll. on the Slovak Agricultural and Food Chamber. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the General Management, the President and the Supervisory board. General Assembly composed of the delegates voted by representatives of the member subjects. The General Assembly approves the Statute of the Chamber, its Electoral system, the Rule of procedure and also votes on the President, Vice-presidents, the members of the General Management and the Supervisory board. The General Management is the executive body which administrates the proceeding of the Chamber. The President is

on the head of the Chamber and the General Management, he monitors the functioning of the Chamber central office and fulfils his duties set in Status, orders of the General Assembly or the Management. The Supervisory board represents the highest body controlling all the activities of the Chamber.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the office in which they are registered, but also to the central office in Bratislava.

Activities

The Chamber's activities are concerned on:

- Legislative – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

Membership in international organizations

1. International European farmers organization COPA/COGECA
2. Confederation of the food and drink industries CIAA

Co-operation with national and international partners

The Chamber is co-operating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and took the initiative of the periodical meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The Chamber is communicating also to other agricultural chambers within the European Union.

Member associations of food processing

SPPK organizes 13 associations of the food processing industry – see below:

HORNONITRIANSKE BANE PRIEVIDZA, a.s.

Hornonitrianske Bane Prievidza, a.s., is the largest company in the Slovak Republic dedicated to the extraction of brown (lignite) coal, the sole primary domestic energy source. The Company occupies a significant position within its industry and in terms of the nation's, county's and region's economy. It holds top place among mining companies in Slovakia. Brown coal is mined underground at three locations: Cigeľ; Handlová and Nováky. Annual production amounts to 2.2 million metric tons. The Company has two branches - Banská mechanizácia a elektrifikácia (Mine Mechanization and Electrification) in Nováky and Hlavná banská záchranná stanica (Main Mine Rescue Station) in Prievidza, both firms covering specific activities.

The Company's machines are managed by **Banská mechanizácia a elektrifikácia Nováky**. The branch's main job is to produce and repair technical equipment for the mines. The branch has established itself over the long term in mining technology, both inside and outside the Slovak Republic, and won recognition in the Czech and Polish markets. The branch's most significant commercial engagements include the production of 44 pieces of BMV-1MiT reinforcement for a Turkish mining company. HBP has thoroughly reviewed the branch's manufacturing and technical potential.

Hlavná banská záchranná stanica Prievidza performs rescue service in mines and manages the branch's mine rescue unit, covering rescue activities that operate throughout all of Slovakia. The branch's staff works to save people's lives and property in industrial accidents, negotiating themselves through them and providing first aid.

The company has been expanding in the area of abroad mining activities, road transportation and in providing accommodation and meals, rest and recreational services at its own recreational facilities: the Hotel Repiská in Demänovská dolina and the Hotel Barbora in Vyšná Boci as well as at the Púšť recreation center in Prievidza and the Horec Pension in the Remäta recreational area, while also orienting itself toward new projects that are determining the Company's further direction. The chief objective is to maintain the position of Hornonitrianske bane Prievidza as a solid and solvent business partner.

**HORNONITRIANSKE BANE
PRIEVIDZA, a.s.**

Supplier of:

- **technological CNC cutting tables for plasma cutting, oxy-fuel cutting, waterjet cutting, laser cutting**
- **control systems for machine tools**
- **3D milling machines**

MicroStep*spol. s r.o.*

MicroStep, spol. s r.o., Tomášikova 28, 821 01 Bratislava
 tel./fax: +421-2-43 33 99 87, e-mail: marketing@microstep.sk

www.microstep-group.com

The company **MicroStep, spol. s r.o.** was established in 1991. It has over 300 employees together with its daughter companies at present time. A consolidated turnover of this group got over 500 million Sk in 2005. Activities of company MicroStep and its daughter companies are orientated into the area of supplying of control systems and software products for power industry, rubber industry, automobile industry and mechanical engineering.

In the area of mechanical engineering is MicroStep, spol. s r.o. an OEM of machines for cutting of material based on energy-beam technologies. These machines use materials technologies of plasma, oxy-fuel, waterjet, laser and high speed spindle for cutting of metals. More than 90% of production in this area is exported to states of EU and to a lot of other countries of the world.

Machines that are produced for the area of plasma cutting are equipped with plasma sources of leading world manufacturers – HYPER THERM and KJELLBERG. All of these machines are manufactured in configuration according to requirements of customer – size of working area, number of cutting heads, type of plasma source, type of filtration unit.

The most of these machines can be equipped besides of cutting of sheet materials also with unit for cutting of pipes or other rotary parts. In addition to cutting heads machines can be fitted with technological heads for drilling and tapping with automatic tools changing and also head for describing. The next possibility is an equipping of machines with technological head that is able to do a bevel cutting – preparing for welding.

In the area of waterjet cutting is a high pressure technology of company KMT applied to machines. Waterjet cutting machines are able to carry one or more of cutting heads and a special head for tapping. The machine can be equipped also with bevel cutting head.

In the area of laser cutting are resonators of companies PRC and ROFIN with power according to requirements of customer applied to machines. Machines are fitted with automatic cutting grates changing system, with extension conveyor of a waste and with effective suction and filtration system of exhausts created in process of cutting. All machines are equipped with adaptive optic of company KUGLER and with cutting head company PRECITEC or HYPER THERM. These cutting heads have an automatic adjusting of position of focus point in process of cutting.

MicroStep
spol. s r.o.

WE GENERATE ENERGY THINKING ABOUT TOMORROW

MORE THAN 70% OF OUR ELECTRICITY COMES FROM CLEAN SOURCES. WE GENERATE SAFE, RELIABLE AND EFFICIENT ELECTRICITY. WE WILL INVEST EUR 3 BILLION IN OUR NEW PROJECTS FOR THE CLEANER FUTURE OF THE NEXT GENERATIONS. WWW.SEAS.SK

Slovenské elektrárne, member of ENEL Group, wish to be the safest, most reliable, efficient and competitive power generating company in Slovakia and surrounding markets. Due to these priorities, it is launching the development of new energy sources, increasing the power output and modernizing all its 6 000 megawatt power generating portfolio – nuclear, hydro and thermal power plants.

Until 2013, Slovenské elektrárne and ENEL have committed to start investment projects in the volume of over SKK 100 billion, or over EUR 3 billion. Last year, majority of investments flowed to the nuclear energy, mainly for the modernization and power up-rate of the Bohunice V-2 nuclear power plant, also aimed to increase its generating capacity by some 7 % – from 880 to 940 megawatt.

Most of the investments in the next year will be placed into the Mochovce III & IV completion, which will be the most modern nuclear power plant in the region in 2013. Thanks to installation of the newest technology and monitoring solutions the equipment will be operated at level of the third generation of pressurized water reactors, the most advanced available generation at the energy market.

In 2009-2013, Slovakia will miss the decommissioned nuclear units of Bohunice V-1 power plant. Therefore, Slovenské elektrárne and ENEL want to transition this period by increasing the load of thermo power plants in Vojany and Nováky, and increasing the output capacity at Mochovce I & II and Bohunice V-2. The thermo units will undergo modernization and ecologization challenging in terms of the investments.

Slovenské elektrárne is also modernizing its hydro power plants, which are migrating to a fully-automatic control system. In addition, the company is preparing projects of small hydro power plants, assessing the possibilities of developing a wind park, increasing the usage of biomass and geothermal energy. By taking these actions, Slovenské elektrárne and ENEL are demonstrating that in Slovakia they wish to operate the safest, most reliable, efficient and competitive energy sector in the region.

The manufacturing and trading company WAY INDUSTRY, joint stock company started its activities on March 1, 1999. It continued the heavy machinery tradition at the region of Krupina. In the year of 2001, the owners have changed and the name of the company has also changed.

WAY INDUSTRY joint stock company is involved in the foreign trade with the machinery products. The main products mentioned below: skid steer loaders LOCUST L 453, L 752, L 753, L 853, L 903, L 1203, L 1203 TELSPEED, Mine Clearance Systems called BOZENA 4 and BOZENA 5.

The good special policy of the company is supported by the quality of the provided services for the production and delivery of spare parts.

The company with its quality work and considerable flexibility has gained successful position at the mentioned fields within the Slovak Republic and also abroad.

WAY INDUSTRY, j.-s. Co., Priemyselná 937/4, 963 01 Krupina, Slovakia

FINALCAST®

Aluminium Castings

Viac ako 40 rokov znalostí a skúseností

- výroba hliníkových odliatkov
- gravitačné hliníkové odliatky
- nízkotlakové hliníkové odliatky

More than 40 years of knowledge and experience

- production of aluminium castings
- gravity die castings
- low pressure die castings

FINALCAST®

Aluminium Castings

History of aluminium castings production dates back to 5 April 1967, when the first casting was produced at ZSNP, a.s. – division Finalcast.

Nowadays, the following two casting technologies are in operation at Finalcast: the gravity die casting and the low pressure die casting.

GRAVITY DIE CASTING

The main advantage of gravity die casting technology is its flexibility enabling the production of aluminium castings of great complexity. This feature is particularly valuable and advantageous when castings of specific shape and dimensions are desired. Inner casting shaping is carried out using sand cores: CT, CB and CRONING production methods are used for sand cores production.

LOW PRESSURE DIE CASTING

Low pressure die casting technology is suitable for the production of large-sized castings, meeting both

demanding requirements and specifications concerning dimensions and weight, as well as oil- and water-proof characteristics. Using the technology aluminium alloys castings up to 1.2 m in diameter and up to 35 kg in weight can be produced.

FINISHING OPERATIONS

Better mechanical, structural and surface-quality properties are ensured by the following finishing, or "after-production" operations:

- shot blasting with CrNi40, Cr40, GRANOX40,
- tumbling - vibratory deburring/cleaning of castings,
- impregnation,
- heat treatment,
- milling and turning using CNC equipment,
- castings degreasing.

HEAT TREATMENT

Finalcast offers apart from production of aluminium castings also heat treatment services for aluminium alloys castings with annual capacity 3 000 – 5000 MT.

The heat treatment process is certified according to ISO 9001:2000, OHSAS 18001:1999 and ISO 14001:1998.

BIRD CONSOLE

Kovel was established in 1990. From the beginning of its existence they survey on assembling, maintenance of electric equipments and manufacturing of lowelectric force switch boards. The company offers todays assortment not in Slovakia, but also in surrounding countries.

Products

- Steel lighting poles
- Connecting and disconnecting boxes in zinc-plated form
- Steel poles up to 35 kV
- Consoles to VN wires „ANTIBIRD“
- RST - switch-boards
- Parts of external low voltage leads up to 1 kV
- Parts of external high voltage leads up to 35 kV
- Supporting system of electric distribution network H.V. - DELTA
- Trafo stations and steel poles

KOVOTVAR the Cooperative society was established in 1953. Over the years it has reached major success in the field of production of metal products, especially processing of steel sheets, hot dip galvanizing and machining.

- galvanized and powder coated **metal products** for garden, household and decoration: watering cans, buckets, vases, planters, containers, flowerpots, wire products, etc,
- galvanized **anchor pins** suitable for fence buildings and other simple constructions,
- galvanized **catch pits** for underground constructions,
- **galvanized products for the sow breeders (pen equipment)** in agriculture,
- **hot dip galvanizing, powder coating, welding, pressing, cutting of sheet, bending, CNC machining** and other services in machining,
- authorized **sale of cars** of mark ŠKODA, **service and repaired services**, sale of car accessories.

KOVOTVAR – the Producer’s Cooperative

KOVOTVAR – the Producer’s Cooperative has been working for a half of century (the company was established in 1953). Over the years it has reached major success in the field of production of metal products and related cooperation. Today, KOVOTVAR is a producer of the goods that are successfully sold on the domestic as well as on the foreign markets. Its production covers 20 % of the domestic consumption and nearly 80% of the annual production is exported almost all over the world: EU countries, Norway, Switzerland, the Czech Republic, Poland, the USA, Canada and Japan.

We have three works, about 400 employees and the subsidiary company KOVOTVAR CHAM GmbH in Germany. Annual turnover of KOVOTVAR is 14,5 mil. €. The production program consists of the following lines:

- galvanized catch pits complying with the DIN Norms
- galvanized anchor pins suitable for fence building and other simple constructions
- wide range of galvanized and coloured metal goods for garden, household and decoration (e.g. buckets, watering cans, pots, vases, planters, containers in many sizes and shades etc.)
- galvanized products for the sow breeders (pen equipment)

All our products are made of solid steel, tubes or wire and then hot galvanized (hot-dipped) and/or powder coated. Our consumption of steel sheet is ca. 4000 t per year.

Furthermore, we offer production cooperation in areas:

- 1) Pressing – eccentric presses 25t, 40t, 63t, 100t and 160t
crank press 250t
hydraulic presses 100t, 160t and 250t
press brake 15t and 50t and new CNC press-brake (120 t)
- 2) Material indexing: table shears up to thickness max. 6mm
- 3) Welding: spot welders and seam welders up to 4mm + 2 welding robots ROMAT 310 and ROMAT 76 (Cloos)

- 4) Bending: automatic bending machines for tubes, INTELLIBEND 60 CNC – Hydraulic bending machine of tubes
- 5) CNC press-brake
- 6) CNC cutting press TRAUMATIC 2000R (Trumpf) with the layout 1270 x 1270 mm
- 7) Drilling, turning, etc.

As a surface finish we offer:

- 1) Hot galvanizing in the furnace of size 1,2x1,2x7m where the parts of weight up to max. 32t can be galvanized. Our service complies with all criterions set by the standard EN ISO 1461. Our annual consumption of Zinc is approx. 1600t.
- 2) Powder coating – 3 spraying cabins with dimensions 1x1x1m. The coatings are dermatologicly tested and clean.

We are holder of certificate for norm ISO 9001:2000 from 28. Jun 2006.

For further information about our company or potential cooperation please consult our web-site (www.kovotvar.eu) or contact us directly:

BIONT

Contacts:

BIONT, a.s., Karloveská 63, 842 29 Bratislava, SLOVAKIA
tel.: +421-2-2067 0749, fax: +421-2-2067 0748
e-mail: biont@biont.sk, web: www.biont.sk

The state owned Joint Stock company BIONT, a.s. has been established since January 21st 2005, according to the Slovak Government's resolutions Nr.1003/2004 and Nr.1195/2004 from October 2004 and November 2004 respectively.

BIONT was grounded with the aim to establish a multi-purpose centre and production facility ensuring:

- production of radionuclides and radiopharmaceuticals,
- radiopharmaceuticals application in nuclear medicine diagnostics,
- the basic and applied research in radiochemistry, physics, biology and medicine.

During the years 1994-2004 the International Atomic Energy Agency provided, within the frame of technical co-operation program SLR/2/002, and except the basic laboratory and production equipment and expertise, the most valuable help in the implantation of necessary knowledge. There was lack of experience in the field of radionuclide and radiopharmaceuticals production, and Slovak scientists were getting necessary know-how and experience of best practice at European cyclotron facilities (Berlin, Bologna, Copenhagen, Darmstadt, Debrecen, Dresden, Geneva, Groningen, Helsinki, Jülich, Jyväskylä, Karlsruhe, Louvain-la-Neuve, Manchester, Prague, Turku and Uppsala).

Thanks to these preparations, the period from the technical accomplishing of technology till its performance, operational qualification and licensing was squeezed to less than one year.

At present, in the BIONT's main building the essential company laboratories and departments are located, as the

- department of radiopharmaceuticals production and quality control,
- nuclear medicine PET centre,
- medical radionuclides and radiopharmaceuticals research and development unit,
- department of nanotechnologies.

The technology for **radionuclides production** involves:

- [¹⁸F]FDG (routine production by TRACERlab MX_{FDG} module, 50-80 GBq per run),
- [¹⁸F]DOPA – pilot synthesis,
- [¹¹C]CH₃ / [¹¹C]raclopride / [¹¹C]methionine – pilot synthesis, and also targetry for [¹⁵O]O₂ and [¹³N]NH₃, production is available. A solid target COSTIS and a TERIMO separation module are qualified for production of the positron emitting radionuclides complementary to SPECT radionuclides, e.g. ¹²⁴I - a new IAEA TC project SLR/4/010 launched in 2005.

The production of [¹⁸F]FDG radiopharmaceutical for cancer diagnostics was launched commercially since February 2006. To the end of August 2007, production units ensured 800 commercial deliveries of [¹⁸F]FDG at average activity 4.3 GBq at customer reference time.

All production laboratories were built to fulfil the current European Union Good Manufacturing Practice (GMP) guidelines for human drug production, regulations for radiation safety, health care, and environmental protection:

- Slovak Republic Radiation Protection Act 470/2000.
- Slovak Republic Health Care Acts 272/1994 and 576/2004.
- Slovak Republic Drug Control Acts 140/1998 and 663/2004.
- EC Directives 99/11, 99/12, 2001/83, 2003/94, and 2004/27.
- ICH Q7A Guidance for Good Manufacturing Practice.
- GAMP4 Guide for Validation of Automated Systems, ISPE 2000.

As an umbrella for all these regulations, a quality management system according to ISO 9001:2000 has been created since. In August 2007, the Lloyd's Register Quality Assurance (Lloyd's Register EMEA, Prague Office) approved it as applicable to the design, development and production of medical radionuclides and radiopharmaceuticals.

Nuclear medicine department – PET Centre is equipped with a PET/CT camera "Discovery LS", and a "Millennium Hawk Eye" SPECT/CT coincidence camera. The company owns also the PET tomograph operated at the St. Elisabeth Institute of Oncology Ltd. (Bratislava) and another SPECT/CT coincidence camera the Central Military Hospital (Ružomberok, North Slovakia) respectively. For the pre-clinical studies a laboratory equipped with a microPET for small laboratory animals has been created in cooperation with the Institute of Experimental Endocrinology of the Slovak Academy of Sciences (Bratislava).

Department of nanotechnologies comprises several laboratories equipped as follows:

- Electron cyclotron resonance (ECR) heavy ion source DECRISS-2M with ion beam transport system and scanning to 120x120 mm² area
- UHV target chamber, with a rotary sample holder and variable sample temperature from -196°C to +1100°C, in-situ sputter-cleaning of the sample surface, and in-situ thin films deposition
- Spectrometer of Auger electrons with 20 μm electron beam. The absolute sensitivity 10⁻¹⁴ g, relative sensitivity 10⁻³ %.
- Scanning probe microscope (SPM) Solver P47 for high-resolution surface studies, modes: scanning tunnelling microscopy, scanning tunnelling spectroscopy, atomic force microscopy, phase imaging, magnetic force microscopy, electrostatic force microscopy, scanning capacitance microscopy, and nano-lithography).
- Mask Lifetime Test-bench (MLT) adapted for development of ion sources and testing of the ion beam induced erosion. It comprises:
 - Ion injector system with exchangeable ion sources (duoplasmatron, RF, PIG, multicusp)
 - Target chamber with 4 motion precise goniometer and beam characterization system

The company **research projects and cooperation** with other institutions include:

- Production of positron emitting radionuclides complementary to SPECT radionuclides, IAEA - SR TC project SLR/4/010.
- Charged Particles Nanotech (CHARPAN) – EU 6FW IP.
- Multifunctional Oxide Layers - Slovak Grant Agency for R&D.
- Development of new superhard materials based on carbon and nitride layers with emphasis on diamond and cubic boron-nitride - Slovak Grant Agency for R&D.
- Nanostructures for cryoelectronics, sensors and metrology - Ministry of Education Applied Research project.

Leader in printing magazines,
catalogues and flyers

Slovenská Grafia is the Central European leader in the field of magazine, catalogue and advertising material printing. After five years of intensive investments exceeding EUR 33 million it may rely on state-of-the-art printing technologies.

Nowadays it cooperates with the most important European editor houses such as Axel Springer, Sanoma, Bauer Media or Ringier. More than 50 percent of production is exported with focus on demanding markets of the European Union.

The printing company offers full service

• Pre-press • Press • Post-press

Slovenská Grafia is the only printing house in Central Europe able to employ three techniques of printing. It has technological facilities for sheet-fed and rotary offset as well as for rotogravure. It delivers its services in a full variability of formats and thanks to top hardware and software it facilitates communication and acquisition of data from all parts of the world.

ZSSK CARGO

We offer more than a service, we offer future

Have you decided to transport consignments by railways? Do you hesitate which partner to choose?
We present you advantages, you might benefit from by cooperating with ZSSK CARGO.

Wider and richer range of carriage and transportation services

For 160 years we have been meeting our customers' transportation requirements and following their needs on everyday basis. Throughout this time we have gathered a lot of experience and knowledge, which are irreplaceable. Due to that, nowadays you can be offered the widest palette of rail carriage and transportation services representing more environmentally-friendly and safer option of freight transport.

High-quality ancillary and support services

Our primary target is your satisfaction with provided services and products. That is the reason why we keep on working on extending the range of ancillary services related directly to execution of conventional freight and intermodal traffic, intended to provide the most comfortable handling for conveyance and its realization. We provide top information services, services of safety advisor and large variety of carriage and procurement services. Providing services of maintenance and repairs of tractive stock, passenger coaches and freight rolling stock for our customers and our own fleet represent another important support activity.

Complex transportation services

If you need to transport small or large volume of any commodity, we are always able to respond to your requirements by offering safe and reliable fulfilment of your needs. We provide transportation via block trains as well as single wagon shipments. ZSSK CARGO is the only company providing certified product – logistic trains. All block trains being part of intermodal transport system are certified.

Network of business managers and business representatives covering full area

We do not believe that quality is the only important attribute of our services. Service must be available as well. According to this belief, our company has built a broad network of business managers and representatives, who take care of our customers day by day and who are ready to find optimal solution for your transportation needs.

Loading capacity and appropriate structure of rolling stock fleet

In order to satisfy your transportation requirements, we surely dispose of the widest, the most varied and the most powerful rolling stock fleet. We guarantee safe and reliable carriage of any commodity to any tariff post. Besides this, we regularly pursue your needs and abundantly allocate our investments in order to optimize our rolling stock fleet.

Dense network of tariff points for handling in consignments for conveyance covering almost the whole territory of Slovakia

We have built a large network of tariff points daily employing over 10,000 employees ready to satisfy your needs in a qualified manner. More than 380 places all over Slovakia are ready to advise you professionally and assist you with handling in your consignment for conveyance as well as eventually, provide additional services.

Favourable price conditions and price flexibility

We esteem our customers and provide them with price advantages agreed in Contract on freight transport conditions and Price Agreement, as well as other privileges by virtue of agreed guarantee of specific volume of goods to be transported.

WATER RESEARCH INSTITUTE

**Well-established tradition
of research, development,
consultancy and advisory services**

The Water Research Institute was established in 1951. It is a government-subsidized organization, which has gradually formed its stable and irrevocable position in the system of water management. It is the only organization in Slovakia that conducts comprehensive water management research. WRI is a research-development institution with national and international scope and it has at disposal large sets of data essential for preparation and updating of water management documents, national conceptions, as well as database administration and national information system in the water management.

Our offer: all about water

- Analyses of water samples
- Expert opinions
- Studies on drinking water supply
- Waste water treatment and collection
- Flood protection programmes
- Cooperation on transboundary rivers
- Making of water management legislation and formulation of fundamental national conceptual documents in water management sector

Our priorities

- Area protection against the harmful effects of water and elimination of adverse effects on water system following climatic change expectations.
- Reasonable use and protection of water resources against pollution.
- Redistribution of collected surface water in land for requirements of water regime regulation.
- Ecosystem and food chain protection against deleterious and extraneous substances.
- Activities resulting from the strategic document for the Water Framework Directive in conditions of the Slovak Republic

Rüdiger J. Schulz joined the Slovak Telekom company in November 2006. He holds the position of the Senior Executive Vice-President – Chief Operations Officer (COO) and is concurrently serving as acting Executive Vice-President – Chief Information Officer (CIO). We talked to him about how he evaluates his work in the company and what is his opinion on the Company's future development.

You have been employed by Slovak Telekom for more than a year. What are the new measures which you have adopted as the member of the Company's top management?

From the very beginning it was necessary to involve in the development strategy of T-Com imperatives which were necessitated by the telecommunications market evolution. I therefore decided for additional investment in the optical access network building. Today, we are the biggest broadband Internet provider in Slovakia intending to become such provider also in the Internet protocol television area: IPTV.

Which achievements are you proud of especially?

We launched Magio - our IPTV Product - on the market at the 2006 year-end. The competitors came up with similar services for the market as late as last year. However, they did not manage to

outdo the functionalities and possibilities of our triple-play. After the introductory year of its provision we are certain of the new technology reliability to such a degree that we have made it possible the customers to install Magio at home without the assistance of technicians this year, under very favourable price terms. We are trying to find a friendly way in the provision of the services to our customers and such possibility will for example result in faster service installation.

People were mainly increasingly interested in 4G Internet last year, but Slovak Telekom was not prepared to handle all orders in time. What was the problem thereof in your opinion?

Our total share in the broadband Internet market achieved the level of 58% in the past. The share significantly dropped for some time with the competition entry. We therefore offered DSL without fixed line to all

Slovak households, which has increased the number of DSL accesses sold from approximately 3,500 to 7,000 per month. With 90% self-installation share we were only installing 350 accesses till that time, which number has increased tenfold to approximately 4,000 with the launch of DSL without fixed line. We were not adequately prepared for such huge success, but we immediately reacted to the situation and managed to get back to the standard workload at the end of September 2007. Our share in 100 new customers being interested in the Internet reaches 48% today. We communicated the public at the beginning of January that we had 250 thousand DSL customers using both the T-Com connectivity and the programmes; from the viewpoint of net accesses, the number is, of course, higher.

The Orange company is your biggest competitor on the Slovak market. Is the T-Com brand ready to face its quick increase in its penetration of fixed line services and TV in the households?

We are now making a large investment in campaign focused on making our services more attractive trying at the same time to increase our DSL technology and optical infrastructure penetration as quickly as possible. Both these activities will render us possible to win more customers than the competitors could win. We are convinced that though the competition has started to build the optical infrastructure for Slovak households earlier, thanks to the reliability of our products we will certainly outdo it in the Triple Play area. Along

with the optics introduction in residential blocks built by major developers we also intend to offer digital television and super high-speed Internet to roughly 150 thousand households living in blocks of flats of the biggest Slovak cities. Last year's and this year's investments in optics and ADSL2+ technology, thanks to which Magio is available, exceeded 2 billion Slovak koruna.

The employees have already noticed the news from Deutsche Telekom regarding T-Home, a new brand, which should replace our hitherto product brand of T-Com. When can we expect the change in Slovakia?

We do not plan to do rebranding in 2008; at the yearend we will decide whether it is to be done in 2009. At all events, we will give more focus to the "T" itself, like Deutsche Telekom in Germany does. This year, the T-Com brand will also be supported by means of T-Com Fiesta and Fiesta Pláž (Fiesta Beach) projects which enjoy vast popularity. In winter months we have started their winter version providing the favourite Magio Klzisko (Magio Ice Rink) on the shore of the Danube River in Bratislava.

At which products do you want to focus in the near future?

We will naturally sell our Magio product the demand for which is roughly twice as high as the ADSL2+ technology or optics penetration allows us to sell, which means that we will also try to improve the coverage. In any case, we are going to offer several new conveniences to our customers, like for example Internet using via telescreen by means of television remote controller, TV polling, chatting, exchange of interactive content among the users, etc. The issue is the provision of greater communication possibilities at the continuously increasing data transmission rates.

Bratislava Ružomberok Dolný Kubín

Dear Sirs,

Slovak Chamber of Commerce and Industry as a member of International Chamber of Commerce in Paris and member of Eurochambers in Brusel is a statutory acted in whole Slovakia, which represents and coordinates common interests of members in domestic and foreign business activities.

Slovak Chamber of Commerce and Industry was constituted by Law No. 9/1992 in 1992, raised on rich experiences from activities of Chambers of Commerce and Industry in the territory Slovakia, which history stretch back to the half of 19.century. In the year 2008 we celebrate the 158th anniversary of chamber system creation in Slovakia. Dimension of these chambers far and away exceeded the economy border what helped to keep national identity and economic, cultural and social life development in Slovakia.

Slovak Chamber of Commerce and Industry for whole bygone period was the important institution in the process of changes. Institution, which by respecting rules of game is recognized by others and using this position to assert interests of Slovak economy in abroad and to create position of business branch in domestic social environment.

The basic relation and structures for direct participation of Slovak business structures to global and European markets has been created by Chamber in the past. The creation of Slovak Committee for Business and Industry (BIAC) by OECD, Economic and Social Council (ECOSOC) as consultative body of European Commission and National Council of International Chamber of Commerce in Slovakia represent principal steps to worthful participation of slovak economic subjects on decision making process in international economy.

The Chamber as a business institution wants to support changes in regional and occupational structures for economic development of Slovak Republic, for development and business protection, development and international trade alleviation and increase competitiveness of Slovak business subjects. The Chamber will support development of private entrepreneurship, will contribute to the long term strategy of develop-

ment of economy of Slovak republic. In close cooperation with National Bank of Slovakia will participate in the process of preparation of slovak companies to implementation of euro currency in Slovakia. Chamber will continue in supporting mainly SME's to penetrate more actively to the unified market of EU 27 as well as to the market of third countries.

The Chamber on behalf of service approach to own members and also non members and foreign partners has constituted 9 regional chambers in the residence of all regions and further 3 offices in important business centres of Slovakia. Chamber has created 6 consultative bodies, representing namely legislative, economic, foreign trade, industrial, informatic and regional. Apart of this there are 20 special departments with whole Slovakia activity, which are created based on principle relation of line of business.

Our today's role is to contribute to the economic and social transformation and to her reform to society of prosperity and perspective. The Chamber feels own liability also for active connection of Slovakia to global flow in the area of knowledge, finance, technology, industry and trade.

We are sensible to the fact, that in the period of continuing world economy internationalization and global process the international trade and international business are one of the most important attributes for assurance of steady and sustainable development.

I am sure that also this publication can partially contribute to improvement of the trade and economic relations and contacts of Slovak business subjects with foreign partners.

Peter MIHÓK
President SCCI

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

The Region of Banská Bystrica

The region of Banská Bystrica is located directly at the Centre of Slovakia and it comprises 8 districts. Its territory covers an area of 5.129 sq. km and its population is 397 356. The centre of the region is the city of Banská Bystrica with a population of almost 90 000.

The region is connected to the international road and rail network. Sliač airport, which is situated just ten minutes by car from Banská Bystrica, offers new possibilities for air transport of persons as well as goods.

Existence of thermal medicinal springs offers a significant possibility for development of tourism. In the spas of Sklené Teplice, Dudince, Sliač, Kováčová and Brusno are treated nervous, kinetic and digestive disorders and cardiovascular diseases. Natural and climatic conditions also create good opportunities for tourism, agro-tourism, winter and water sports and hunting.

Attention of tourists has been turned to urban monumental reservations in Banská Bystrica, Banská Štiavnica and Kremnica. Banská Štiavnica town, together with its surrounding area has been registered by UNESCO as the world cultural and natural heritage.

Among other interesting places belong castles in Zvolen, Víglaš and Slovenská Ľupča; fort in Bzovík; wooden church in Hronsek; St. John's church, where the geographical centre of Europe is located; folk architecture of the mining settlement Špania Dolina; attractive Čiernohorská narrow-gauge railway in Čierny Balog.

Raw material base of the region is various. Concerning the ore raw materials, the deposits of golden and silver ores, lead, copper and zinc are historically known around Banská Bystrica, Štiavnica and Kremnica.

Resources of non-metallic raw materials are more important from economic point of view. There are resources of building stones in the region such as limestone, dolomite limestone, ceramic clay, brick earth, gravel and gravel sand, basalt and perlite. Very important are also resources of wood substance.

Natural originality of the region is emphasized by state natural reservations, number of protected natural creations and localities. Geographically, the region includes National Park Low Tatras, protected scenic area Veľká Fatra, Poľana and Štiavnické Vrchy.

The education in the region is provided by the system of 338 elementary schools, 25 grammar schools and 61 secondary vocation schools. There are also two universities in the region. The University of Matej Bel in Banská Bystrica, specialised in the field of human sciences and the Technical University in Zvolen.

The region of Banská Bystrica is characteristic by notable diversification of industrial sphere, however, economic potential of individual districts has its own specifications.

The most important industrial sectors include heavy engineering and machinery, metallurgy, building industry, wood processing and paper industries, chemical and pharmaceutical industries, textile and food industries. 7,3 percent of the total number of Slovak enterprises operate on the territory of the region. There are 737 companies with foreign capital in the region. The most successful of them are SLOVALCO a.s. Žiar nad Hronom, IZOMAT a.s. Nová Baňa, Fermas spol. s.r.o. Slovenská Ľupča, WITZENMANN SLOVAKIA spol. s.r.o. Vlkanová, KÜSTER-car technique spol. s.r.o. Vlkanová. Also foreign companies do business in the region, such as Coca Cola, McDonald's, Tesco Stores, Billa, Baumax, Ahold etc.

The priority of development of the region is to stay attractive for foreign investors. As the main reasons to invest in the region are considered:

- favourable location, proximity of an airport with an international statute
- ideal conditions for further development of tourism
- raw material and economic basis available
- freely available qualified and highly specialised labour force
- high proportion of persons with higher education

The Region of Košice

THE BASIC INFORMATION

The modern history of Košice Regional Chamber starts in the year 1992 when it was re-established according to the Act No. 9/1992 passed by National Council of Slovakia concerning chambers of commerce and industry. At the same time, The Slovak Chamber of Commerce and Industry was established as an independent legal subject. The present activities of the Košice Regional Chamber of Slovak Chamber of Commerce and Industry are very closely connected with the Chamber's history which goes to the year 1850. This fact proves, that Košice Regional Chamber is the oldest chamber in the territory of Slovakia and one of the oldest in Central Europe.

The Košice Regional Chamber represents member companies of the whole Košice Region and plays an important role in domestic and foreign trade with special attention to the markets of the Eastern Europe and Russia.

The Košice region is located in the eastern part of the Slovak Republic the with area that exceeds 6700 km² and has more than 765 thousand inhabitants. Nowadays, Slovak authorities have registered more than 30 thousand entrepreneurial entities with all types of business activities within the Košice Region. The most important kinds of industries allocated in the region are: metallurgy, engineering, chemistry and textile production.

PROVIDED ACTIVITIES AND SERVICES

- Co-operation with commercial and industrial chambers abroad (organising business missions, seminars, meetings on economic co-operation, publication of commercial promotions, seeking trading partners, exchange of commercial policy documents and other information),
- Consultancy on legal, financial, commercial and customs issues,
- Customs and certification services (issue of ATA Carnets, authentication of certificates of origin of goods, commercial invoices, powers of attorney, "force majeure", contracts, letters of reference),
- Librarian and information services (contact data of foreign and domestic companies and other information concerning trade conditions and doing business in selected countries).
- Educational activities (organising seminars, workshops and conferences on current issues of International trade, trade logistics and business.)
- Publication activities (specialised publications for support of business and reduction of trade risks, publication of current general standards in international trade, publications concerning technical, economic and legislative issues.)
- Facilitation in property disputes in international trade of domestic subjects at the Court of Arbitration of Slovak Chamber of Commerce and Industry in Bratislava.
- Promotion of members of Slovak Chamber of Commerce and Industry through the network of the International Chamber of Commerce in Paris and other information media in co-operation with chambers of commerce and industry abroad and branch offices of the World Trade Center.
- Mediation and publications of business opportunities, offers and other business information for foreign and domestic companies. Presentation and representation of members of the Chamber at domestic and foreign exhibitions and other events.
- Co-operation with representative offices of the Slovak Republic abroad.
- Co-operation with embassies of the Slovak Republic and their commercial sections.

The Region of Lučenec

Introducing the region of the Lučenec Regional Chamber

The region is situated in the southern part of central Slovakia. It consists of five districts: Lučenec, Rimavská Sobota, Veľký Krtíš, Poltár and Revúca. It is formed by historical areas of Novohrad and Gemer. The region is mostly a lowland and high-located places are situated only in the northern part. The heart of the region is the geomorphological whole of the Southern-Slovak Hollow. The area is bordered on the Krupinská planina (Krupina plain) in the north-west, on the Slovenské Rudohorie in the north and on the Slovenský Kras in the east. The area of the region is 4329 km with the population of 267 286 (2001) and with the average density of population 62 people to 1 km.

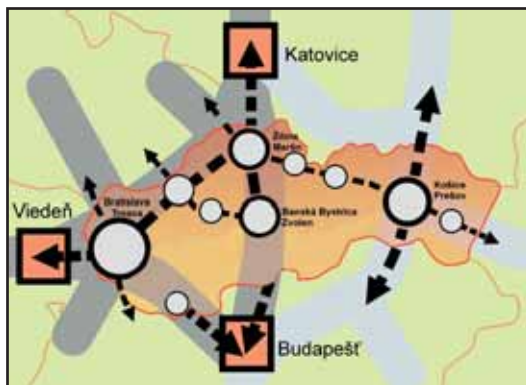

The southern border on the Hungarian Republic suggests good contact between the population of both border regions in industry and culture. That's why the Slovak-Hungarian Chamber composes inseparable part of Lučenec Regional Chamber. It provides economic, statistical, legislative information and requested adresses and contact details about Hungarian firms for its members.

The region is rich in raw materials. We can find here magnesite (the region comprises of more than 6% of the total world resources especially in the surroundings of Jelšava, Ľubeník and Hnúšťa), heat-resistant loams, basalt, ceramic raw material, natural decorative stone, steatite, asbestos, the raw materials of the silicate industry (diatomite, algin, etc.). Natural resources form an important potential of further production development of the region. These facts were the basis for creating Non-metallic raw materials Section of the Slovak Chamber in Lučenec. The section unites Slovak firms and institutions which deal with searching, exploiting and processing of non-metallic raw materials. Every three years the conference about non-metallic raw materials named EUROSILIKÁT is held in Lučenec. The main objective of the conference is to widen knowledge about new and unconventional non-metallic raw materials and their technological use.

Transport and energies

The region has the advantage of its location. It offers the shortest transport connection between western and eastern Slovakia and its metropolises Bratislava and Košice and connects links between Budapešť and Varšava. The region has its local airport Boľkovce (8 km from Lučenec). Its location offers excellent conditions for a passenger transport as well as air sports. The airport has been the seat of the World Parachuting Championship for several times. The nearest international airport is in Sliač (60 km from Lučenec). As for the energy lines (oil-pipeline, gas-pipeline, power lines) the southern Slovak transport corridor is being used in the direction Bratislava - Nové Zámky - Šahy - Veľký Krtíš - Lučenec - Rožňava - Košice. Lučenec is the centre of local energy institutions such as gas industry, power stations and optical telecommunication lines.

POLICY OF RESIDENTIAL STRUCTURE CENTRES

MAJOR PROJECTS IN THE AREA OF INTEREST URBAN DEVELOPMENT STUDY OF CROSSBORDER AREA

Lucenec RC has permanent interest in the development of the region mainly in the transport and institutional infrastructure. In 2007, „Agency of SCCI for development of transport industry“ was established and initiate preparation of „Southern multimodal transport corridor“ which could join Bratislava with Kosice – two the most important economic centres of Slovakia and which present elongation of the route number 17 Paris – Bratislava to the Kosice and Lviv.

The Region of Nitra

The Nitra Region in the Context of Foreign Investments

Only very few Slovak regions have such excellent preconditions for the development of international contacts and cooperations as has the Nitra region. This region extends from the mountain ranges Považský Inovec and Tribec in the north to the river Danube in the south and geographically it covers the prevailing part of South-western Slovakia.

This region is identical with the chamber region of the Regional Chamber of Commerce and Industry Nitra. The chamber region begins approx. 80 km easterly from the Slovak capital Bratislava and is surrounded by the other chamber regions Trnava, Trenčín, Banská Bystrica and Lučenec. The centre of the region is the historically famous town Nitra with approx. 90 000 inhabitants. The total geographic surface of the region represents approx. 6 344 sqkm and the number of its population is about 707 305 residents. The total number of the entrepreneurial subjects in 2007 was approx. 62 103. The traditional industrial branches of the region are the machine engineering, metal processing, electrical engineering, chemical industry, building material production and the automobile industry. Based on the excellent climatic and soil conditions very important are also the agricultural production and the food processing industry.

Concerning the size of entrepreneurial subjects there are typical here small and middle sized companies, which went through the transformation process to the market economy easier and more flexibly as many big factories in other parts of the Slovak Republic. In the recent ten years there was established here a large number of new producing companies by local Slovak entrepreneurs, which are successful not only on the Slovak but also on international markets.

The objective advantages of the region have been invented also by well-known foreign companies, from which many are present here with strong investment projects. To the most important foreign investments of the region belong such manufacturing plants as for example the SE Bordnetze-Slovakia Ltd. /cable systems for automobiles/, HEINEKEN SLOVAKIA jsc. Nitra /beer and malt production/, Giesecke & Devrient Slovakia Ltd. /smart cards/, SLUZBA SIIX ELECTRONICS /electronic appliances/, OSRAM jsc. Nove Zámky /electric bulbs/, TELEFLEX jsc. Vrable /automobile parts/, MATADOR AUTOMOTIVE jsc Vrable /automobile parts/, SMURFIT KAPPA jsc. Sturovo /paper industry/. The most important investors came to the region from Germany, Austria and Holland. Besides these direct investments a large number of local industrial companies cooperate very intensively with partners in the European Union supplying for them semi-products or carrying out certain finalizing operations on their final products.

The region has very good transport infrastructure with dense network of roads which contributes to the further intensification of the international contacts. The administrative centre of the region the town Nitra has direct highway connection with the capital Bratislava and thus also with the Slovak-Austrian border. Thanks to this highway connection and the good geographical position three international airports /Bratislava, Vienna, Budapest/ are available within three hours. In the town Nove Zámky 30 km southerly from Nitra there is one international railway junction and in the suburb of the town Komárno is the second most important river port of Slovakia on the river Danube. After the opening of the Rhine-Main-Danube channel the region has direct ship connection with the Black and North Sea.

Nowadays, the main task of the Regional Chamber of Commerce and Industry Nitra in the international sphere is the further support of commercial and cooperational contacts between Slovak and foreign companies. This target is based on the high interest of the local entrepreneurial circles for the intensification of business contacts mainly with the countries of the European Union and of Middle Europe. It is expected that thanks to the geographical proximity and good infrastructure, this region will attract the interest of further foreign investors. Naturally, the Regional Chamber of Commerce and Industry Nitra will be always ready to equip them with basic orientation in the current Slovak environment and to provide professional advisory services in all spheres of the economic life.

The Region of Prešov

The Prešov Regional Chamber of the Slovak Chamber of Commerce and Industry

The Slovak Chamber of Commerce and Industry, an integral part of which is the Prešov Regional Chamber (PRC SCCI), is an association of business concerns formed in order to boost the economic prosperity of its members, encourage their business activities both in Slovakia and abroad and assist in the creation of a positive business climate. The SCCI is a public institution established by Act 9/1992 of the National Council of the Slovak Republic and declared in Act 121/1996 of the National Council.

Membership in the Chamber is voluntary and its members are both natural and legal persons performing business activities in various fields of economy, with exception of agriculture and food industries.

The members have the right to:

- Use all services provided by the SCCI
- Service price discounts in accordance with the chamber's valid price list of services
- Propose and elect bodies
- Submit proposals for the improvement of the chamber's activities

The primary aim of PRC SCCI is to provide high-quality services to the business community in the Prešov region, to assist in tackling their business-related problems, to predict, analyse and define the needs of entrepreneurs and to offer solutions in the form of both tested and first-time services.

Provided standard services of the SCCI's Prešov Regional Chamber:

- Issuing of ATA carnets and certificates
- Counselling and consultations related with export and import of goods
- Counselling on the possibilities of financing business activities through the Structural Funds (ŠF)
- Services in the field of education
- Development of international trade relations - by organising trade missions at home and abroad
- Organisation of the participation of companies for fairs and exhibitions
- Publishing, distribution and sale of specialised publications

The plan for the Chamber's activities for each year is approved at the plenary session of the PRC SCCI and is outlined on our website www.po.sopk.sk. Members of the PRC SCCI are kept regularly informed about all events organised by the Chamber.

- the territory of the SCCI's Prešov Regional Chamber is the Prešov Self-governing Region
- the PRC SCCI also has an office in Poprad

The Region of Trenčín

Location & Accessibility

- Trans-European corridors North-West
- mutual border with Czech Republic
- 1 hour access to Capital City perspective of new corridors
- located in the northwestern part of the Slovak Republic.
- Area of 4 502 sq. kilometers.
- Building materials such as dolomites, limestone, building stone, lime marl, brick raw material, and decorative stone can be found in the region. Mineral waters and thermal springs are used as a source of high-quality drinking table water. Wood resources are also of importance.

Social characteristics

Number of inhabitants:..... 599 847
Share of men / women 48,9/51,1 %

Structure of education:
Vocational & professional..... 43 %
High school..... 38 %
University degree 9 %

Economic. active population:..... 138 756
Average age: 38,37 years
Average monthly salary 540 euro

Unemployment rate: 4,76 %

EU experience:

- more than 60 % of population (any)
- more than 1 % companies for more than one year

Economic characteristics

The region has an industrial - agricultural character. Industry is prevailing. The main industrial fields are: Mechanical engineering and components production for automobile industry, chemical production and rubber and plastic articles production, Electro technical industry, Glass industry, Wood processing industry, Food processing industry and service sector with dominance of tourism. These fields can be characterized by:

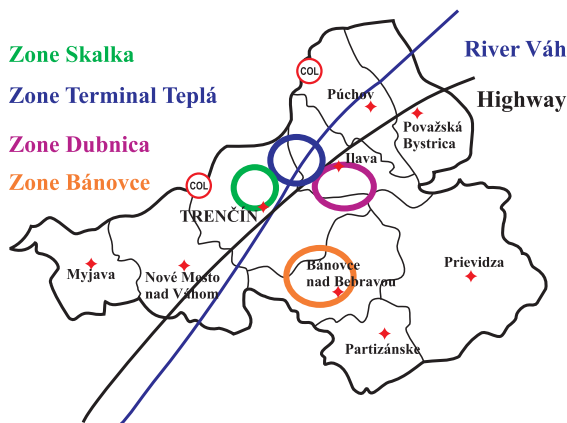

Number of registered businesses:
• legal entities 13 804
• tradesmen..... 44 079

An ownership type:
• public sector:..... 5,7 %
• private sector 94,3 %

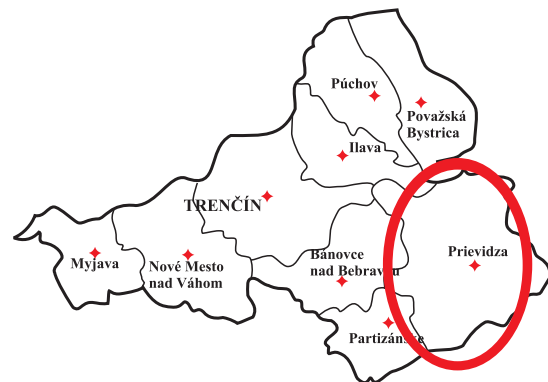

Emerging investment opportunities

Investors could find brown and green field opportunities for investments, skilled and educated labour force and well prepared infrastructure here. Active role in this area plays Trenčín Regional Chamber of SCCI in close cooperation with regional and local selfgovernmental units. It gives support to Slovak and foreign companies with regard to trade, legal, investment support. It provides legal advising and information on economic situation of the region. Special attention should be paid to the internet portal www.commerce-and-industry.com run by the Trenčín Regional Chamber of SCCI, where are available practical information on business issues and companies in the region.

The areas for industrial parks and terminal operations in the region Trenčín.

The locality of Upper Nitra with free areas.

Overview of the regional advantages

- good geographic location
- tradition of production
- presence of construction materials production
- good qualification level of economically active population
- well established infrastructure in the region
- availability of free areas for industrial production
- established services: banks, insurance and leasing companies, legal, engineering and project offices, exhibitions & fairs, CCI...
- good possibilities for development of tourism
- good natural conditions for agricultural production with a possibility to cultivate plants requiring higher temperature climate - cross-regional importance of hops cultivating
- woody country with favourable composition of forests
- suitable conditions for fishing and hunting

The Region of Trnava

Trnava Region

the region with its rich history, spiritual and cultural life, with fertile lowlands and protecting mountains, with rivers connecting people, the region of education, the region of good bread and good wine.

Location

Trnava region spreads across the south-western part of Slovakia. In the west it borders with the Czech Republic, in the south-west with Austria, in the south with Hungary. It takes to reach the capital Bratislava by car about 1 hour and the Vienna International Airport about 2 hours.

Transport and Infrastructure

The region has a well-developed road and railway transport system. Railways and highways connect the region of Trnava with Bratislava, The Czech Republic, Austria and Hungary. Public water pipes supply with drinking water 76,7 % of the region population, 41,8 % of households are connected to the public sewage system.

Education

53 technical and vocational schools provide machinery, transport, electrical, chemical, agriculture, food-preparation and other kinds of education. Secondary schools are aimed at business and services. The Slovak Technical University in Trnava offers degrees in industrial technologies, technical materials, industrial ecology, management and applied information systems. The Trnava University and The University of St. Cyril and Method offer possibilities to study in a large scale of humanities and natural sciences.

Economy

The region of Trnava has its tradition in both kinds of production: industrial and also agricultural. The industrial production includes machinery, /automobile industry/, electrical engineering, chemistry, glassmaking, printing, food industry. The main industrial centres are these towns: Trnava, Skalica, Senica, Piešťany and Hlohovec. The industry of agriculture and food is developed especially in the southern districts of Galanta and Dunajská Streda. The region of Trnava is a significant source of energy production for the whole area of Slovakia with its Nuclear Power Plant Jaslovské Bohunice and Water Power Plant in Gabčíkovo.

Trnava Region in numbers

Number of population:	555 075
Area:	4148 km ²
Number of profit companies:	9188
Number of physical persons	
/small entrepreneurs/:	43 756
Number of companies with foreign capital:	1850
Rate of unemployment:	9,00 %
Rate of registered unemployment	4,8 %

Taking into account the big investment of PSA in Trnava, the region of Trnava is expected to become one of the most dynamic regions in Slovakia.

Foreign investors in Region Trnava

Amylum Group /Holland/ • Boge /Germany/ • Danone /France/ • Hebel /Germany/ • INA Schaeffler KG /Germany/ • John's Manville /USA/ • Mariánské lázeňské /Czech Republic/ • Eissmann Automotive /Germany/ • ON-Semiconductor /USA/ • PSA /France/ • Punch International, N V /Belgium/ • Sachs /Germany/ • Samson Europe N. V. /Belgium/ • Sony /Japan/ • Swedwood /Sweden/ • Vitana /Czech Republic/ Samsung Electronic Slovakia /S. Korea/ • Faurecia /France/ • Datalogic /Italy/ • Elektronika Invensys /France + UK/

Trnava Regional Chamber SCCI

The Regional Chamber of Trnava is an integral part of the Slovak Chamber of Commerce and Industry, founded on January 1, 1997. The Chamber is a public - legal, nonprofit institution, providing activities in order to support and protect its members in their home country and also abroad. The chamber is the major representative of entrepreneurs in the region. It meets interest in business and the economical development of the region.

Activities and services of Trnava SCCI

- development of foreign trade relations /business mission, trade fairs and exhibitions, searching cooperating contacts, presentation of the region
- membership networking /database of members, meetings, clubs with VIP/
- organising of seminars, consultancy
- verification of documents - Certificates of the Origin, ATA carnets, commercial invoices
- wide range of informations services
- consultancy and support in project preparation, active participation in various EU projects

There are two Sections acting in Trnava: the Section of Welding and the Section for Agriculture and Food Industry.

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc. A few neutral figures:

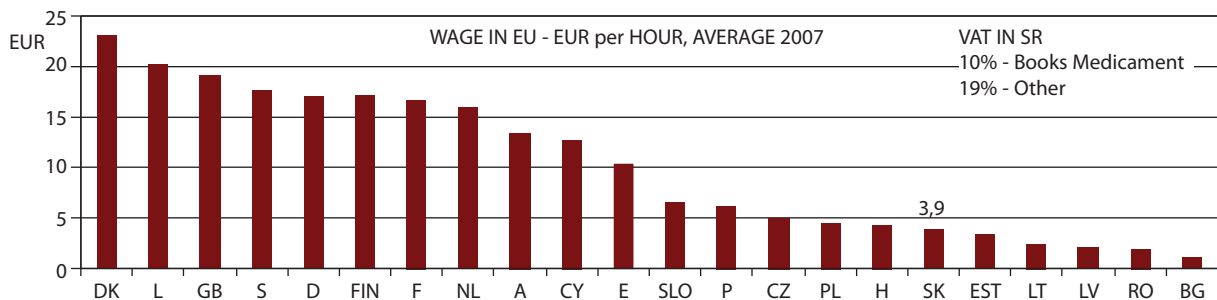

Fifteen years have elapsed since the Slovak Republic acquired independence. In these approximately 15 years the Slovak Republic had to prove evidence of its capability to manage the development of the county, assuring its political stability and economic development.

After three years of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Found, macro-economic indicators etc.

The Slovak Chamber of Commerce and Industry (SCCI) as a public - legal institution plays the role of the major representative of the entrepreneurial and business sphere in the Slovak Republic. The Regional Chamber of the SCCI in Zilina represents and co-ordinates the interests of its members in matters of business activity inland and abroad, renders services and protects them from unfair business relations in the following districts (1999): Zilina, Cadca, Martin, Dolny Kubin, Liptovsky Mikulas, Kysucke Nove Mesto, Bytca, Turcianske Teplice, Ruzomberok, Namestovo, TvrDOSin. The members of Regional Chamber SCCI Zilina come from the most industrial sectors including engineering, metallurgy, building industry, wood processing, paper industries, chemical industries, textile, food industries, brick industries, energy etc.

Our County located at the North-West of Slovakia is one of the most industrialized areas in the republic. Zilina is the city of the County. The region is connected to the international trunks roads **E 50:** (Brest/F/-**Brno-Zlin-Zilina-Martin-Ruzomberok-Liptovsky Mikulas-Presov-Kyjev**,...)and **E75**(..., Koper-Rijeka, (Szeged, Belgrade) -**Bratislava-Zilina-Zwardon-B.Biala-Katowice-Warsaw-Minsk**..).

North-Slovakia is a transport junction of international railways systems in the direction Poland, Czechia, Ukraine or the South - Trieste, Rijeka, Belgrade, Koper. Air transport is secured via the **Airport at Zilina**. The distance of the Airport from Martin is 37 km. Until the year 2011 Zilina, Liptov, Turiec, Orava, Kysuce will be connected by highways to Košice and the Polish border (Zwardon, B. Biala).

GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

“I mind the disregard for the culture that is centuries older.”

Alexander the Great (356-323 B.C.)

- NITRA, MIKULČICE, DEVÍN - centres, towns, castles
- Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĀTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907). Territory of the empire: Slovakia, Moravia, Pannonia, Czechia
- Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

- **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Svātopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;
- **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

- **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;
- Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

and will not let themselves enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are note evil-minded.”

- ~ **889** – Czech lands annexed to the Great Moravian Empire;
- ~ **906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;
- **890 -1000** ➔

Dissemination of material and spiritual culture From Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus. Methodius’ followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd. Centres of Slavic culture after Great Moravia: Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius’ cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**). Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

- Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;
- **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire
- Byzantine writing on Slavonic people: “Slavic tribes are accustomed to freedom

MUSEUM OF SLOVAK NATIONAL UPRISING

SLOVAKIA IN EUROPE'S ANTIFASCIST
RESISTANCE MOVEMENT 1939 - 1945
Stable exposition

The SNU Museum opened its new stable exhibition in the area of the SNU Memorial on August 27, 2004. The exposition presents Slovakia in anti-fascist resistance movement in Europe in the years 1939-1945. Compare to the previous expositions of the SNU Museum the new exposition is thematically, content and materially the most extended exposition of the SNU Museum, which presents the decisive political, military and social events of the Slovak history in context with the history of Europe in the years 1918 - 1948. There is a possibility to take a guide in Slovak, English, German and Russian language.

The first part of the exposition documents the preview to the topic and the main persons responsible for the murdering in Kremnička and Nemecká - the places of most numerous mass murders and extermination actions in Slovakia. The fundamental tendencies of the 'Ludak' regime and historical events, from the military suppression of the Slovak National Uprising by the Wehrmacht units and the Waffen SS to the seizure of the centre of the Uprising - Banská Bystrica, are documented there. The end of this part presents the retribution judicial tribunals after the war. It documents the trials with the POHG members, who were sentenced to long-term imprisonment or to death. The second part of the exposition (in the separate room) presents the extent of the reprisals in Western, Central and Eastern Slovakia and in the territories occupied by Horthy's Hungary. Part of the exhibition presents the reprisals against Roma citizens.

Memorial Nemecká
REPRISALS OF NAZIS AND THE MEMBERS OF THE FLYING
SQUADS OF HLINKA'S GUARD (POHG) IN SLOVAKIA
IN YEARS 1944 - 1945

STABLE EXPOSITION
IN TOKAJÍK
FASCIST REPRISALS
AT EASTERN SLOVAKIA

The village Tokajík was burnt down by Nazis on November 19, 1944. The exposition is on the former place of the Nazi reprisals in 1944 - 1945. The exposition is under the administration of the SNU Museum since the year 2008.

THE TRAGEDY OF SLOVAK JEWS
Slovak National Exposition in Auschwitz

The exposition presents the topic of the Holocaust in Slovakia in the years 1938 - 1945, with the stress to key milestones of the solution of the Jewish question during autonomy, the acceptance of the Jewish Code, the first wave of deportations (March-October 1942), the origin and activity of labour and interment camps, the second wave of the deportations in year 1944 and Fascist reprisals in years 1944-1945. Part of the exposition is The Documentary centre, where the visitors

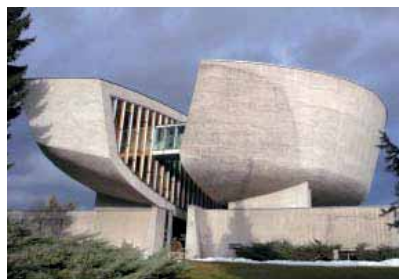

can look through the lists of each of the transports in a computer. They also can see the most important documents regarding the solution of the Jewish question in Slovakia between years 1938 - 1945 as well as the testimonies of the former prisoners.

Place: State museum Auschwitz-Birkenau in Oswiecim, ground floor of the block no.16

The village burnt down by Nazis on March 18, 1945. Kalište was declared the National Cultural Landmark by the resolution of the Presidium of the Slovak National Council No 24 from February 27, 1961. Two reconstructed houses with the new exposition opened on August 18, 2007, little bell house and the footings of the dwelling houses are there today. Kalište is under the administration of the SNU Museum, which can provide the visitors (after a request) with guiding tour there.

SLOVENSKÉ NÁRODNÉ MÚZEUM

Slovenské národné múzeum (SNM) je najväčšou múzejnou inštitúciou a rozsahom spravovaného majetku aj najväčšou kultúrnou inštitúciou v Slovenskej republike. Jeho história sa začala písať už pred viac ako sto desiatimi rokmi. V súčasnosti vo svojom zbierkovom fonde ochraňuje viac ako 3,5 mil. zbierkových predmetov zo všetkých vedných odborov a spravuje aj niekoľko desiatok objektov, z ktorých je väčšina zapísaných v Registri kultúrnych pamiatok Slovenskej republiky. Medzi nimi sú dve múzeá ľudovej architektúry v prírode, päť hradov, viaceré kaštieľov a kúrií, pričom mnohé z nich patria k najnavštevovanejším kultúrnym pamiatkam na Slovensku.

Poslaním Slovenského národného múzea je cielavedomé ziskávanie, ochraňovanie, vedecké a odborné spracovávanie a sprístupňovanie múzejných zbierok a fondov, ktoré dokumentujú prírodné bohatstvo, dejiny a vývoj hmotnej a duchovnej kultúry na Slovensku.

Sídlo SNM je Bratislava, ale jeho sedemnást špecializovaných múzeí s celoštátnou pôsobnosťou sa nachádza takmer vo všetkých krajoch Slovenskej republiky.

Medzi múzeá SNM so sídlom v Bratislave patria:

- SNM-Prírodovedné múzeum
- SNM-Archeologické múzeum
- SNM-Historické múzeum
- SNM-Hudobné múzeum
- SNM-Múzeum židovskej kultúry
- SNM-Múzeum kultúry karpatských Nemcov
- SNM-Múzeum kultúry Maďarov na Slovensku
- SNM-Múzeum kultúry Chorvátov na Slovensku

Mimo hlavného mesta Slovenskej republiky sídlia:

- SNM-Múzeum Ľudovíta Štúra Modra
- SNM-Múzeá v Martine
- SNM-Múzeum Slovenských národných rád Myjava
- SNM-Múzeum ukrajinsko-rusínskej kultúry Svidník

K atraktívnym hradným múzeám patria:

- SNM-Múzeum Betliar
- SNM-Múzeum Bojnice
- SNM-Múzeum Červený Kameň Častá
- SNM-Múzeum babkárskych kultúr a hračiek Modrý Kameň
- SNM-Spišské múzeum Levoča

THE SLOVAK NATIONAL MUSEUM

The Slovak National Museum (SNM) is the largest museum institution, and concerning the extent of administered property, it is also the largest cultural institution in the Slovak Republic. Its history began more than 110 years ago. At present, it preserves more than 3.5 million articles from all fields of science, and cares for a number of objects, the majority of which are recorded in the Register of Cultural Monuments of Slovak Republic. They include two outdoor museums of folk architecture, five castles and several manor houses and mansions, many of which are among the most visited cultural monuments in Slovakia.

The mission of the Slovak National Museum is to gather, preserve, scientifically evaluate, and professionally process the collection objects and funds, based on research and scientific analysis, and make them available as evidence of the natural wealth, history and evolution of material and spiritual culture in Slovakia.

Although its seat is in Bratislava, seventeen specialized museums with countrywide competence are situated in all regions of the Slovak Republic.

The following museums belonging to SNM are located in Bratislava:

- The SNM-Natural Science Museum
- The SNM-Archeological Museum
- The SNM-Museum of History
- The SNM-Music Museum
- The SNM-Museum of Jewish Culture
- The SNM-Museum of Carpathian German Culture
- The SNM-Museum of Hungarian Culture in Slovakia
- The SNM-Museum of Croatian Culture in Slovakia

Museums located in other regions are:

- The SNM-Ľudovít Štúr Museum in Modra
- The SNM-Museums in Martin
- The SNM-Museum of Slovak National Councils in Myjava
- The SNM-Museum of Ukrainian-Ruthenian Culture in Svidník

Attractive castle museums include:

- The SNM-Betliar Museum
- The SNM-Bojnice Museum
- The SNM-Červený Kameň Museum in Častá
- The SNM-Museum of Puppet Cultures and Toys in Modrý Kameň
- The SNM-Spiš Museum in Levoča

CENTRAL SLOVAKIA MUSEUM, BANSKA BYSTRICA

History of the Central Slovakia Museum

The history of the museum started in 1889, when the town council of Banská Bystrica at the meeting on 12th July 1889, approved the foundation of the Municipal Museum. In 1893 the

burghers formed a museum committee to support this museum. On 17th October 1909 in the historical Matej's House, there was handed the first municipal museum exposition.

In 1958 the exposition of that time Regional museum was open in the renewed building of Thurzo's house.

In 2005, on occasion of 750th anniversary of the town, the museum prepared the exhibition called Alive in Bystrica, after death in heaven. The visitors can still visit that exposition.

Opening hours:

Thurzo's House:

Mo-Fr 9.00 a.m. – 5.00 p.m.
Su 9.00 a.m. – 5.00 p.m.

The Museum of Kežmarok

The city castle of Kežmarok was built as a defensive castle. It is first mentioned in 1463 in connection with the Zápoľský family. Its history is linked with the

Thököly family which had the originally Gothic fort rebuilt as a luxurious Renaissance residence. They also built the baroque chapel. Last owner was Ferdinand Rueber and in 1702 it was bought by the town of Kežmarok. The castle burnt down several times in the 18th century and was repaired in the 18th and 20th century. General restoration work was carried out between 1962-1985.

The Museum was founded in 1926 and opened its first exhibition in 1931. Initially, this was a regional museum focusing on Kežmarok and its adjacent localities. Gradually its sociological orientation became crystallized.

Its headquarters are at the Kežmarok castle with its atypical situation practically right in the centre of the town.

Central Slovakian Gallery in Banská Bystrica

Bethlen House, Dolná ulica no. 8, in the historical centre of the town, is the home of the Central Slovakian Gallery in Banská Bystrica. Bethlen House is one of the most impressive and spacious buildings in Banská Bystrica.

Tradition has it that in 1620 the leader of the revolt of the estates, Gabriel Bethlen, was crowned king of Hungary here.

Bethlen House

On the present permanent exhibition of Slovakian graphic art of the 20th century is installed at the Bethlen House. Further exhibition rooms are located in the building of the former Praetorium, which is part of the town castle complex.

Praetorium

The family villa of artist Dominik Skutecký, who designed the villa in the style of Renaissance Revival with graffiti decorations, is home to the Permanent exposition of Dominik Skutecký's Artwork with paintings of the town of Banská Bystrica, family, portraits, and paintings capturing the unique atmosphere of copper hammer-mills.

Permanent exposition of Dominik Skutecký

There is exhibition space Room 19_21 on the first floor of Dominik Skutecký's villa designed for young artists shows.

Pohronie Museum Nova Bana

Pohronské museum in Nová Baňa was established in 1952 of the initiative of antique collector- Anton Solčiansky as civil museum.

Nowadays, the museum sourced historical development of middle Pohronie. Museum in Nová Baňa has more than 12 000 objects in fund of collections.

Pohronské museum is situated in former town hall. It is a four floor Gothic building built in 2nd half of 14 century. This building was reconstructed in 18century.

In collection fund, there are many archeological finds, remains of crafts, and folk production (carvings, ceramics ware, glass making), historical weapons, artistic reliefs. All of these artifacts document the history of region, first of all the history of the town Nová Baňa.

The model of atmospheric machine pumping water from mines is very unique remain. This machine was used for the first time in 1722.

Interesting artifacts could be find in all of exhibitions of Pohronské museum- archeological, ethnographical, volcano logical exhibits, history

of exhibit, naive art exhibits, historical photographs called "Novobanské reflexie".

Instead of permanent exhibit, Pohronské museum organized more than 12 exhibits per year. For people who are interested are available specialized presentations. Pohronské museum has scholarly library

The Andy Warhol Museum of the Modern Art Medzilaborce

The museum was open on Sep. 1, 1991.

The museum was founded

on the initiative of Andy Warhol's brother John, the arts teacher Dr. Michal Bicko, Vladimír Protivňák and the Club of Friends of Fine Art at Medzilaborce (FFAM).

This museum's predecessor was a little FFAM gallery which expended considerable effort, together with the Andy Warhol Society, in order that Slovakia would obtain an exhibition of works of one of best-know fine artists of the second half of our country, a foremost representative of the movement know as Pop-Art.

Besides three permanent exhibition (Andy Warhol's serigraphies, combined technique, serigraphies and paintings of Paul and James Warhol and an exhibition on Andy Warhol's origin), it also organizes on its premises exchange exhibitions, concerts, seminars and further events.

Homeland Museum Hlohovec

The museum in Hlohovec is a regional museum of homeland character. It was founded in 1959. The basic branches of social and natural sciences are represented in its collections. The exhibitions are situated in the main part of the museum which is a part of the Franciscan monastery. The exposition hall of the museum is situ-

ated in 6. Rázusová Street.

There are six expositions in the museum. They are the expositions of an ancient furniture, history of the town /Hlohovec – the feudal town/, exposition of nature, archeology, female national dress, historical portrait and graphic arts.

The exposition of an ancient furniture is situated in the original monastery's dining room /refectory/ with stuccoed decoration.

The precious furniture pieces are from the 18th century, especially cupboard with intarsia with striped figure decoration. One part of the exposition are oil-paintings with dominant, so called the painting of donation from 1743.

The exposition – 'Hlohovec – the feudal town' - represents the older history of Hlohovec. There are the documents about the activity of the self-government, the pictures of the town and the castle and the collection from the sphere of the crafts and guilds. The machinery of a tower clock and the treasure coins of František II. belong to interesting parts.

Upstairs, natural exposition of Hlohovec surroundings is situated. It is formed by the samples of the vertebrate animals which live in the close region to Hlohovec. They are exhibited in the windows. From the beginning of 1970s there are precious dioramas. The exclusive one is that of a deer in its typical natural surroundings.

The exposition of natural history and archeology is joined by the ethnographic exposition - 'Woman's folk costume'. Typical parts of

woman's folk costumes of Trnava, Hlohovec and Piešťany regions are exhibited in windows.

They are the costumes of Trakovice, Piešťany, Madunice and Pobedim.

In the archeological exposition there are exhibited archeological findings representing the periods of the primeval age and the earlier historical period. The precious pieces are the neolithic parts of Venuses from Hlohovec, then a large pin from the bronze period and a bronze bit from the Roman period.

The most precious piece is a sculpture of Jupiter Dolichen incrustated with silver from the 3rd century.

The space of the corridor in nothern part of the museum is used for the exposition of an ancient furniture and graphic art. The ancient oil-paintings, mainly from the 18th century, represent the members of the Erdödys and their relatives and the Hungarian rulers. The pieces of graphic art, mainly copper-plates are also from the 18th century and originally they were a part of the decoration of the Hlohovec castle.

Except of those expositions mentioned above there are constant expositions of ceramics, history of the Franciscan monastery and samples of ancient bells and stone sculptures.

The Gemer-Malohont museum

The fifth oldest museum in Slovakia.

The museum was founded in 1882 as a district museum. Since 1910 the seat of the museum is in the building of the former artillery barracks. Besides the regional culture, the museum is specialised to the gypsy culture.

The permanent exposition presents the geology, zoology, archaeology, history, ethnology and history of arts of the region. It owns a mummy of an Egyptian women.

A set of folk ceramics, paleontological and archaeological collections form a unique part of the exposition. Occasional exhibitions during the whole year.

Open:

Mon – Fri at 9:00 – 17:00, during the season (April – September) also on Sat and Sun at 9:00 – 16:00.

The Horehronie Museum

The Horehronie Museum at Brezno was set up as a homeland museum - of the then Brezno district - in 1960. Since 1965 it truly has the statute of a regional museum with special orientation to local history. It is located in the former Town Hall and in a renovated burgher house from the end of the 16th century. Both the buildings are cultural monuments.

The Town Hall, originally Renaissance, was given its present appearance during

late-Baroque adjustments in 1779-1780. The Museum administers a technical exhibit - a complete mangle, which is part of a farmer-artisan's property at Brezno.

The exhibition The Life and Culture of the People in Horehronie was open in 1980. In seven sections it puts on view the basic expressions of the people's material culture from this ethnographic region of Horehronie or the Upper Hron valley, its settlement, agriculture, wood cutting, fibre processing, architecture, dwelling, costume, fine art. The Exhibition Brezno shows the origin, development and shapes of the town up to the year 1918 and was open in 1992.

Opening Hours

The Vihorlat Museum

The Vihorlat Museum (Homeland Museum) at Humenné was founded in 1960

and since 1969 is housed in a Renaissance manor from the 17th century. The castle was built at the turn of the 17th century and is connected with the Drugeth family. They used it as the centre of their large feudal estate. This monumental fourwing mansion house with corner towers was rebuilt in the Renaissance style of an old moat castle. The appearance of this building is influenced by the baroque reconstruction and late-baroque adaptations of the interiors.

A park was laid out around the mansion house in the 19th century. The site was gradually reconstructed after a fire in 1946 and the castle now houses historical and natural museum collections. The park serves as an exhibition of folk architecture.

Námestie slobody 1, Humenné
www.muzeumhumenne.sk

The Šaris Museum

The Šaris regional museum at Bardejov was established in 1903 as a museum of the Šaris zhupa (district). The town put the building of the historical Town Hall, in a Gothic-Renaissance style from the 16th century, at

the disposal of the museum in which the first art-history exhibition of the history of Šaris was made accessible back in 1907.

The Šaris museum as a regional organization documents the development of nature and the society in the region of Upper Šaris. It enjoys an all-Slovakia competence in the domain of iconographic production of the Eastern rite and Eastern Slovakia is active in the domain of entomology.

Homeland Museum in Galanta

Renaissance manor

The first stimulus for setting up a museum in the Galanta district came from the ethnography circle formed by local teachers in 1958. The Local Council constituted as of April 1, 1969, the District Museum at Galan-

ta (since January 1, 1990 the Homeland Museum). Since 1970 it is housed in a neo-Gothic manor at Galanta. The manor, as the family mansion of the Estherházy was built on earlier foundations and rebuilt in 1860 in the style of Romantic English Tudor Gothic. General reconstruction works are being carried on it since 1986 and stopped in 1990, hence, the Museum is temporarily located in the building of a former bank in the centre of the town. Beside museum offices, there are also exhibition halls here.

**MUSEUM
OF THE SPIŠ
REGION**

**Exposition Nature and
history of the Spišská
Nová Ves Region**

The building of the Museum of the Spiš Region ranks among the most valuable historical objects in Spišská Nová Ves. Its foundations date probably from the 15th century. First it served as a town hall, later in 1774 it became the seat of the newly constituted Province of 16 Spiš Towns „Province House“.

Today this building with its interesting front facade of cartouches is one of the characteristic dominants of the town. Since 1951 it has been a museum.

A permanent exhibition „Nature and history of the Spišská Nová Ves Region“ has been installed there.

**-Exposition of historical
furniture**

Renaissance - style Markušovce mansion was built in 1643 by order of František Máriássy. Originally one-storey building with a high attic underwent a Rococo reconstruction in 1770 – 1775, when it was owned by Wolfgang – František Máriássy.

In the place of the original attic gable the peripheral walls were lifted and one line of illusive windows was added so that the building evokes the impression of a two-storey building. In the 1950 s the mansion was transformed into a museum. The collection, which shows

the development of styles, consists of 17th - 20th century furniture and appropriate paintings, domestic objects porcelain and glass.

**SUMMER PALACE
DARDANELY**

**- Exposition key musical
instruments**

In the last third of the 18th century summer palace Dardanely was built at the request of Wolfgang- Farkaš Máriássy for social and representative reasons. It is an outstanding monument of Rococo architecture.

The exhibition, which has been installed there, shows a collection of keyboard musical instruments (organs, pianos, table pianos, clavi-chords) made in the territory of Slovakia. Occasionally some concerts are held there, too.

**The Stará
Ľubovňa
Museum**

The Ľubovňa Museum (The Homeland Museum) was founded in 1956. At first it was housed in the Provincial building on St Nicholas's Sq., since 1966 its headquarters are in the Ľubovňa Castle. From its very beginnings the

museum collects historic, ethnographic, artistic and natural history items, concentrating on the area of Stará Ľubovňa.

Ľubovňa Castle

On the north of Spiš the Ľubovňa castle with its rich history and interesting architecture towers above the valley of the Poprad river. It is one of the most unique castles in Slovakia. Although it had originally guarded the northern Hungarian border, it was for 360 years the seat of power of the custodians of the Spiš areas that were temporarily given to Poland as a guarantee. It became famous for its numerous visits by the Kings. The Polish coronating jewellery was also hidden there for six years. The outstanding restoration in XVIth and XVIIth centuries changed the castle into the huge Renaissance fortress. The splendid alley at the foot of the castle and the nearby open-air museum with its unique wooden church only reinforce the peculiar atmosphere of Ľubovňa castle.

The Zahorie museum

The Zahorie museum is a regional museum of the Senica district, with special focus on the Zahorie or Tramtane region. It was set up in 1905 on the initiative of Dr. P. Blaho within the framework

of the so-called Catholic Circle or the Club House. The core of the fund consisted of private, predominantly ethnographic collections of the founder. In 1952 it came to be the Homeland Museum. After the territorial reorganization in 1960, it served as the Municipal Museum at Skalica until 1965, with an exhibition of nature, archaeology, ethnography, earlier and modern history. In 1965, its district competence was returned to it and it was given its present name.

House of culture in Skalica with the permanent exhibition of Záhorské múzeum

The original museum building designed by National Artist Architect D. Jurkovic, until 1989 housed both the exhibitions and the administrative sector. It is remarkable by its architec-tonic design and its artistic ornamentation. The facade is decorated with mosaic work according to sketches by the Czech painter M. Ales, in the so-called Theatre Hall the walls and the curtain carry paintings with folk motifs by A. Frolko and J. Uprka. The building is a cultural monument. The museum's workplaces are now located in the neighbouring - co-called Mittak's House.

The collections of the Zahorie Museum focus on archaeology, history, literary history, ethnography and musicology of the region.

Novohrad Museum and Gallery Lucenec

Novohrad Museum in Lučenec was established in the year 1955 as a District Museum in Halič. In the years 1967 – 1985 was re-located to Filákovovo under the

name of Novohrad Museum. Since the year 1985 has been settled in the monument building of county courthouse in the historical centre of the town Lučenec.

The bronze treasure-trove from Hodejov - found in 1960 during working in a quarry. It originates from the Bronze Age (approximately from the year 1450 B.C.). The found consists of 300 pieces, among them are pendants of different shapes: in the shape of heart, half-moon, funnel, massively casted spiral bracelets, torques, rings, necklace of amber beads.

The institution is supervised by the Regional Self-Government of Banská Bystrica. It manages over 25 000 archeological, ethnological, historical and artistic objects in its collection. Among others the most valuable are the collections of folk pottery, enamel ware and historical glass, which show the most characteristic branches of traditional production in the Novohrad area. The gallery collection represents the works of the artists who lived or were connected with Lučenec and its area.

It regularly organises international artistic competition called Triennial of Aquarelle (since 1983) as well as International Ceramic Symposium (since 1989). Museum owns a rich collection of contemporary ceramic art which is also presented on a permanent exposition.

Ján Thain Museum in Nové Zámky is a regional museum located in district of Nové Zámky. The museum was established after perennial antiquarian effort in 1936 due to Ján Thain, Ludvík Albrecht, Vojtech Szőke and Kazimír Šaško.

Klein House – seat of the museum

However, the museum and its collections were almost wholly destroyed during bombing in 1945. It re-established its activities in 1957 under the name of District Museum of National Geography. Ten years later, it had been moved to the Franciscan monastery where there were suitable conditions for creating archaeological, historical, ethnical and photo-documentary department.

Roman citizen, Caius Iulius Aemilianus's Gravestone, 2nd -3rd cent

In 1981 the museum became a specialized workplace focusing on issues in anti-Turkish revolt in the west of Slovakia. The museum was also focused on Anton Bernolák. A part of the full-range book fund is a so called "Blaskovics" library which containing more than 3,000 volumes. The volumes represent a valuable Ján Blaskovics heritage, who was a turkologist.

Burgher's clothes from 19th cent

After the reconstruction of a so called Klein House, the museum moved to its own premises in 2004. There you can find displays at archaeology, history, folk lore and commemorative rooms of

Anton Bernolák and Gergely Czuczor. In the courtyard, in lapidary, you can see stone exhibits from ancient world, barocco and the 20th century. House of Folk Living and Museum of Archaeology, detached expositions in Svodín are also parts of the museum, which has been awarded a prestigious prize. There you can see many world-famous exhibits from Paleolithic and Neolithic period.

PONITRIANSKE MUSEUM IN NITRA

The Ponitrianske Museum in Nitra is a regional museum documenting the development of the life and society in the districts of Nitra, Zlaté Moravce and Šaľa in the field of archaeology, ethnography, history, numismatics, botany, geology and zoology. It is located in a listed building of the Nitra town hall built in the Neo-Renaissance style in 1880.

Museum efforts go back to the mid of the 19 century when teachers and students of the Piaristic grammar school began collecting numismatics articles at first and then archaeological and historical articles. The official district museum was founded in 1896.

At present the Museum presents the exposition - Jewellery of Ancient Slovakia. The exposition of a treasury type represents a collection of singular archaeological findings – more than 2 100 of marvelous articles from almost of all Slovakia. They document social and economic development of the territory, that is the South-West of Slovakia from the Stone Age - Palaeolithic (30 000 years before Christ) up to modern times (17 century). They are an excellent evidence of stunning creative abilities,

skills and artistic feeling of their creators. Unique gold-plated plaquettes with winged figures from Bojná form part of the exposition and they were classified by the archaeologists as belonging to the beginning of the ninth century – the times of the Nitra principality.

The branch at Zlaté Moravce documents the development of the life and society in the district of Zlaté Moravce with its expositions and this branch is a treasure trove of palaeontological animals and monumental wood opals.

Every year the Museum prepares 15-20 subject exhibitions, several concerts, lectures, chats on various topics. It co-operates with other institutions, foundations, associations and individuals whose ambition is near to the mission of the Museum.

The Danube Region Museum

The Danube Region Museum in Komarno has functioned from its founding in 1886 until the end of the World War II in the framework of various museal and educational societies.

The Komarno District Museum was established in 1948 and was renamed into Danube Region Museum in 1949. The museum's rich stock of collections represents over 136 thousand pieces of collections the great part of which can be seen both in its permanent and periodic exhibitions.

The main building of the Danube Region Museum Komarno, Palatinova Street 13

The museum's Roman collection is the largest in its kind in Slovakia. The main building of the museum, the so-called Culture Palace was built in 1913 in the city centre according to the plans of Dezso Hultl, an architect from Budapest. The museum has other buildings used as stores and showrooms: the Zichy Palace in the city centre, the rebuilt building of the former county court of law, and also the Fortress VI in the suburb which was built in the 19th century as a part of the line of fortifications in Komarno.

The Museum's Friends' Circle has been working already from 1972 and has 99 members today. In coordination with the schools the museum realises numerous educational programs

The Tribeč Museum Topoľčany

The Tribeč Museum Topoľčany is a regional museum with special focus on the area of the Slovak Republic.

Its activities include scientific activities, preservation of collections, presentation, methodologic, educational, publishing and editorial activities in particular disciplines of sociology and natural science. The founder of The Tribeč Museum Topoľčany is The Nitra Self-Governing Region.

The museum in Topoľčany was founded on 1st March 1961 under the former name Vlastivedné múzeum v Topoľčanoch (Homeland Study Museum Topoľčany). The activities of The Tribeč Museum Topoľčany are focused on setting up of collections with natural scientific, archeologic, historic and aethnologic character. Since 1982 the museum has concentrated on documentation of hop wine processing industry, malting and beer brewing industry in Slovakia.

The Tribeč Museum Topoľčany disposes with a large number of valuable exhibits in its collection either as solitaire exhibits or as complete collections. These exhibits include for example collection of glass industry products, collection of historic weapons, numismatic collection, rare archeologic findings, rare botanic exhibits and dermoplastic specimen of several animal species. The most valuable exhibits are

the fossil remains of cenozoic proboscidian mastodon because of their rare and ancient character. The part of the skeleton – skull with well preserved tusks is a part of exposition called Príroda stredného Ponitria (The Nature of Central Part of Nitra River Valley).

The Tribeč Museum Topoľčany offers to its visitors the possibility, within its presentation activities during the year, to see the natural scientific exposition, expositions with focus on different themes, lectures, seminars, art and knowledge competitions, animation events and workshops. The visitors can make use of our specialised library methodologic and advisory services.

EAST SLOVAKIAN MUSEUM IN KOSICE

Invites you for a visit to its permanent exhibition.

Historical purpose building of East Slovakian Museum in Kosice

THE PEOPLE - Creator of Lasting Values - archeological and historical exhibition

This exhibition of the older history opens up for the public the historical development of East Slovakia from the first material proofs of human existence on this territory until the year 1848.

Photo from exposition THE PEOPLE - Creator of Lasting Values

The Golden Treasure of Kosice

The find of golden coins from the 15th - 17th centuries is the largest treasure found on the territory of Slovakia, it contains 2920 coins, 3 medals and Renaissance chain. The exhibition is completed by three other treasures - the Bohdanovsky treasure, the "small" treasure of Kosice and the treasure from Velky Folkmar.

Gold coins from exposition The Golden Treasure of Kosice

Money in the History of Slovakia

The exhibition presents in brief the development of money on the territory of Slovakia from the 2nd century before Christ until the year 1992.

The Exhibition of Jewelry

The exhibition of jewels and jewelry artifacts presents the most significant art handicraft in Slovakia. From the pre-historic times to

present day it documents the individual creative work of goldsmiths, machine processing of precious and other metals as well as individual production of jewelry in studios.

The Nature of the Carpathians

The exhibition is devoted to the nature of the Carpathian region. In geological part there are presented material documents from historical geology, paleontology and mineralogy. Botanical and zoological part of the exhibition presents documents on occurrence of plant and animal species in mutual ecologic links.

Photo from exposition The Nature of the Carpathians

Centuries in Arts - arts-historical exhibition

This exposition presents to the visitor the development of art from the early Middle Ages to the early 20th century. In the first part of the exhibition dominates the sacred art, while the second part points out details of interiors, showing the way of living from the 18th century until the early 20th century.

Photo from exposition Centuries in Arts

The Centuries of Košice - The Mikluš prison

The exhibition is adapted to the interior conditions of the former prison, presents the history of town of Kosice to visitors. In the end of the visiting route a part of the former underground torture - rooms is open to visitors.

RODOSTO - The Memorial House of Francis Rakoczi II.

The exhibition in the memorial house of the last leader of the anti Habsburg uprising presents relics reminding of the life of Francis Rákoczi, the history of the replica of his house in the Turkish exile and the funeral of the F. Rákoczi and his brothers-in-arms in Košice.

Interior from exposition RODOSTO - The Memorial House of Francis Rakoczi II.

The Gallery of Miloš Alexander Bazovský in Trenčín

The Gallery of Miloš Alexander Bazovský in Trenčín is

advantageously situated in the centre of Považie and it arose in 1969, it is an interesting centre by its geography

and culture. It bears its name after the National Artist M. A. Bazovský (1899 - 1968), an outstanding Slovak painter living the last years of his withering and varied life in Trenčín (1962 - 68).

The Gallery of Miloš Alexander Bazovský in Trenčín, the building facade

The principle of the gallery's collection and its dominant art exposition are represented by masterpieces of M. A. Bazovský, whose work has played an important part directing towards modern art. More than 1000 paintings and drawings, which can be proved by documents, are from the most precious stages of Bazovský's work. Thus, giving us information about his very wide thematic horizon (landscapes, still lifes, figural compositions) approaching the base of thought meditative reflection defining the principle of Slovak country so vigorously, convincingly and magnificently and its basic philosophy of living and its inhabitants.

M. A. Bazovský: My people, oil

The second field of gallery's collection and its exposition activity is Slovak visual

arts of 20 th century. There are, proved by documents, the most important people, works, tendencies of development and stylistic changes through paintings, graphics, drawings and sculptures of Slovak fine arts from 1918 until nowadays.

Representative exposition according to the restitution law in 1992 and reduction of gallery's spaces was abolished.

Another tendency of collecting interest and contemporary gallery's activity is its exact documentation of art development in Trenčín region. It is concentrated not only on authors that are still alive, but also on painters that lived or worked in Trenčín or their work was connected with this region.

Bojnice Castle

The gem of Bojnice is the "fairytale" Bojnice Castle, one of the most visited and most beautiful castles not only in Slovakia, but also in Europe.

Collections of artistic and historical museum are concentrated in the interior of the castle. Among them is the original furniture and the artistic collection of the Pálffys from the turn of the 19th and 20th centuries and the most valuable item of national importance is the Late-Gothic altar of Bojnice made by Nardo di Cione Ortagna, artist from Florence in the mid-14th century. The castle is famous also for its

festivals which take place over there (Festival of Ghosts and Spooks, Festival of Fairy-tails,...).

Trencin Castle

The Trenčín castle is situated on the limestone cliff, and has been constructed in place of a Slavs settlement and from the 11th century it has become the king's guard castle of the town. The oldest part of the castle is probably the Romanesque tower. The rests of the tower are found in the advanced courtyard.

The castle was owned by important royal and gentry families, of which the most famous was Matúš Čák of

Trencin (from the beginning of the 14th century). Of this period is also most ancient and very well conserved the Matus tower. To the tower they have been joined some gothic palaces: the Matus palace (that then it was destroyed); the Ludovit palace; the Barbara palace and the Zapolsky palace. On the first terrace of the Trencin castle it dominates the Cannon bastion, the chapel and above all the famous Well of love, deep 70 m, to which the legend is tied of the love between the Turkish Omar and beautiful Fatima. The attention of the visitors also attracts the construction of the barracks and the Clock Tower.

Uhrovec - Birthplace of the Slovak national heroes

Uhrovec is a little village next to Bánovce nad Bebravou. You can come close to the cradle of birth of the official Slovak language and visit the countryside of linguist politician, literate and pedagogue L. Štúr and the important politician and one of the leaders of the Prague Spring of 1968 Alexander Dubček. Both were born in the same house.

Surroundings of Uhrovec is known to people who are

interested in the history of war. This region is renowned thanks to its anti fascist activities during the Second World War, mainly the partisan brigade of Ján Žižka. On Janko's hill (Jankov vršok) visitors can see three renewed Partizan bunkers. For sporty people annually there are car and bike races up the hill or you can try to search for treasures according to the legend of Janko's hill.

The manor house Brodzany

One of the best known cultural and historic architectures of the region Pontrie in the west of Slovakia is the Renaissance manor house with the park in Brodzany. It houses now the Museum of A. S. Puškin. The Renaissance manor is from the 17th century. It was adapted in the Baroque and Romanticizing styles in the following centuries.

Progressively it became the centre of Russian art and culture in Slovakia. In the past, Puškins wife with children liked to stay here as the owner of the manor house, Baron G. Friesenhof married her sister. Other Russian artists and authors of fiction also visited the place. The present use of the structure has maintained the tradition as the manor contains exhibitions of

the Literary Museum of A. S. Puškin (the only Museum of A. S. Puškin situated outside Russia).

Historical park surrounds the manor. There are several busts of important Slovak and Russian writers made by Slovak sculptures in this park. Not far away from the Museum is the family tomb of the original owners of the manor - the chapel of family Friesenhof.

Reeve's yard in Turá Lúka

Visit the city where the time stopped. Discover traditional forms of settlement, customs and life of our ancestors in the mining area of the surroundings of the Myjava town.

Life at the rural area was full of activities. Even if it may appear different at the first sight, the life on the reeve's

yard didn't mean only hard work. The people had to take care of themselves, but still the work was connected also with singing and traditions.

Every host was welcomed by reeve and his wife with a glass of good Myjava's vodka or greasy bread. In spring, celebrations fašiangy, Easter tradition šibačky (whipping with a rod) and majáles (rag-day). During summer and at the beginning of autumn - dožinky (harvest-home) and dupanie humna. During cold winter days - drápačky peria (tug of feathers) or zabíjačky (slaughter). However, one of the most beautiful celebrations was traditional mining wedding, when all the reeve's surroundings became alive with colours of Myjava's dresses and the music played to dance.

Today as well, you can experience a part of the past of our ancestors in Turá Lúka near the town of Myjava. Every piece of reeve's yard equipment is original. These things went through the hands of citizens and in this shape they capture a part of their life.

NOMENCLATURE

1 Agricultural and Food Sector

Agrichemistry
Forest management
Food Industry
Gastronomy
Professional Services in the Sector

2 Building Sector

Preliminary Project Preparation and Project Preparation
Materials, Products and Systems

3 Engineering Sector

Metallurgy and Smelting Industry
Processing of Metals and Materials
Automatization and Control Systems
Air Conditioning and Ecotechnology
Car Industry
Transportation, Manipulation and Construction Technology
Agricultural Technology
Special Technology
Power Engineering
Gas and Oil Industry
Petrochemical Industry
Assembling and Servicing Companies

4 Others Industrial Sectors

Electrotechnics, Electronics
Chemical, Rubber and Plastic Industry
Glass and Stoneware Manufacturing
Wraps and Packaging
Paper and Cellulose
Textile and Clothing Industry
Pharmacy

5 Services

Conference Services
Environment and Ecology
Fairs and Exhibitions
Financial and Economic Services
Marketing and Media
Moving
Personnel Advisory
Printing Trade and Digital Printing
Publishing Houses
Science, Research, Education
Telecommunication Services
Testing, Normalization, Certification, Metrology
Translation and Interpreting
Transport and Logistics
Water Management

6 Tourism and Hotels

Hotels, Accommodation Facilities
Agrotourism
Restaurants, Catering Establishments
Travel Agencies

NOMENKLATÚRA

1 Agrárny a potravinársky sektor

Poľnohospodárstvo
Lesné hospodárstvo
Potravinársky priemysel
Gastronómia
Odborné služby v sektore

2 Stavebný sektor

Predprojektová a projektová príprava
Materiály, výrobky a systémy

3 Strojársky sektor

Hutníctvo a metalurgia
Spracovanie kovov a materiálov
Automatizácia a riadiace systémy
Vzduchotechnika a ekotechnika
Automobilový priemysel
Dopravná, manipulačná a stavebná technika
Poľnohospodárska technika
Špeciálna technika
Energetika
Plynárenský a ropný priemysel
Petrochemický priemysel
Montážno-servisné spoločnosti

4 Ostatné odvetvia priemyslu

Elektrotechnika, elektronika
Chemický, gumárenský a plastikárenský priemysel
Sklársky a keramický priemysel
Obaly a obalová technika
Papier a celulóza
Textilný a odevný priemysel
Farmácia

5 Služby

Konferenčné služby
Životné prostredie a ekológia
Veľtrhy a výstavy
Finančné a ekonomické služby
Marketing and médiá
Stahovanie
Personálne poradenstvo
Polygrafia a digitálna tlač
Vydavateľstvá
Veda, výskum, školstvo
Telekomunikačné služby
Skúšobníctvo, normalizácia, certifikácia, metrológia
Preklady a tlmočenie
Doprava a logistika
Vodné hospodárstvo

6 Cestovný ruch a hotely

Hotely, ubytovacie zariadenia
Agroturistika
Reštaurácie, stravovacie zariadenia
Cestovné kancelárie

1

Agricultural and Food Sector

1.1 Agriculture
