OPENING PATHS TO FOREIGN MARKETS

- ▶ *improving access to commercial bank loans*
- ▶ *increasing your export competitiveness*
- ▶ *eliminating export payment related risks*

We offer small, medium and large sized enterprises:

OUR BANKING PRODUCTS:

- Refinancing loans
- Direct loans
- Payment guarantees (for purchasing equipment, export financing)
- Non-payment guarantees (all types of contractual guarantees)
- Discounting – direct and refinancing
- Discounting – purchase of receivables
- Factoring (for small and medium sized enterprises)
- Forfeiting

Contact:

Corporate Department – Ing. Eduard Bohunický, tel.: 02/5939 8610
SME Department – Ing. Radim Bobek, tel.: 02/5939 8709
Bill of Exchange Trade Department – Ing. Rudolf Žilka, tel.: 02/5939 8322

OUR INSURANCE PRODUCTS:

- Insurance of short-term export credits against commercial risks
- Insurance of short-term export credits against political risks
- Insurance of export related domestic short-term receivables against commercial risks
- Insurance of medium- and long-term suppliers credit against political and commercial risks
- Insurance of buyers credits against political and commercial risks
- Production risk insurance
- Insurance of foreign investments of the Slovak legal entities
- Insurance of confirmed irrevocable export documentary letter of credit
- Insurance of export guarantees

Contact:

Marketable Risks Insurance Department – Ing. Mária Bilkovičová, tel.: 02/5939 8302
Non-marketable Risks Insurance Department – Ing. Boris Kuchťák, tel.: 02/5939 8214

EXIMBANKA SR, Grösslingová 1, 813 50 Bratislava, www.eximbanka.sk

OTVÁRAME CESTY NA ZAHRANIČNÉ TRHY

- ▶ *zlepšiť prístup k úverom komerčných bánk*
- ▶ *zvyšovať konkurencieschopnosť vášho vývozu*
- ▶ *eliminovať riziká súvisiace s úhradou platby za vývoz*

Malým, stredným aj veľkým podnikateľským subjektom ponúkame:

NAŠE BANKOVÉ PRODUKTY:

- Refinančné úvery
- Priame úvery
- Platobné záruky (na nákup technológie, vývozné financovanie)
- Neplatobné záruky (všetky druhy kontraktačných záruk)
- Eskontné úvery – priame a refinančné
- Eskontné úvery – odkupovanie pohľadávok
- Faktoring (pre malé a stredné podniky)
- Forfeiting

Kontakt:

Odbor veľkých klientov – Ing. Eduard Bohunický, tel.: 02/ 59398610
Odbor MSP – Ing. Radim Bobek, tel.: 02/ 59398709
Odbor zmenkových obchodov – Ing. Rudolf Žilka, tel.: 02/ 59398322

NAŠE POISTNÉ PRODUKTY:

- Poistenie krátkodobých vývozných úverov proti komerčným rizikám
- Poistenie krátkodobých vývozných úverov proti politickým rizikám
- Poistenie tuzemských krátkodobých pohľadávok vývozcom súvisiacich s vývozom proti komerčným rizikám
- Poistenie strednodobých a dlhodobých dodávateľských úverov proti politickým a komerčným rizikám
- Poistenie odberateľských úverov proti politickým a komerčným rizikám
- Poistenie výrobného rizika
- Poistenie investícií slovenských právnických osôb v zahraničí
- Poistenie potvrdeného neodvolateľného vývozného dokumentárneho akreditívu
- Poistenie vývozných záruk

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

Dear readers,

The determining factor of Slovakia's commercial policy has recently been the country's integration into the EU common commercial policy. The term "common commercial policy" is entrenched in Articles 131 and 133 of the Treaty on Establishing the European Communities and further specified in the Treaty of Amsterdam and in Treaty of Nice. It comprises a set of uniform rules applicable to the area of commercial relations with third countries (non-member states), which are binding for the EU Member States

It should be noted that though only one-fifth of Slovakia's foreign trade turnover is subject to the EU common commercial policy (79 per cent of the turnover is represented by free exchange of goods with EU Member States), the overall trade balance deficit of the Slovak Republic is concentrated here – in trade with CIS countries, developed non-European economies, developing countries and transition economy countries.

It was already during the pre-accession period when the Ministry of Economy of the Slovak Republic ensured a smooth transition of Slovakia to the common commercial policy conditions so as to prevent Slovak businesses from having less favourable conditions on the third countries' markets compared to their EU partners and to prevent a break up of the traditional trade flows.

Since 01 May 2004, the Slovak Republic has been bound by the community regulations applying to commercial policy and by international trade treaties entered into between the European Community and the countries outside of the EU. Import of goods from third countries to Slovakia is subject to uniform custom duties specified in the EU common custom tariff. Third countries impose duties aimed at goods of EU origin on products imported from Slovakia. The Slovak Republic implements protective measures in the form of quota restrictions, custom quota, and through monitoring and inspection export-import regimes adopted by the EU against third countries. On the other hand, Slovak producers and exporters must accept third countries' measures launched against exporters from the EU as a whole.

With regard to the commercial policy measures adopted after EU enlargement, the most important measures, as for Slovakia, have been the monitoring of shoes import from China, extension of the preliminary supervision of steel import, and in particular the approval of quota restrictions for import of 10 textile categories from China. An important momentum in connection with the Slovak

steel producer's interests (U. S. Steel) was the reaching of EU agreements on steel trade with the Russian Federation, Ukraine and Kazakhstan. As for anti-dumping measures approved under EU circumstances, the introduction of anti-dumping duties on magnesite bricks and magnesia from China (significant protection of Slovak producers of magnesite products), the maintaining of anti-dumping duties on import of carbamide and ammonium nitrate (protection of Slovak producers), and the extension of the exception from anti-dumping duty on import of potassium chloride (decreased costs of primary raw material for the Slovak producer of combined fertilisers) can be considered as a success. The approval of custom suspensions for import of electro-technical components and certain semi-products used in the chemical industry have helped to increase the competitiveness of Slovak producers, as well. The benefits resulting from such measures are also used by foreign investors investing in Slovakia.

The efforts of the Slovak Ministry of Economy in advocating the commercial policy measures under EU conditions have been largely facilitated by Slovak producers and their associations, as well as by the initiative of Slovak producer associations in European organisations. The present experience has shown that for an efficient advocating of Slovak businesses' interests in EU commercial policy a joint approach through associations acting at the European level is needed instead of individual initiatives at the national level.

Slovak exporters and importers can obtain all the relevant information about the common commercial policy rules on the web site of the Slovak Ministry of Economy (www.mhsr.sk under section Foreign Trade Policy). A source of high-quality information, though not in Slovak language, can be found on the Internet portal of the European Commission. The EC web site also contains a database of access to third countries' markets with useful information about import conditions applying to individual third countries (<http://export-help.cec.eu.int>), such as custom duties, documents required for customs proceedings, other goods import conditions etc.). Slovak importers can obtain extensive information about import conditions in the TARIC database, too, which is available in Slovak language at the web site www.colnasprava.sk. In addition to custom duties applying to import to the EU, they will also find here excise tax rates applicable in the Slovak Republic, information about import restrictions and up-to-date regulations concerning such restrictions.

The development of the Slovak foreign trade and of its competitiveness was affected by the changes relating to the expected accession to the European Union (access of multinational companies to our market, foreign capital inflow, and continuous harmonisation of standards) already in the pre-accession period. In this regard, the development of export to third countries represented a significant change after EU accession as a result of decrease in car export mainly to the U. S.

Since Slovakia's integration into the EU, the competitive capacity of the Slovak export to the EU-15 and EU-10 markets has increased, while it has decreased in relation to third countries' markets. As for the competitiveness structure, the share of export competing in quality has increased only in relation to EU-10 countries.

The competition share on EU-15 markets and third countries' markets has increased by price.

In general, it can be concluded that Slovakia's accession to the European Union represented a positive change for the Slovak foreign trade. The free market area has been clearly extended for the Slovak exporters both within the European area and in relation to third parties to which the EU as a whole has a better access than the Slovak Republic had prior to the EU enlargement. On the other hand, Slovakia has implemented a more sophisticated market protection system than the one existing before 01 May 2004. The improved trade conditions for producers and exporters and the guarantee of their stability are among the factors which boost foreign investments in Slovakia.

Jirko Malchárek
Deputy Prime Minister
and Minister for Economy of the Slovak Republic

<http://www.economy.gov.sk>

Dear readers,

I am very pleased about the publication of the seventh annual volume of the directory of businesses operating in the Slovak Republic, Slovakia 2006. I am convinced that this promotional publication will help improve the presentation of Slovak companies abroad and contribute to a more effective dissemination of information about Slovakia.

We are permanently striving to align the needs of the international community with Slovakia's interests. At the same time, international developments have a significant impact on progress of the Slovak society – it motivates and helps us implement swift and profound reforms.

For many reasons, 2005 was an important year for the Slovak Republic and especially for its foreign policy. The Slovak Republic completed its second year in the two most important Euro-Atlantic institutions – the European Union and NATO. During this period, these institutions saw us as a country that is carrying out profound reforms in the interest of its citizens. Slovakia has also gained the status of a trustworthy, predictable and active participant of international relations, supporting reforms of these institutions. The fact that we have attained the position of a non-permanent member of the UN Security Council for 2006-2007 can clearly be considered as an important effect of these factors. Being a newly elected member of the UN Security Council, Slovakia has become a country that has assumed global responsibility for the development of international relations. In a narrower regional context, our work in foreign policy resulted in our successful chairmanship of the Central European Initiative.

The Slovak Republic intends to continue to conduct its foreign policy in the same direction in 2006. Besides confirming our topics and firm stances towards principal issues of international relations, we will generate an added value. At the same time, we are aware of the economic and development dimension of our work – advancement is impossible without guarantees of the country's security, guarantees of respect for human rights and the rule of law, good governance and effective administration of own affairs, and without an effective and modern economic strategy.

The specific activities under Slovak foreign policy will be flexibly adapted to the developments in the various areas of international relations, while maintaining Slovakia's profile, priorities and status of a credible partner. We want to strengthen our contribution, present ourselves as a country that can not only confirm its stable position in the international com-

munity, but also significantly contribute to the positive activities in the field of peacekeeping and security in the world and the globalisation trends in the economic area.

The Slovak Republic has been among the donor countries of the international community for several years. Being a member of the OECD (since 2000) and the EU (since 2004), it has a strong potential as well as a moral and political interest in participating in the provision of assistance to countries that are in urgent need of it. From the position of an emerging donor, Slovakia can contribute to the global endeavour in the area of development aid financially, but also professionally and intellectually. It boasts unique experience from a transformation process that has affected virtually all areas of life in the course of 16 years. Moreover, being a country that was until recently a recipient of assistance, it can sensitively distinguish the needs of countries that currently need it.

Over the past 15 years, the Slovak economy has undergone changes that greatly affected its character. The most profound of them include the integration into the European Union (EU) and the implementation of structural reforms. Thanks to these changes, the Slovak economy is confronted with new opportunities and challenges. Therefore, in the interest of the further development of the country, it is necessary to adapt the government's policy to a clear and modern strategy aimed at ensuring that Slovakia reaches the standard of living in the most advanced EU countries as quickly as possible. This objective will be achieved only if suitable conditions are created for the growth of the country's economic competitiveness, in accordance with the principles of the Lisbon Strategy.

It can be stated today that Slovakia is one of the most active and successful members of the EU in the implementation of both economic and social reforms. These reforms focused on achieving macroeconomic stability and economic growth, improving the economy's competitiveness, reducing the rate of unemployment and advancing the quality of life of its people.

For the third year in a row, Slovakia has been the fastest growing economy in Central Europe with GDP growth reaching 5.5% in 2004. It is encouraging that this strong growth continues in 2005, while the aggregate of business and consumer confidence has risen to the highest level in the last six years. Business confidence is encouraged by the improving business environment and profitability of companies and its growth is at double-digit levels. Consumer trust is positively stimulated by the gradu-

ally improving situation on the labour market, decreasing inflation and rising real wages.

Thanks to reforms, our country has already become one of the most attractive investment locations in the European Union. An imperative in this context is the nature and importance of the individual factors affecting past, current and future decisions of foreign investors to enter the economic and social environment in Slovakia. The quality of the business environment and the overall institutional, legal, allocation and redistribution framework in Slovakia have indisputably become more attractive over the past five years.

The economic results we have achieved made it possible for the Slovak Republic to join the ERM II mechanism in November 2005. Through this step, we officially started to meet the requirements for the stability of the currency and introduction of the euro as the official currency in Slovakia. Moreover, this step has created a more stable situation for both domestic and foreign investors.

In this context, I would like to point out the fact that we are also aware of many other, difficult challenges related to our objective to ensure long-term competitiveness of Slovakia.

Therefore, the Slovak government is taking many specific measures to create conditions for the development of the so-called knowledge economy. We are striving to ensure that our economic growth is based on advancement in areas that will facilitate the expansion of the creative potential in the Slovak economy, such as human resources, education, information society and support for science and technological development.

To conclude, allow me to express my conviction that your publication, which has been successfully representing the Slovak Republic in the area of economic co-operation for six years now, will enable effective communication and contribute to the positive trends in the Slovak and world economy.

Dear Sirs,

Slovak Chamber of Commerce and Industry as a member of International Chamber of commerce in Paris and as associated member of European Chambers of commerce and industry Association Eurochambers in Brusel is a statutory acted in whole Slovakia, which represents and coordinates common interests of members in domestic and foreign business activities.

Today's Slovak Chamber of Commerce and Industry constituted in 1992, raised on rich experiences from activities of Chambers of Commerce and Industry in Slovakia, which history stretch back to the half of 19. century and the year 2005 was the 155th anniversary of chamber system creation in Slovakia. Dimension of these chambers far and away exceeds the economy border what help to keep national privity and economic, cultural and social life development in Slovakia.

Slovak Chamber of Commerce and Industry for whole bygone period was the important institution in the process of changes. Institution, which by respecting rules of game is recognized by others and using this position to assert interests of Slovak economy in abroad and to create position of business branch in domestic social environment.

The basic relation and structures for direct participation of Slovak business structures to global and European flow has been created by Chamber in last years. The creation of Slovak Committee for Business and Industry (BIAC) by OECD, Economic and Social Council (ECOSOC) as consultative body in structure of European Union and National Council of International Chamber of Commerce in Slovakia represent principal steps to worthwhile participation of slovak economic subjects on decision process in international economy.

The Chamber as a business institution want to spend more in major range own professional potenton concentrated in regional and occupa-

tional structures for economic development of Slovak Republic, for development and business protection, development and international trade alleviation and competitiveness increase of Slovak business subjects. The Chamber on behalf of servise approach to own members and also non members and foreign partners has constituted 9 regional Chambers in the residence of all regions and within Banska Bystrica region also in Lučenec and further 3 offices in important business centres of Slovakia in this time except Chamber Office. Chamber has created 5 consultative body professional boards namely legislative, economic, foreign trade, regional and industrial within occupational structure and nowadays within Chamber effected 20 special departments with whole Slovakia activity, which are created based on principle relation of line of business.

Our today's role is redound to cap the economic and society transformation and to her reformation on society of prosperity and perspective. The Chamber feel own liability also for active connection of Slovakia to global flow in the area of knowledge, finance, technology, industry and trade.

We are sensible of matter of fact, that in the period of continuing world economy internationalization and global process the international trade and international business is one of the most important atributes for steady sustainable development assurance.

I am sure that also this publication can partially redound to improve the trade and economy relations and contacts of Slovak business subjects with foreign partners.

Peter MIHÓK
President SCCI

Ladies and Gentlemen,

Slovak Agricultural and Food Chamber (SPPK) as the largest non-governmental organisation in agri-food complex, comprise of more than two thousands subjects providing business in agricultural primary production, food processing and in services for agriculture and food industry in the territory of the Slovak Republic. Its position was not weakened neither by the change from the obligatory to the voluntary membership in the beginning of the year 2005, done accordingly to the amendment to the Law No.30/1992 Coll. on the Slovak Agricultural and Food Chamber. The main goals of the SPPK remain the same, i.e. to enforce the justified interests of its members on the national and international levels, in particular to improve the business environs and uplift the competitiveness of the Slovak entrepreneurs working on the land and in the food industry.

Slovak agricultural producers and food processors supply the domestic market with the quality products in the vital way. They were pushed to spend not a little effort and financial means in the pre-accession period to fulfil the demanding hygiene standards of the European Union. The controls of the severe European but also national inspectors in the individual plants have shown that they manage this process successfully. Our Slovak products conform to the high quality provisions required as concerns the hygiene and manufacturing technology, on the home and on the challenging international market as well.

Our entrepreneurs in agriculture and food processing industry are not afraid of the competition but the non-equal conditions on the common European business scene that have already brought some troubles to them. There is no doubt that the level of the financial support

for the Slovak farmers is significantly lower in comparison to the "EÚ-15" countries producers. This fact disadvantages their position on the common European market. By the consistent pressure for reducing the market prices they are posed to the situation when they have to trade with many commodities on the price level not reaching their real production costs, even lowered by the subsidies received.

The first year of the full membership in the European Union has shown that the fight for the consumer and markets under the enormous pressure on market prices may lead to decrease of the quality parameters of food. We have to be aware of going this way. Therefore SPPK persists in claiming for supply of the effective protection of our national market against the low quality goods imports. Simply we have to require the same excellent level of the hygiene and the food quality from the other countries as it is required from our domestic producers.

We demand the equal business conditions also in the interest of preserving the sound and fair competition principles where only the best are the winners. We think of the serious rival as a driving engine for the growing products quality. It is also confirmed by the enterprises in Slovakia with their presentations on the prestigious international exhibitions and also their onward permeating to the demanding world market.

AZOTER - environmentally free fertilizer/ecologically

- Provides optimal supply of nutriment • Improves soil structure • Decomposes remains • Produces humus • Improves disease - resistance of plants •

Description and Properties of the Preparation

The fertility and natural resistance of cultural plants against diseases largely depend on the number and composition of micro-organisms in soil.

The results of several surveys show that the bacterial microflora whose presence in soil is inevitable is disappearing. The number of micro-organisms producing natural nitrogen in soil has largely decreased, just as the number of bacteria facilitating the decomposition of pulp in soil, and the micro-biological process of fixed phosphorus release in soil has slowed down.

In order to create a favourable environment for metabiosis and enrich soil with natural nitrogen and phosphorus, the auxiliary soil substance **AZOTER** should be applied.

AZOTER as a liquid substance working on the basis of bacteria of the original microflora is applied pre-emergently for soil preparation. Through action in soil the substance generates a sufficient amount of nitrogen and phosphorus and thus can replace classical industrial fertilizers of N and P type.

Recommended for agricultural companies, private farmers and gardeners, where the humus contents in soil is min. 1 - 2 %, and pH value is between 5.8 and 8.5.

To be applied in cultivation of corn, sugar-beet, sun-flower, winter crops, vegetables and flowers.

Properties and composition of the preparation

AZOTER is a grey, thick liquid with a characteristic molasses aroma, typical for this preparation.

- Azotobacter croococcum – combines with nitrogen, enriching soil with nitrogen and regularly feeding plant root systems with nitrogen during the entire growing season.
- Azospirillum brasilense – similar properties as azot. cro., resistant against temperature above 30°C; feeds plant root systems with nitrogen also during hot summer months.
- Bacillus megatherium – after reproduction of the micro-organism in

soil the plant root system can absorb mobilised phosphorus, which, though existing in soil, is not available to plants.

- Risk substances – cadmium, lead, mercury, arsenic, chromium; laboratory analyses show that these substances meet the approval proceedings conditions also for ecological agriculture.

Application and dosing

Apply pre-emergently 10 to 14 days prior to seeding. If the temperature is above 20°C, the preparation should be applied on soil within three to four hours so as to prevent long-term exposure of micro-organisms to heavy sunlight. Apply on the soil surface using irrigator. Dissolve in water 1:30 - 1:50, depending on the irrigation mechanisms. The blendability of the preparation is good; it can be mixed and applied together with herbicides and fungicides, except those containing bactericide substances.

The recommended dose is 10 litres per one hectare (min. 300 litres of solution per one hectare); The declared values have the same effect as classical industrial fertilizers. In case of such dosing azotobacter and azospirillum regularly bond nitrogen and supply nitrogen to the plant root system, which corresponds to approx. 60 - 80kg of phosphorus in raw nutrients.

Supply and packing

AZOTER is supplied in 50- and 60-litre labelled PVC return barrels. The preparation should be stored in dry, cold, ventilated areas, separated from foodstuffs, feedstuffs, drugs and their packages. In case of prolonged storage up to three months, the temperature of the storage area should be below 5°C. The guarantee period is 90 days after delivery.

Protection and safety at work

The treatment of the preparation does not require any special health protection measures. After work with the substance wash your hands with soap and warm water.

The preparation AZOTER was approved by the Ministry of Agriculture for use in ecological agriculture. Resolution No. SKTC 107 08W0010.

The company **RADOMA**, Ltd. takes an important place in the field of frozen, cooled and preserved products in the Slovak market since 1992. It concerns with import of raw-material and processing and distribution of fish products and seafood, frozen vegetable and their mixtures and potato products.

Besides the fish processing (different cooled fish salads, marinated fish etc.) the production of frozen ready-made products, that means different kinds of frozen flour specialties as for example dumplings filled with fruit, meat, cheese etc., pizza, also frozen breaded products, frozen fish and frozen vegetable products and fish tins is our priority.

Close contacts with growers of vegetable are our advantage.

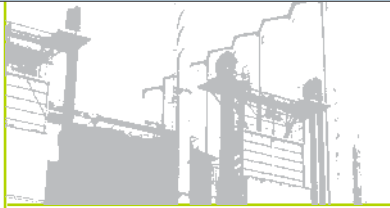

We are also producer of ice-cream with wide assortment and possibilities.

RADOMA SK, Inc. supplies the supermarket chains operating in Slovakia with our and foreign brand products as well as with their private labeled products.

We secure a reliable distribution net throughout Slovakia. Our subsidiary **Radoma CZ**, Ltd. operates in field of catering in Czech Republic.

We are open to any serious cooperation and are seeking for a partnership in foreign countries either to distribute our products there or we are able to provide our large production, store and distribution capacity for different possibilities. The cooperation with other producers will be welcome, too.

The Vitis Group

The Vitis Group is a joint venture of three companies which cooperate not only in the production of grapes, wines, spirits, and grape-based non-alcoholic beverages, but also in the distribution of their products to the customers. It draws upon the original tradition of the last centuries of the Small Carpathian wine growing region when small wine growers and wine makers affiliated themselves in order to operate on the wine market more efficiently. The Association affiliated small wine growers and makers in order to promote their products on the wine market more efficiently.

Tailor-Made Roofing

Thanks to its professional approach, the **ROVA-SK** company provides products which are ideal for Slovaks. Our easy and fast roofing system solutions fully meet the demands of the domestic market. We talk about a system which is based on roof covering made of steel plastic varnish sheets. The roof covering is made of incredible 10 layers, including several protective layers and a safety foil. The product has been launched in four material types; the **ROVA-SK** company offers its clients continuously flame galvanized sheet, aluminium, aluzinc and high-quality copper sheet. Clients must forget about the old, unaesthetic roof covering types – today, they can select from twenty colours of dull or gloss finish. The **ROVA®** brand covers the roofs of wooden cottages in protected natural areas, churches or shopping centres in cities. You can find the modest but purposeful **ROVA®Profil** type, the embellishing **ROVA®Maxima** and the luxurious **ROVA®Mega** type.

Not only is its quality the biggest advantage of the **ROVA®** brand. The product itself is just a small part of the overall system offered to clients. The roofing system gets to people that want to be protected against bad weather, in a complex manner. They can expect free-of-charge tile plans, fast delivery of roofing systems (up to 10 working days), professional mounting and consulting, and a complex and suitable offer of roof accessories.

The ten main features of the ROVA® roofing system:

1. Extraordinarily light (up to 10 times compared to non-metal-sheet systems)
2. Absolutely waterproof
3. Variable in materials
4. Easy mounting
5. Low costs
6. Colour-adjustable
7. Durable (no corrosion guarantee for 30 years)
8. Made of big-size parts
9. Complex (with accessories)
10. Professional care

Activities

1. Entering the foreign markets

- **Market research**
- **Assistance to foreign businesses carrying out investment activities**
- **Making new deals and partnerships**
Joint venture creation, brown field and green field investments, co-operation, supplying, networking
- **Searching and studying of new products**
- **Industrialisation**

2. Industrial partnerships

- **Wood industry: research, production**
- **Energy and electricity: research, production of electric networks, cabling, harnesses, supplementary assembles,**
- **components, heater**
- **Mechanics: Research and production of tools, injection moulds, mechanic pieces, treatment**
- **Mechanic welding: thermo surface treatment, casting(steel, aluminium, non-iron), forged pieces,**
- **Plastic materials: Research and production of foundry forms, bends, plastic components(injection, extrusion, thermo casting...), supplementary assembles**
- **Plates: Research and production, cutting, stamping, treatment, assembling, painting and surface treatment.**

- Aircraft Hauler TALET 30

www.way-industry.sk

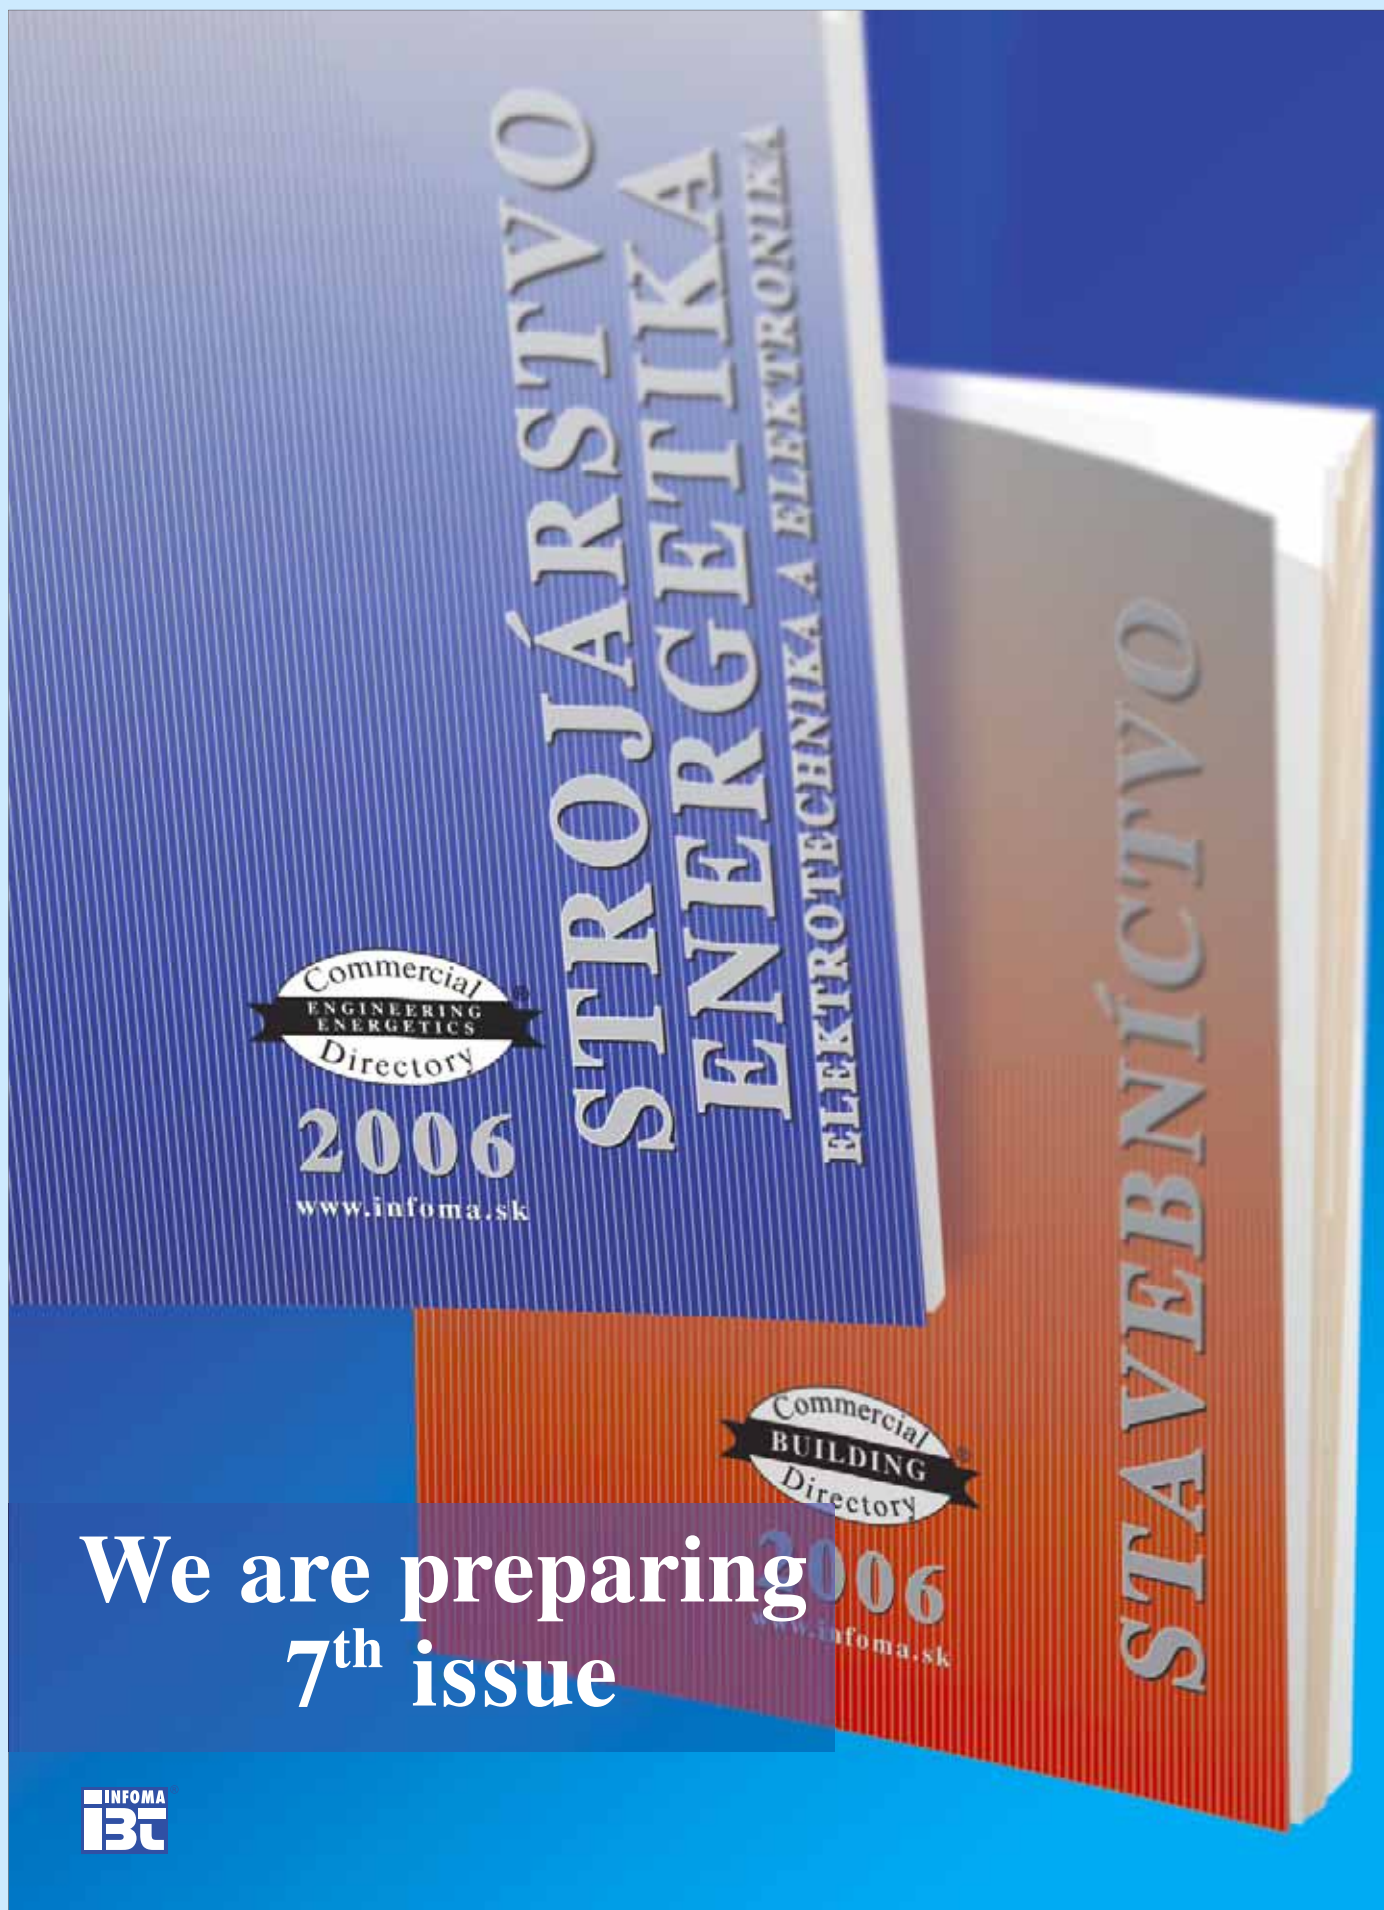

The manufacturing and trading company WAY INDUSTRY, joint-stock company started its activities on March 1, 1999. It continued the heavy machinery tradition at the Krupina region. In 2001, the owners have changed along with the company's name. The Board of Directors and the joint-stock company CAPITAL INVEST o.c.p., became the owners.

WAY INDUSTRY j.-s. Co. is involved in the foreign trade with the machinery products. The main products – skid steer loaders LOCUST, along with the Mine Clearance Systems BOZENA and the aircraft hauler TALET 30 represent the decisive manufacturing program.

The good special policy of the company is supported by the quality of the provided services for the production and delivery of spare parts. The integral part of the manufacture is the cooperation at manufacture for other partners like CNH Baumaschinen GmbH, for construction equipment in particular.

The company with its quality work and considerable flexibility gained a very successful position at the mentioned fields within the Slovak Republic and abroad, too.

www.hotelmagnolia.sk

It is our pleasure to present you our Hotel Magnolia, which is located in the centre of the world famous Piešťany spa situated in the very heart of Europe, just 45 minutes on highway from Bratislava, the capital city of the Slovak Republic.

The Hotel Magnolia offers its business clients two large congress halls, two smaller saloons and a lounge suitable for congresses, seminars, presentations etc. These premises can be used for organising weddings, parties, celebrations and anniversaries, as well.

Hotel Magnolia**** Piešťany is here for you. You can know the best things you would discover in our region. We offer you comfortable accommodation in 125 rooms – 96 double rooms, 22 single rooms and 7 apartments. You can have lunch or dinner in the warm atmosphere of our restaurant; you will have free access to our swimming pool, fitness centre, or you can choose to have a massage, a wax wrap, or use a number of other ways to regenerate your tired body and soul.

The Piešťany spa is one of the smallest, yet one of the nicest cities in Slovakia. You will find not only historic buildings designed by world-known architects here, but also the beautiful nature at the Považský Inovec mountains.

If you are keen on sports and you cannot imagine a day without the tennis court, squash, horse-riding, cycling or water sports, just visit Hotel Magnolia; we are ready to prepare a rich program for you.

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

Information about activities of SCCI is available on the web-side: www.sopk.sk

The Region of Banská Bystrica

The region of Banská Bystrica is located directly at the Centre of Slovakia and it comprises 8 districts. Its territory covers an area of 5.129 sq. km and its population is 397 356. The centre of the region is the city of Banská Bystrica with a population of almost 90 000.

The region is connected to the international road and rail network. Sliač airport, which is situated just ten minutes by car from Banská Bystrica, offers new possibilities for air transport of persons as well as goods.

Existence of thermal medicinal springs offers a significant possibility for development of tourism. In the spas of Sklené Teplice, Dudince, Sliač, Kováčová and Brusno are treated nervous, kinetic and digestive disorders and cardiovascular diseases. Natural and climatic conditions also create good opportunities for tourism, agro-tourism, winter and water sports and hunting.

Attention of tourists has been turned to urban monumental reservations in Banská Bystrica, Banská Štiavnica and Kremnica. Banská Štiavnica town, together with its surrounding area has been registered by UNESCO as the world cultural and natural heritage.

Among other interesting places belong castles in Zvolen, Víglaš and Slovenská Ľupča; fort in Bzovík; wooden church in Hronsek; St. John's church, where the geographical centre of Europe is located; folk architecture of the mining settlement Špania Dolina; attractive Čiernohorská narrow-gauge railway in Čierny Balog.

Raw material base of the region is various. Concerning the ore raw materials, the deposits of golden and silver ores, lead, copper and zinc are historically known around Banská Bystrica, Štiavnica and Kremnica.

Resources of non-metallic raw materials are more important from economic point of view. There are resources of building stones in the region such as limestone, dolomite limestone, ceramic clay, brick earth, gravel and gravel sand, basalt and perlite. Very important are also resources of wood substance.

Natural originality of the region is emphasized by state natural reservations, number of protected natural creations and localities. Geographically, the region includes National Park Low Tatras, protected scenic area Veľká Fatra, Poľana and Štiavnické Vrchy.

The education in the region is provided by the system of 338 elementary schools, 25 grammar schools and 61 secondary vocation schools. There are also two universities in the region. The University of Matej Bel in Banská Bystrica, specialised in the field of human sciences and the Technical University in Zvolen.

The region of Banská Bystrica is characteristic by notable diversification of industrial sphere, however, economic potential of individual districts has its own specifications.

The most important industrial sectors include heavy engineering and machinery, metallurgy, building industry, wood processing and paper industries, chemical and pharmaceutical industries, textile and food industries. 7,3 percent of the total number of Slovak enterprises operate on the territory of the region. There are 737 companies with foreign capital in the region. The most successful of them are SLOVALCO a.s. Žiar nad Hronom, IZOMAT a.s. Nová Baňa, Fermas spol. s.r.o. Slovenská Ľupča, WITZENMANN SLOVAKIA spol. s.r.o. Vlkanová, KÜSTER-car technique spol. s.r.o. Vlkanová. Also foreign companies do business in the region, such as Coca Cola, McDonald's, Tesco Stores, Billa, Baumax, Ahold etc.

The priority of development of the region is to stay attractive for foreign investors. As the main reasons to invest in the region are considered:

- favourable location, proximity of an airport with an international statute
- ideal conditions for further development of tourism
- raw material and economic basis available
- freely available qualified and highly specialised labour force
- high proportion of persons with higher education

The Region of Bratislava

Bratislava, the capital of the Slovak Republic, is a town which **location** at the confluence of the rivers Danube and Moravia, on the ridge of the Lesser Carpathians and **next to the place where Austrian, Hungarian and Slovak frontiers** meet in one point, has, since time immemorial predetermined the role Bratislava as an important defence point, trading place, crossroads of transport routes, area of business, industry and agriculture.

Whether called Preslau, Pressburg, Pozsony or Bratislava, the policy, education and good wines dominated its atmosphere. Nowadays, Bratislava became to be the most developed Region of Slovakia from economical, social, research and technical point of view.

The strongest economic position (35% of GDP) of Bratislava among Slovak regions mirrors also a strong position of Bratislava Regional Chamber in a structure of Slovak Chamber of Commerce and Industry.

The Region of Košice

THE BASIC INFORMATION

The modern history of Košice Regional Chamber starts in the year 1992 when it was re-established according to the Act No. 9/1992 passed by National Council of Slovakia concerning chambers of commerce and industry. At the same time, The Slovak Chamber of Commerce and Industry was established as an independent legal subject. The present activities of the Košice Regional Chamber of Slovak Chamber of Commerce and Industry are very closely connected with the Chamber's history which goes to the year 1850. This fact proves, that Košice Regional Chamber is the oldest chamber in the territory of Slovakia and one of the oldest in Central Europe.

The Košice Regional Chamber represents member companies of the whole Košice Region and plays an important role in domestic and foreign trade with special attention to the markets of the Eastern Europe and Russia.

The Košice region is located in the eastern part of the Slovak Republic the with area that exceeds 6700 km² and has more than 765 thousand inhabitants. Nowadays, Slovak authorities have registered more than 30 thousand entrepreneurial entities with all types of business activities within the Košice Region. The most important kinds of industries allocated in the region are: metallurgy, engineering, chemistry and textile production.

PROVIDED ACTIVITIES AND SERVICES

- Co-operation with commercial and industrial chambers abroad (organising business missions, seminars, meetings on economic co-operation, publication of commercial promotions, seeking trading partners, exchange of commercial policy documents and other information),
- Consultancy on legal, financial, commercial and customs issues,
- Customs and certification services (issue of ATA Carnets, authentication of certificates of origin of goods, commercial invoices, powers of attorney, "force majeure", contracts, letters of reference),
- Librarian and information services (contact data of foreign and domestic companies and other information concerning trade conditions and doing business in selected countries).
- Educational activities (organising seminars, workshops and conferences on current issues of International trade, trade logistics and business.)
- Publication activities (specialised publications for support of business and reduction of trade risks, publication of current general standards in international trade, publications concerning technical, economic and legislative issues.)
- Facilitation in property disputes in international trade of domestic subjects at the Court of Arbitration of Slovak Chamber of Commerce and Industry in Bratislava.
- Promotion of members of Slovak Chamber of Commerce and Industry through the network of the International Chamber of Commerce in Paris and other information media in co-operation with chambers of commerce and industry abroad and branch offices of the World Trade Center.
- Mediation and publications of business opportunities, offers and other business information for foreign and domestic companies. Presentation and representation of members of the Chamber at domestic and foreign exhibitions and other events.
- Co-operation with representative offices of the Slovak Republic abroad.
- Co-operation with embassies of the Slovak Republic and their commercial sections.

The Region of Lučenec

Introducing the region of the Lučenec Regional Chamber

The region is situated in the southern part of central Slovakia. It consists of five districts: Lučenec, Rimavská Sobota, Veľký Krtíš, Poltár and Revúca. It is formed by historical areas of Novohrad and Gemer. The region is mostly a lowland and high-located places are situated only in the northern part. The heart of the region is the geomorphological whole of the Southern-Slovak Hollow. The area is bordered on the Krupinská planina (Krupina plain) in the north-west, on the Slovenské Rudohorie in the north and on the Slovenský Kras in the east. The area of the region is 4329 km with the population of 267 286 (2001) and with the average density of population 62 people to 1 km.

The southern border on the Hungarian Republic suggests good contact between the population of both border regions in industry and culture. That's why the Slovak-Hungarian Chamber composes inseparable part of Lučenec Regional Chamber. It provides economic, statistical, legislative information and requested addresses and contact details about Hungarian firms for its members.

The region is rich in raw materials. We can find here magnesite (the region comprises of more than 6% of the total world resources especially in the surroundings of Jelšava, Ľubeník and Hnúšťa), heat-resistant loams, basalt, ceramic raw material, natural decorative stone, steatite, asbestos, the raw materials of the silicate industry (diatomite, algin, etc.). Natural resources form an important potential of further production development of the region. These facts were the basis for creating Non-metallic raw materials Section of the Slovak Chamber in Lučenec. The section unites Slovak firms and institutions which deal with searching, exploiting and processing of non-metallic raw materials. Every three years the conference about non-metallic raw materials named EUROSILIKÁT is held in Lučenec. The main objective of the conference is to widen knowledge about new and unconventional non-metallic raw materials and their technological use.

Transport and energies

The region has the advantage of its location. It offers the shortest transport connection between western and eastern Slovakia and its metropolises Bratislava and Košice and connects links between Budapešť and Varšava. The region has its local airport Bolkovce (8 km from Lučenec). Its location offers excellent conditions for a passenger transport as well as air sports. The airport has been the seat of the World Parachuting Championship for several times. The nearest international airport is in Sliač (60 km from Lučenec). As for the energy lines (oil-pipeline, gas-pipeline, power lines) the southern Slovak transport corridor is being used in the direction Bratislava - Nové Zámky - Šahy - Veľký Krtíš - Lučenec - Rožňava - Košice. Lučenec is the centre of local energy institutions such as gas industry, power stations and optical telecommunication lines.

The Region of Nitra

The Nitra Region in the Context of Foreign Investments

Only very few Slovak regions have such excellent preconditions for the development of international contacts and cooperations as has the Nitra region. This region extends from the mountain ranges Považský Inovec and Tribec in the north to the river Danube in the south and geographically it covers the prevailing part of South-western Slovakia.

This region is identical with the chamber region of the Regional Chamber of Commerce and Industry Nitra. The chamber region begins approx. 60 km easternly from the Slovak capital Bratislava and is surrounded by the other chamber regions Trnava, Trenčín, Banská Bystrica and Lučenec. The centre of the region is the historically famous town Nitra with approx. 90 000 inhabitants. The total geographic surface of the region represents approx. 6 364 sqkm and the number of its population is about 715 000 residents. The total number of the entrepreneurial subjects in 2005 was approx. 51 397. The traditional industrial branches of the region are the machine engineering, metal processing, electrical engineering, chemical industry, building material production and the automobile industry. Based on the excellent climatic and soil conditions very important are also the agricultural production and the food processing industry.

Concerning the size of entrepreneurial subjects there are typical here small and middle sized companies, which went through the transformation process to the market economy easier and more flexibly as many big factories in other parts of the Slovak Republic. In the recent ten years there was established here a large number of new producing companies by local Slovak entrepreneurs, which are successful not only on the Slovak but also on international markets.

The objective advantages of the region have been invented also by well-known foreign companies, from which many are present here with strong investment projects. To the most important foreign investments of the region belong such manufacturing plants as for example the VOLKSWAGEN Electrosystems jsc. Nitra /cable systems for automobiles/, HEINEKEN SLOVAKIA jsc. Nitra /beer and malt production/, FRIESLAND SLOVENSKO Ltd. Nitra /milk products/, SLUZBA SIIX ELECTRONICS /electronic appliances/, OSRAM jsc. Nove Zamky /electric bulbs/, TELEFLEX jsc. Vrable /automobile parts/, MATADOR INALFA jsc. Vrable /automobile parts/, SMURFIT KAPPA jsc. Sturovo /paper industry/. The most important investors came to the region from Germany, Austria and Holland. Besides these direct investments a large number of local industrial companies cooperate very intensively with partners in the European Union supplying for them semi-products or carrying out certain finalizing operations on their final products.

The region has very good transport infrastructure with dense network of roads which contributes to the further intensification of the international contacts. The administrative centre of the region the town Nitra has direct highway connection with the capital Bratislava and thus also with the Slovak-Austrian border. Thanks to this highway connection and the good geographical position three international airports /Bratislava, Vienna, Budapest/ are available within three hours. In the town Nove Zamky 30 km southernly from Nitra there is one international railway junction and in the suburb of the town Komárno is the second most important river port of Slovakia on the river Danube. After the opening of the Rhine-Main-Danube channel the region has direct ship connection with the Black and North Sea.

Nowadays, the main task of the Regional Chamber of Commerce and Industry Nitra in the international sphere is the further support of commercial and cooperational contacts between Slovak and foreign companies. This target is based on the high interest of the local entrepreneurial circles for the intensification of business contacts mainly with the countries of the European Union and of Middle Europe. It is expected that thanks to the geographical proximity and good infrastructure, this region will attract the interest of further foreign investors. Naturally, the Regional Chamber of Commerce and Industry Nitra will be always ready to equip them with basic orientation in the current Slovak environment and to provide professional advisory services in all spheres of the economic life.

The Region of Prešov

The Prešov Regional Chamber of the Slovak Chamber of Commerce and Industry

The Slovak Chamber of Commerce and Industry, an integral part of which is the Prešov Regional Chamber (PRC SCCI), is an association of business concerns formed in order to boost the economic prosperity of its members, encourage their business activities both in Slovakia and abroad and assist in the creation of a positive business climate. The SCCI is a public institution established by Act 9/1992 of the National Council of the Slovak Republic and declared in Act 121/1996 of the National Council.

Membership in the Chamber is voluntary and its members are both natural and legal persons performing business activities in various fields of economy, with exception of agriculture and food industries.

The members have the right to:

- Use all services provided by the SCCI
- Service price discounts in accordance with the chamber's valid price list of services
- Propose and elect bodies
- Submit proposals for the improvement of the chamber's activities

The primary aim of PRC SCCI is to provide high-quality services to the business community in the Prešov region, to assist in tackling their business-related problems, to predict, analyse and define the needs of entrepreneurs and to offer solutions in the form of both tested and first-time services.

Provided standard services of the SCCI's Prešov Regional Chamber:

- Issuing of ATA carnets and certificates
- Counselling and consultations related with export and import of goods
- Counselling on the possibilities of financing business activities through the Structural Funds (ŠF)
- Services in the field of education
- Development of international trade relations - by organising trade missions at home and abroad
- Organisation of the participation of companies for fairs and exhibitions
- Publishing, distribution and sale of specialised publications

The plan for the Chamber's activities for each year is approved at the plenary session of the PRC SCCI and is outlined on our website www.po.sopk.sk. Members of the PRC SCCI are kept regularly informed about all events organised by the Chamber.

- the territory of the SCCI's Prešov Regional Chamber is the Prešov Self-governing Region
- the PRC SCCI also has an office in Poprad

The Region of Trenčín

Location & Accessibility

- Trans-European corridors North-West
- mutual border with Czech Republic
- 1 hour access to Capital City perspective of new corridors
- located in the northwestern part of the Slovak Republic.
- Area of 4 502 sq. kilometers.
- Building materials such as dolomites, limestone, building stone, lime marl, brick raw material, and decorative stone can be found in the region. Mineral waters and thermal springs are used as a source of high-quality drinking table water. Wood resources are also of importance.

Social characteristics

Number of inhabitants:..... 601 687
Share of men / women 48.8 / 51.2 %

Structure of education:
Vocational & professional..... 43,7%
High school..... 38,5 %
University degree 9 %

Economic. active population: 62.3 % (374,797)
Average age: 38 years
Average monthly salary 367 euro

Number of vacancies: 2,476
Unemployment rate: 8.6 %

EU experience:

- more than 60 % of population (any)
- more than 1 % companies for more than one year

Economic characteristics

The region has an industrial - agricultural character. Industry is prevailing. The main industrial fields are: Mechanical engineering and components production for automobile industry, chemical production and rubber and plastic articles production, Electro technical industry, Glass industry, Wood processing industry, Food processing industry and service sector with dominance of tourism. These fields can be characterized by:

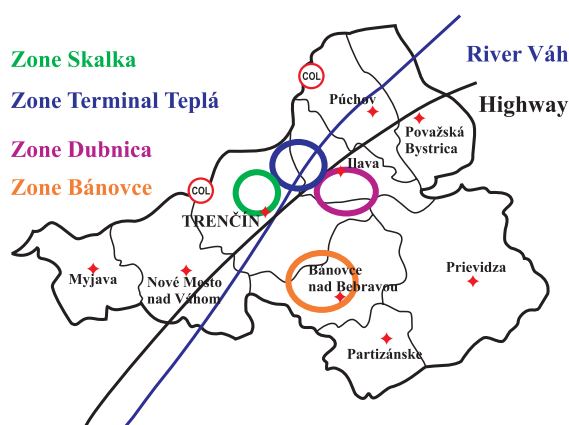

Number of registered businesses:
• legal entities 11,427
• tradesmen..... 40.039

An ownership type:
• public sector: 791
• private sector 10,636
- foreign.....765
- international742

Emerging investment opportunities

Investors could find brown and green field opportunities for investments, skilled and educated labour force and well prepared infrastructure here. Active role in this area plays Trenčín Regional Chamber of SCCI in close cooperation with regional and local selfgovernmental units. It gives support to Slovak and foreign companies with regard to trade, legal, investment support. It provides legal advising and information on economic situation of the region. Special attention should be paid to the internet portal www.commerce-and-industry.com run by the Trenčín Regional Chamber of SCCI, where are available practical information on business issues and companies in the region.

The areas for industrial parks and terminal operations in the region Trenčín.

The locality of Upper Nitra with free areas.

Overview of the regional advantages

- good geographic location
- tradition of production

The Region of Trnava

Trnava Region

the region with its rich history, spiritual and cultural life, with fertile lowlands and protecting mountains, with rivers connecting people, the region of education, the region of good bread and good wine.

Location

Trnava region spreads across the south-western part of Slovakia. In the west it borders with the Czech Republic, in the south-west with Austria, in the south with Hungary. It takes to reach the capital Bratislava by car about 1 hour and the Vienna International Airport about 2 hours.

Transport and Infrastructure

The region has a well-developed road and railway transport system. Railways and highways connect the region of Trnava with Bratislava, The Czech Republic, Austria and Hungary. Public water pipes supply with drinking water 76,7 % of the region population, 41,8 % of households are connected to the public sewage system.

Education

53 technical and vocational schools provide machinery, transport, electrical, chemical, agriculture, food-preparation and other kinds of education. Secondary schools are aimed at business and services. The Slovak Technical University in Trnava offers degrees in industrial technologies, technical materials, industrial ecology, management and applied information systems. The Trnava University and The University of St. Cyril and Method offer possibilities to study in a large scale of humanities and natural sciences.

Economy

The region of Trnava has its tradition in both kinds of production: industrial and also agricultural. The industrial production includes machinery, /automobile industry/, electrical engineering, chemistry, glassmaking, printing, food industry. The main industrial centres are these towns: Trnava, Skalica, Senica, Piešťany and Hlohovec. The industry of agriculture and food is developed especially in the southern districts of Galanta and Dunajská Streda. The region of Trnava is a significant source of energy production for the whole area of Slovakia with its Nuclear Power Plant Jaslovské Bohunice and Water Power Plant in Gabčíkovo.

Trnava Region in numbers

Number of population:	550 014
Area:	4148 km ²
Number of profit companies:	6261
Number of physical persons	
/small entrepreneurs/:	38 249
Number of companies with foreign capital:	1243
Rate of unemployment:	9,01 %

Taking into account the big investment of PSA in Trnava, the region of Trnava is expected to become one of the most dynamic regions in Slovakia. Building works are running and the production will start in the year 2006.

Foreign investor in Region Trnava

- Amylum Group /Holland/ • Boge /Germany/ • Danone /France/ • Eastern Sugar /France/ • Hebel /Germany/ • INA Schaeffler KG /Germany/
- John's Manville /USA/ • Mariánské léčebné lázně /Czech republic/ • LS+Automotive /Germany/ • ON-Semiconductor /USA/ • PSA /France/
- Punch International, N V /Belgium/ • Sachs /Germany/ • Samson Europe N. V. /Belgium/ • Sony /Japan/ • Swedwood /Sweden/
- Vitana /Czech Republic/

Trnava Regional Chamber SCCI

The Regional Chamber of Trnava is an integral part of the Slovak Chamber of Commerce and Industry, founded on January 1, 1997. The Chamber is a public - legal, nonprofit institution, providing activities in order to support and protect its members in their home country and also abroad. The chamber is the major representative of entrepreneurs in the region. It meets interest in business and the economical development of the region.

Activities and services of Trnava SCCI

- development of foreign trade relations /business mission, trade fairs and exhibitions, searching cooperating contacts, presentation of the region
- membership networking /database of members, meetings, clubs with VIP/
- organising of seminars, consultancy
- verification of documents - Certificates of the Origin, ATA carnets, commercial invoices
- wide range of informations services
- consultancy and support in project preparation, active participation in various EU projects

There are two Sections acting in Trnava: the Section of Welding and the Section for Agriculture and Food Industry.

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc. A few neutral figures:

GDP IN CONSTANT PRICES – changes in %
Slovakia

EXCHANGE RATE - Month - VI.
SKK / 1 CZK, Slovakia: Czechia

Fourteen years have elapsed since the Slovak Republic acquired independence. In these approximately fourteen years the Slovak Republic had to prove evidence of its capability to manage the development of the country, assuring its political stability and economic development.

After three years of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czechia, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Found, macro-economic indicators, etc.

The Slovak Chamber of Commerce and Industry (SCCI) as a public - legal institution plays the role of the major representative of the entrepreneurial and business sphere in the Slovak Republic. The Regional Chamber of the SCCI in Zilina represents and co-ordinates the interests of its members in matters of business activity inland and abroad, renders services and protects them from unfair business relations in the following districts (from 2003): Zilina, Cadca, Martin, Dolny Kubin, Liptovsky Mikulas, Ruzomberok, Namestovo. The members of Regional Chamber SCCI Zilina come from the most industrial sectors including engineering, machinery, bearing, automotive, electrical, electrotechnical, building industry, tourist industry, wood processing, paper, chemical, textile, food, shoes, plastic, brick industries, metallurgy, etc. Energy production exceeds the most regions in Slovakia.

Our region located at the North-West of Slovakia is one of the most industrialized areas in the republic. Zilina is the Capital of the County. Zilina and Martin are the double cities - new urbanization center of the Country and North-West Slovakia, with a population of almost 170 000. The region is connected to the european trunks roads **E50**: Brest-Paris-Brno-Zlin-Zilina-Martin-Ruzomberok-Liptovsky Mikulas-Presov-Kosice-Kyjev,... and **E75** ..., (Koper-Rijeka), ...Belgrade-Szeged-Bratislava-Trencin-Puchov-Zilina-Zwardon-B.Biala-Katowice-Warsaw-(Vilnius)-Minsk...

North-Slovakia and especially Zilina and Martin is a transport junction of international railways systems in the direction Poland, Czechia, Ukraine or the South - Trieste, Rijeka, Belgrade, Koper. Air transport is secured via the **international airport at Zilina - regular flights: Zilina-Praha-Zilina**. The distance of the airport from Martin is 37 km (22 km-via tunnel).

Until the year 2006 Zilina will be connected by highways to Bratislava and the Polish border (Zwardon, Katowice).

Zilina district belongs to the 8 districts, where 75% of the total volume of investments allocated in the Slovak Republic was placed. Zilina as a natural center of the county has the largest number of banks following Bratislava. Principal possibilities for regional development after mapping the economic potential, macroeconomic impact, geo-economic influences, taken from the demographical development, forming of labor supply and other factors, are highly prospective.

Geographical and climatic conditions allow the region to develop tourism. There are some virgin nature parts in this county. The climate creates conditions for the development of tourism, agrotourism, winter sports (December-March)and water sports. The High Tatras National Park, The Low Tatras National Park, The Fatra National Park as well as the protected region have complex tourist centers. District Liptovsky Mikulas candidates for organizing The Winter Olympic Games in the year 2014.

Slovak Agricultural and Food Chamber (SPPK) represents non-governmental, autonomous and statutory undertaker which was established in line with the Law No.30/1992 Coll. as amended. The basic role of the Chamber is to push forward the justified common interests of its members, mainly in the process of the agricultural and social policy setting. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal persons providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business.

The membership in the Chamber is voluntary since January 2005, according to the changes made to the Law. By September 30st 2005t, SPPK registers 2 108 member organisations, of which 1 803 members come from the agricultural primary production, 155 members come from the food processing industry, 111 of the members are providers of the services for agriculture and there are also 39 other organisations, mostly coming from the field of science, research, schools etc.

Internal organization

Central office in Bratislava with 15 employees and the net of 41 regional agricultural and food chambers (RPPK) operating in Slovakia. The "regional" chamber can be established also on the other than just territorial basis. This change in the wording as well as the principle of the voluntary membership was set out in the Law No.546/2004 Coll. which amended the original Law No.30/1992 Coll. on the Slovak Agricultural and Food Chamber. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above.

The activities of the Chamber are supervised by the official bodies – the General Assembly, the General Management, the President and the Supervisory board. General Assembly composed of the delegates voted by representatives of the member subjects. The General Assembly approves the Statute of the Chamber, its Electoral system, the Rule of procedure and also votes on the President, Vice-presidents, the members of the General Management and the Supervisory board. The General Management is the executive body which administrates the proceeding of the Chamber. The President is on the head of the Chamber and the General Management, he monitors the functioning of

the Chamber central office and fulfils his duties set in Status, orders of the General Assembly or the Management. The Supervisory board represents the highest body controlling all the activities of the Chamber.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and e-mails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the office in which they are registered, but also to the central office in Bratislava.

Activities

- The Chamber's activities are concerned on:
- Legislative – legal sector
 - Providing of business information service
 - Guidance and education
 - Co – operation with the international organizations

Membership in international organizations

1. International European farmers organization COPA/COGECA
2. Confederation of the food and drink industries CIAA

Co-operation with national and international partners

The Chamber is co-operating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector.

SPPK pays extra attention to development of the international contacts and took the initiative of the periodical meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The Chamber is communicating also to other agricultural chambers within the European Union.

Member associations of food processing

SPPK organizes 13 associations of the food processing industry – see below:

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

M.R.Štefánik airport Bratislava,
Airport Košice,
Airport Poprad-Tatry,
Airport Sliač,
Airport Piešťany
and **Airport Žilina.**

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

CURRENT PROBLEM OF THE POLICE BODY IN THE SLOVAK REPUBLIC

The institute of the police body is a long-standing legal institute, legally embodied in 1940 by the Act n. 63/1940 Coll.on Price Authority.

From the historic point of view, the institute has become criminal legal institute. That is why it may be deemed a later instrument of law enforcement agencies which subrogated the former, so-called Searching Body of the Police Force.

The term police body is mentioned in 112 legal regulations which constitute the legal framework of the Slovak Republic.

The fundamental legal embodiment of the police body along with its particular tasks is contained in the Act on the Police Force.

From the viewpoint of thorough and satisfactory legal regulation of this institute, it is necessary to point out that the institute is legally atomized, unsatisfactorily embodied by its legislative scope and content. Moreover, it is not well-defined in a legislative way.

In terms of these coordinates, it is imperative to determine the future tendency of development concerning legal regulation of this instrument.

In its actions, the police body is independent and excluded from representation. The same is true of other law enforcement agencies. That is why the institute is of great importance to successful criminal proceeding. And perhaps this is the reason for which the police body becomes focus of undesirable attention of persons involved in reprehensible acts as well as people acting to have impact on its activities, conclusions and results.

In this respect, the police body is an interesting subject of investigation from different standpoints, esp. when taking into consideration preserving human rights, police ethics and eliminating corruption in procedures related to criminal proceeding, apart from where legal sciences stand.

The activities of the police body can influence in both, positive and negative way the course of preliminary criminal proceeding itself, the extent of maintaining lawfulness and, at the same time general public opinion on the police force and its activities.

These statements can be supported by a particular case that occurred in Bratislava and in which the police body is, respectively was the central figure.

In August 2002, LL.D Igor Š., judge from Bratislava, was caught red-handed by police services upon taking over a bribe.

Irrespective of facts irrelevant to us, Igor S. pleaded guilty, probably under the weight of conclusive evidence recorded by police in the form of statements by witnesses who were police members, together with MG tapes.

However, he claimed afterwards that he made confession under pressure and he disclaimed his liability for the crime. He attempted to reverse the course of criminal prosecution in his favor by deceiving the investigators, making use of perjuries, false accusations, lies, slandering and other means, such as his undue influence on witnesses.

However, on grounds of testimony and additional

evidence, he was proven guilty, accused and charged. Igor Š. was sentenced by 1st grade District Court in M., despite his numerous efforts to cheat law enforcement agencies, including lies, engaging other persons in the ease by false accusation, influencing witnesses and driving into the case his brother, LL.D Pavol Š., resident of B. nad B.

Obviously, his brother alongside with his niece, the convict's daughter, acted after having been solicited to bring false accusation of the key witness in this bribery scandal.

The strategy of the convict was to report to police authorities a great number of alleged crimes which should have been committed by different persons (judges, defending counsels, police officers, prosecutor etc.). He paid special attention not only to the key witness, col. Prof. LL.D Jozef K., CSc. who reported the crime of bribery, but also to his family, esp. to his son, BC. Andrej K.

The police body, Lt. Marcel P., operating in the same Bratislava district as the convict, interrogated the key witness, his wife LL.D Zuzana K. and their son in connection with suspicion of committing a crime of influencing the court - the false accusation made by the accused judge.

Not only had the witness's action been not proven, despite the absence of interrogation, in June 2005 the witness was illegally accused of this crime by the above mentioned police body, on grounds of the sole testimony given by LL.D Pavol Š., the convict's brother who alleged that the key witness had paid visit to his workplace or elsewhere in B. nad B. on a non-definite day and hour between 17 - 28 August 2002, in order to ask for the intervention with his brother - the accused judge. Pavol Š. allegedly turned down the request.

Although it is patently obvious that the charge was irresponsible and fabricated, what is more it was not liable to the regime of the Criminal Code as the merits of the crime.

The police body accused the witness of the above mentioned crime nevertheless.

Naturally, the supervising prosecutor in the wake of the intervention made by the General Prosecutor's Office of the Slovak Republic cancelled the indictment.

We expect the complaint being lodged against the police body who acted illegally and in contravention of the law.

Above all, it is evident that the police body failed to carry out all the requisite proofs so as to ascertain the merits of the crime.

Moreover, he failed to correctly evaluate the findings, he charged Igor Š. with accusation of the act which is not a crime etc.

As a public official, Marcel P. inflicted moral loss on the witness, knowingly or by his neglect since the accused judge sent out the resolution of accusation of col. Prof. LL.D Jozef K., CSc. which he had gained from the unknown informer to editorial boards of mass and electronic media as well as to government and civil service bodies, including the President's Office and the Home Secretary and asked these authorities to publish the resolution.

It can be stated that the police body accomplished elements of the offence, i.e. abusing of power of public authority, perhaps as a member of an organized criminal group comprising him, the accused judge, his daughter and his brother.

However, in unofficial personal interview, the police body informed the defending counsel of the accused Igor Š. that he as law enforcement agency could not have acted upon a statute and independently since he had allegedly been instructed, respectively directed by the supervising prosecutor towards charging col. Prof. LL.D Jozef K., CSc. with accusation.

Provided the supervising prosecutor's intervention is proven, the organized criminal group would be personally enlarged, also due to the fact that the accused judge was formerly employed within the bodies of the prosecutor's office and he is said to keep professional contact with the supervising prosecutor.

From the viewpoint of identifying the problem of preserving human rights concerning persons involved in this case, police ethics, and in particular the corruption from the police body perspective, the complex of following questions is set forth to be discussed:

1. To what extent did the action of the police body violate human; respectively civil rights the witness col. Prof. LL.D Jozef K., CSc., guaranteed by the Constitution, who was illegally accused of committing a crime?

2. To what degree did the police body infringe upon police ethics by charging the witness with accusation, allegedly against his own will but by order of the supervising prosecutor?

3. To what extent is or may the police body be interwoven with LL.D Igor Š. in corruption relation since Igor Š., as a person not involved in the witness's criminal proceeding but commenced by him only on grounds of false accusation charged by the convict's brother, LL.D Pavol S., obtained the resolution of accusation of col. Prof. LL.D Jozef K., CSc. in a non-transparent way as this resolution was made public by the accused judge?

All the issues of the outlined case require appropriate answers.

From the other side of the case, we may judge the extent of sufficient legal protection of the police body against the infringement upon his activities as an independent procedural law enforcement agency, also taking into consideration the intervention made by the supervising prosecutor.

We may as well reason about the scope of competence concerning the police body, moral fibre, i.e. the extent of morality of the police body acting in rather non-standard way, including the level of his comprehension in terms of police ethics.

Furthermore, it would be of interest to answer the question whether the police body had acted knowingly or by his neglect since corruption and extortion of this police body by the accused judge is also a possibility.

In this respect, it will be vitally important to determine the role of the Police Trade Union in untangling and solving this and similar cases in the near future.
